

READ ME:

Thanks to all ISSP-users for downloading this zip-file!

The dataset of this zip-file was not integrated into the international file yet, because it was handed in too late.

However, all files in the zip-file are provided in their original form.

Neither the national dataset nor the rest of the study material were checked by the Archive. The only change the Archive has made to this original dataset was adding the variables 'ZA-Number' and 'Version' to make this dataset version citable by a permanent digital object identifier (doi) as long as this national dataset is not integrated into the respective international ISSP data file.
