Variable Report

Documentation release 2012/06/27

GESIS – Data Archive for the Social Sciences

Introduction and preliminary remarks

The **GESIS Variable Report Series** on the **International Social Survey Programme Studies** offers a comprehensive description of data on study and variable level. For each annual module as well as for the cumulated data sets individual Variable Reports are provided.

The reports are structured into six chapters:
Chapter one gives a brief overview of the worldwide ISSP project as a whole.
Chapter two provides the description of the respective ISSP study including bibliographic information, abstract and methodological specifications.
Chapter three contains information on study related survey materials which are absolutely essential to understand the data properly, followed by general information about the structure of ISSP data sets, documentation standards and variable coding frames in **chapter four**.
Chapter five provides a short explanation of the variable documentation itself.
Chapter six contains the core variable documentation: the documentation of each variable including complete question texts with all answer categories of the Basic Questionnaire enriched with archival remarks. In addition, this Variable Report presents cross tabulations over countries for all substantial and most of the demographic variables. Archive, protocol and country specific variables are usually shown by frequency distributions. All cross tabulations and frequency distributions are based on unweighted data.

The appendix usually contains two sorts of survey materials: the Study Descriptions and, if available, the Characteristics of National Population, basic statistics for all the participating countries of the corresponding module. The data for the annual ISSP modules are collected by independent institutions in each country. The country data is integrated into one international data file, which is documented, distributed and long-term archived by the ISSP Archive, institutionally, the GESIS Data Archive for the Social Sciences (Leibniz Institute for the Social Sciences) in Cologne, Germany (http://www.gesis.org). In every second year from 1997 on, data and documentation have predominantly been prepared by our partners at JDS/ ASEP in Spain (http://www.jdsurvey.com).

Data access

Data for statistical analysis and related documentation are made available by the Data Catalogue (https://dbk.gesis.org/dbksearch/)or by ZACAT (http://zacat.gesis.org), the Data Online Platform of GESIS. ZACAT additionally enables users to analyse data online. Access to the Data Catalogue and ZACAT is free of charge, download of data sets requires registration.

Anonymised data

According to data regulations in participating countries, only anonymised data are made available. Each national team is responsible for carefully checking the data in this respect before the deposit.

Usage requirements

To provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about related research activities, all users of ISSP data are requested to send bibliographic citations for each completed manuscript or thesis abstracts to isspservice@gesis.org or if possible, please directly send a copy of the publication to GESIS (GESIS-Leibniz-Institute for the Social Sciences, Dept. Data Archive - ISSP, Unter Sachsenhausen 6-8, D-50667 Cologne, Germany). Please also observe the general notes on the usage regulations of GESIS Data Archive resources (http://www.gesis.org/en/services/data-analysis/data-archive-service/usage-regulations/).

Disclaimer

Neither the original collector of the data, nor GESIS or JDS/ ASEP bears any responsibility for the use of ISSP data or any data analyses.

1 ISSP Series Description

1.1 Series name

The International Social Survey Programme (ISSP)

1.2 Series information

The ISSP is a cross-national collaboration programme, which has been continuously conducting annual surveys on diverse social science topics since 1985. The topics for each ISSP survey are proposed by delegates from ISSP member countries. Then, a Basic Questionnaire is composed and improved over several years by a committee, elected by the General Assembly before it is pretested in various countries. Starting in 1984 with four founding nations - Australia, Germany, Great Britain and the United States, the ISSP meanwhile has grown up to almost 50 member countries covering various cultures around the globe.

ISSP Modules 1985 – 2013:

-   Citizenship: 2004
-   Environment: 1993/ 2000/ 2010
-   Family and Changing Gender Roles: 1988/ 1994/ 2002/ 2012
-   Health and Health Care: 2011
-   Leisure Time and Sports: 2007
-   National Identity: 1995/ 2003/ 2013
-   Religion: 1991/ 1998/ 2008
-   Role of Government: 1985/ 1990/ 1996/ 2006
-   Social Inequality: 1987/ 1992/ 1999/ 2009
-   Social Networks: 1986/ 2001 (Social Relations and Support Systems)
-   Work Orientations: 1989/ 1997/ 2005

All ISSP members agree
1. to jointly develop modules addressing important areas of social science,
2. to field the modules either as an individual survey or as supplements to the regular national surveys and
3. to make the data available to the social science community as quickly as possible.

As the surveys are designed for replication they offer both cross-national and cross-time comparison, creating the base for a vast range of substantive and methodological research. Since there is no external fund agency, ISSP members fund their own surveys. Beyond that, ISSP committee members fund ISSP central coordination, networking, development of source questionnaires, or methodological work.

For more information on the ISSP in general, its working principles, contact addresses of ISSP members and principal investigators, please visit the ISSP web site (http://www.issp.org).

2 Study Description – International Social Survey Programme 2004

2.1 Bibliographic information

2.1.1 Archive study number

GESIS: ZA3950

2.1.2 Title

International Social Survey Programme 2004: Citizenship I (ISSP 2004)

2.1.3 Authoring Entity/ Principal Investigators

Name	Affiliation
Wilson, Shaun	Macquarie University, Sydney, Australia
Gibson, Rachel	ACSPRI Centre for Social Research (ACSR) Research School of Social Sciences, The Australian National University, Canberra, Australia
Haller, Max	Institute of Sociology, University of Graz, Austria
Hoellinger, Franz	Institute of Sociology, University of Graz, Austria
Hadler, Markus	Institute of Sociology, University of Graz,, Austria
Ressler, Regina	Institute of Sociology, University of Graz, Austria
Scalon, Maria Celi	Instituto Universitario de Pesquisas do Rio de Janeiro, Rio de Janeiro, Brazil
Dimova, Lilia	Agency for Social Analyses (ASA), Sofia, Bulgaria
Pyman, Heather	Carleton University Survey Centre, Carleton University, Ottawa, Canada
Pammett, Jon	Carleton University Survey Centre, Carleton University, Ottawa, Canada
Segovia, Carolina	Centro de Estudios Públicos, Santiago, Chile
Papageorgiou, Bambos	Centre of Applied Research, Cyprus College, Nicosia, Cyprus
Mateju, Petr	Institute of Sociology, Academy of Sciences of the Czech Republic, Praha, Czech Republic
Rakusavonva, Petra	Institute of Sociology, Academy of Sciences of the Czech Republic, Praha, Czech Republic
Andersen, Jorgen G.	Department of Economics, Politics and Public Administration, Aalborg-University, Aalborg, Denmark
Andersen, Johannes	Department of Economics, Politics and Public Administration, Aalborg-University, Aalborg, Denmark
Torpe, Lars	Department of Economics, Politics and Public Administration, Aalborg-University, Aalborg, Denmark
Tobiasen, Mette	Department of Economics, Politics and Public Administration, Aalborg-University, Aalborg, Denmark
Blom, Raimo	Department of Sociology and Social Psychology, University of Tampere, Finland
Melin, Harri	Department of Sociology and Social Psychology, University of Tampere, Finland
Tanskanen, Eero	Survey Research Unit, Statistics Finland, Finland
Carton, Ann	Administration of Planning and Statistics, Ministry of Flanders, Bruxelles, Belgium
Van Geel, Hendrik	Administration of Planning and Statistics, Ministry of Flanders, Bruxelles, Belgium
Billiet, Jaak	Department of Sociology, Catholic University Leuven, Leuven, Belgium
Loosveldt, Geert	Department of Sociology, Catholic University Leuven, Leuven, Belgium
Swyngedouw, Marc	Department of Sociology, Catholic University Leuven, Leuven, Belgium
Lemel,, Yannick	FRANCE-ISSP Association (Centre de Recherche en Économie et Statistique), Laboratoire de Sociologie Quantitative, Malakoff, France
Bréchon, Pierre	CIDSP (Centre d'Informatisation des Données Socio-Politiques) Institut d'Études Politiques de

	Grenoble, Domaine Universitaire, St. Martin D'Heres, France
Cautres, Bruno	CIDSP (Centre d'Informatisation des Données Socio-Politiques) Institut d'Études Politiques de Grenoble, Domaine Universitaire, St. Martin D'Heres, France
Forsé, Michel	ENS, CMH, Paris, France
Degenne, Alain	LASMAS (Laboratoire d'Analyse Secondaire et de Méthodes Appliquées en Sociologie), Paris, France
Harkness, Janet	ZUMA, Mannheim, Germany
Mohler, Peter	ZUMA, Mannheim, Germany

Ferre, Zuleika	Departamento de Economia, Facultad de Ciencias Sociales, Universidad de la Republica, Montevideo, Uruguay
Piani, Giorgina	Departamento de Economia, Facultad de Ciencias Sociales, Universidad de la Republica, Montevideo, Uruguay
Rossi, Máximo	Departamento de Economia, Facultad de Ciencias Sociales, Universidad de la Republica, Montevideo, Uruguay
Goyeneche, Juan José	Institute of Statistics, University of Uruguay
Zoppolo, Guellermo	Institute of Statistics, University of Uruguay
Marsden, Peter V.	National Opinion Research Center (NORC), Chicago, USA
Davis, James A.	National Opinion Research Center (NORC), Chicago, USA
Smith, Tom W.	National Opinion Research Center (NORC), Chicago, USA
Briceno-León, Roberto	LACSO (Laboratorio de Ciencias Sociales) Research School of Social Sciences, Caracas, Venezuela

2.1.4 Bibliographic citation

Publications based on ISSP data, which are made available through GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations should appear in footnotes or in the reference section of publications.

How to cite the data: ISSP Research Group (2012): International Social Survey Programme 2004: Citizenship I (ISSP 2004). GESIS Data Archive, Cologne. ZA3950 Data file Version 1.3.0, doi: 10.4232/1.11372

2.2 Content

2.2.1 Abstract

Citizen and state.

2.2.2 Topic classification

Topics: Qualities of a good citizen; attitude toward the right of public meetings for religious extremists, people who want to overthrow the government by force, or people prejudiced against any racial or ethnic group; social and political participation; memberships; importance of different people`s rights in democracy (scale); estimation of political influence possibilities (political efficacy); likeliness of counter-action against an unjust law and expected chance of serious attention to people`s demand; interest in politics; personal trust in politicians and people; political discussions with friends; opinion leadership in politics; national sovereignty and attitude to

international organisations; attitude to the action of political parties; real policy choice between parties; attitude toward a referendum; level of honesty and fairness in the last national election; commitment to serve people and likeliness to correct own mistakes in public service; corruption in public service; functioning of democracy at present, in the past and in the future; frequencies of media use; respect for people and tolerance in case of disagreement; self-description of the habitation (residence); voter participation; voting behaviour (recall).

Demography: Sex; age; marital-status; steady life-partner; education; current employment status; hours worked weekly; occupation (ISCO 1988); working for private or public sector or self-employed; if self-employed: number of employees; supervisor function; trade union membership; current employment status (ISCO 1988); earnings; family income; household size; household composition; party affiliation; participation in last election; religious denomination; attendance of religious services; self-placement on a top-bottom scale; region; size of community; type of community: urban-rural area; ethnicity, nationality and family-origin.

Additionally coded: administrative mode of data-collection.

2.3 Universe

Australia (AU); Austria (AT); Brazil (BR); Bulgaria (BG); Canada (CA); Chile (CL); Cyprus (CY); Czech Republic (CZ); Denmark (DK); Finland (FI); France (FR); Germany (DE); Great Britain (GB-GBN); Hungary (HU); Ireland (IE); Israel (IL); Japan (JP); Korea, Republic of (KR); Latvia (LV); Mexico (MX); Netherlands (NL); New Zealand (NZ); Norway (NO); Philippines (PH); Poland (PL); Portugal (PT); Russian Federation (RU); Slovakia (SK); Slovenia (SI); South Africa (ZA); Spain (ES); Sweden (SE); Switzerland (CH); Taiwan, Province of China (TW); United States (US); Uruguay (UY); Venezuela, Bolivarian Republic of (VE); Belgium, Flanders (BE-FLA)

2.4 Sampling procedure

Sampling procedures differ for the individual countries: Partly simple, partly multi-stage stratified random sample of respondents 18 years old and older (Finland 15, and Japan, South Africa and the Netherlands 16 years and older).

2.5 Fieldwork and sample sizes

Table: Participating countries (regions) and fieldwork information for ISSP 2004

Country (Region)	ISO	Fieldwork start/ end	Fieldwork Institute	Questionnaire-versions	Sample Size (n of cases)
Australia	AU	07 Sep 05 – 29 Dec 05	Australian Social Science Data Archive, Australia	AU04	1914
Austria	AT	Nov 04 – Dec 04	Institute for Empirical Social Research (IFES), Vienna, Austria	AT04	1006
Belgium/Flanders	BE-FLA	17 Mar 04 – 12 Jul 04	TNS Dimarso, Bruxelles, Belgium	FLA04	1398
Brazil	BR	05 Jan 06 – 29 Jan 06	Sensus – Data World, Brazil	BR04	2000
Bulgaria	BG	15 Jul 05 – 26 Jul 05	ASA and PDP, Sofia, Bulgaria	BG04	1121
Canada	CA	29 Jan 04 – 31 Mar 04	Carleton University, Ottawa, Canada	CA04-en CA04-fr	1211
Chile	CL	11 Jun 05 – 03 Jul 05	ICCOM, Chile	CL04	1505

Cyprus	CY	15 Apr 04 – 20 Sep 04	Center of Applied Research, Cyprus College, Nicosia, Cyprus		1000
Czech Republic	CZ	27 Sep 04 – 29 Oct 04	SC&C, Prague, Czech Republic	CZ04	1322
Denmark	DK	27 Oct 04 – 15 Jun 05	SFI Survey, Copenhagen, Denmark	DK04	1186
Finland	FI	08 Sep 04 – 01 Nov 04	Statistics Finland, Helsinki, Finland	FI04-fi FI04-se	1354

Total Sample Size	∑	02 Mar 03 – 12 Feb 06			52550

2.6 Mode of data collection

Face-to-face-interview, postal survey and self-completion questionnaire

3 Corresponding survey material

When dealing with international comparative data, data sets and documentation must be seen as two sides of the same coin. Even though ISSP members make huge efforts to produce comparable data in each country, there still remains a remarkable amount of country specific peculiarities in the contributions to the final, international data set. These country specific peculiarities either have to be harmonised or to be documented, as they provide vital information for secondary analysts. Therefore, a set of procedures has been developed to take care for orderly technical preparation of national data sets and to allow for the systematic collection of required context information.

All corresponding survey materials are provided in English, only the national questionnaires are available in the national language(s) of each country.

3.1 Basic Questionnaire

The ISSP General Assembly concludes the design phase of an ISSP module after intensive discussions on the single items of the Basic Questionnaire roughly a year before the module is fielded. Two third of the module questions have to be replications from previous ISSP modules of the same subject. According to this, one third of the questions in each module are new. Subsequent to the mandatory module questions, some pre-selected optional questions can be added. Finally, ISSP member countries translate the British English Basic Questionnaire to their local language as equivalent as possible.

Drafting group for the Basic Questionnaire on the Citizenship Module 2004:

- Canada: Jon Pammet (Convenor)
- Denmark
- Mexico
- Philippines
- Portugal
- Slovenia

3.2 Background Variables Standards and Documentation

Apart from the Basic Questionnaire, covering the substantial module variables, countries also have to collect responses on a defined set of ISSP Standard Background Variables, which predominantly contains demographic information. Since the ISSP often runs with larger national surveys, the background variables are mainly taken from these surveys. Thus, demographic issues cannot be asked in a fixed form over all members of the ISSP. They have to meet the demands of the national studies first. As a result, the demographic variables for the ISSP need to be post-harmonised according to a developed set of common standards.

Over the past 30 years, there have been different Background Variable Standards:
The first set of background variables was established in 1985 with the first ISSP survey. Here countries agreed on collecting the same demographic information. This list of variables underwent a revision in 2001, now providing a coding frame for each background variable. It was valid until 2009.
In 2010 a new revision process of the ISSP Background Variables, planned for a three years period, started. Beginning with the ISSP module 2010, this first revised version of the ISSP Background Variable Standard concentrating mainly on variables containing work, occupational and partnership status information came into effect. The second round of revisions, coming into effect in 2011, had its focus on the education variables, while the last change is going to be made on the variable measuring ethnicity, effective with the module 2013. The new standard is documented in some guidelines (different documents indicating the intermediate steps of revision), providing detailed information and instructions on the variables measurement goals, coding frames, filters and possible question texts. Additionally, the question texts are summarised in a Master Questionnaire on

Background Variables.

Since 2004 countries document the post-harmonisation processes for each variable in a special documentation template provided by the Archive. This template, always adjusted to the current standard, offers detailed country specific information on administration, derivation, and coding of the ISSP Background Variables.
All relevant background variable documents are available under the following link:
http://www.gesis.org/en/issp/issp-members-area/coding-standards/

3.3 National Study Description

For each country, the original National Study Description is available in the appendix of this Variable Report. The National Study Descriptions are provided by the countries and include information on sample sizes, field dates, modes of data collection, sampling procedures, response rates and weighting processes.

3.4 Characteristics of National Population

The appendix of this Variable Report also includes Characteristics of National Populations for all participating countries from 1989 on. These documents provide statistical data on the composition of national populations in terms of gender, age, education and employment rates and, therefore, allow assessing how representative national samples are.

3.5 Where to find the survey materials and the data set of the ISSP Module of 2004 – Citizenship I

In the GESIS Data Catalogue on the GESIS web you find

- the **Basic Questionnaire** of this module together with
- all **country questionnaires** in the respective local languages,
- the **National Study Descriptions** including **Characteristics of National Populations** together with
- detailed **National Documentations** on phrasing and coding of the **Background Variables,**
- the **Study Monitoring Report** and
- the **integrated data file ZA3950_v1.3.0** for download

under the tab "Data and Documents" of:

https://dbk.gesis.org/dbksearch/SDESC2.asp?no=3950

The GESIS online data portal ZACAT also provides the integrated data file and further ISSP documentation materials for download:

http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fStudy/ZA3950

Beyond this, ZACAT enables users to perform basic online analyses like frequency distributions, cross tabulations or regressions.

4 Data set structure and standards

ISSP data sets are processed and documented by the Data Archive of GESIS and by ASEP/ JDS every second year in accordance with agreed standards, which may differ in some details. Despite several changes in the background variables, a certain standard has been established in the course of time.

In order to uniquely identify a data set, to each data set version a GESIS Study No., a Version No., and a Digital Object Identifier (doi) is assigned. The doi is linked to the Study Description in the Data Catalogue (https://dbk.gesis.org/dbksearch/index.asp). Metadata filled in the Study Description of ISSP 2004 data and associated with a doi are provided to the registration agency for social science data (da|ra).

The doi: 10.4232/1.11372 is assigned to the ISSP 2004 (v.1.3.0).

4.1 Data set structure

Usually, the ISSP data sets are structured as follows:

1. Archive and Identification Variables

    Administrative variables are used for identifying data sets, respondents and countries (GESIS Data Archive Study Number, Version Number, Respondent Number, Country Codes).
    The GESIS Archive version variable includes the number of the data set and the respective release date, composed as a string variable with three numbers:

    - The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
    - The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
    -The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

    Country codes identify each case as belonging to one country. The country code variable, which was used according to a scheme leaning on international automobile identification codes in the beginning of the ISSP, was replaced by two country code variables based on the ISO Code 3166. One identifies countries as a whole, the other one possible subsamples, such as East and West Germany. The cross tabulations shown in this Variable Report are based on a third, alphanumerical country code variable, which also identifies subsamples.

2. Substantial Variables

    The substantial variables contain the mandatory module questions, often supplemented by optional questions.

    Variable labels provide keywords based on the question text; these keywords are applied consistently if questions or question items are repeated over time. All substantial variables include the original question number of the Basic Questionnaire in the variable labels.
    Generally, all variable names consist of the standard prefix 'V' and the consecutive variable number (beginning with the archive variables).

3. ISSP Background Variables

    In the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive variables and followed by substantial and background variables. The last variable of each data set

usually is the variable on weighting. Later on, the background variables start with V200 et seq.. Nowadays, these variable numbers are expressed by mnemonics with max. 8 characters (SEX, AGE, ...).

4. Country Specific Variables

Variables, which cannot be harmonised for various reasons, are usually presented as country specific variables. As a rule, variable names of country specific variables have country abbreviations as prefixes. In some of the older ISSP studies, the principle of country specific variables is not used. Instead all country specific information is integrated into one variable. This Variable Report provides careful documentation of country specific meanings and deviations.

5. Protocol Variables

There are two protocol variables in the latest ISSP modules. The first, 'MODE', indicates the mode of data collection, while the second, 'SUBSCASE', indicates whether a respondent in the sample is an original case or a replacement for an originally selected respondent who was not available. Former ISSP surveys do not contain the SUBSCASE variable.

6. Weight

There is no weight available for the international comparison on the ISSP across countries. Please note that also country subsamples can be over- respectively underrepresented without any weighting factor correcting for the imbalance. This fact has to be taken into account if these countries in question are analysed as one unit.

4.1.1 Deviating data set structure in ZA3950

In this data set there are two variables for country identification basing on ISO 3166, the former variable 'COUNTRY' which includes country codes and the alphanumerical country code variable 'C_ALPHAN'. The variable 'COUNTRY' helps to uniquely identify respondents and 'C_ALPHAN' is used for the cross tabulations shown in this Variable Report. Usually, both variables identify subsamples. Since the Jewish and the Arabic population of Israel are available in one collective sample, the variable 'IL_REG' can be used as a flag variable to distinguish between these groups.

As in the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive and the substantial variables, followed by the background (V200 +) as well as the country specific variables, the protocol variable and the variable on weighting in the end. For a high recognition value and to facilitate searching in data portals or data catalogues all variable labels except the labels for the archive and the substantial variables received as a supplement the current mnemonics with max. 8 characters in brackets (SEX, AGE, AT_DEGR ...).

The variables on respondents' income (V254, RINC) and family income (V255, INC) are not available as country specific variables. However, the exact meaning of each country specific income category and midpoint is carefully documented in the field 'Note' of V254 resp. V255. Please also note, that due to varying filter instructions family income (V255) might not have been asked for single households or single earners after the respondent has answered the question of personal income (V254). Additionally, in some countries personal (V254) and family income (V255) might differ slightly only because of different category schemes in between these two variables which finally leads to deviating midpoints.

Furthermore, the note on country specific occupational codes and variables (V246, ISCO and V252, SPISCO) is included in the Appendix as part C, because of its great length.

4.2 Data preparation

On the basis of the Basic Questionnaire covering the substantial variables and the standard core set of background variables the Archive provides a Standard Setup for each individual ISSP module, which defines the variable and value labels for the integrated data file. All country data sets should be processed and prepared to match the structure of the Standard Setup before the material is deposited to the GESIS Data Archive for integration and archiving.

After conducting the national surveys, all collaborators are supposed to deposit their data at the GESIS Data Archive, where all the deposited data sets are prepared, integrated and merged into one single international data set, which is finally published.

During the data preparation process all national data sets are successively controlled for completeness, missing and duplicate records, for wild codes and for formal consistency of response patterns and question routing. Moreover, national derivation processes from source to target codes in the background variables are controlled. Missing values, especially due to filter instructions are checked and recoded where necessary. Errors, which are discovered during these procedures, are corrected or documented in cooperation with primary investigators. Complete machine-readable DDI-XML (see chapter 4.5) compliant documentation is created for all ISSP data sets by GESIS.

4.3 Coding frames

By general rule, the variables of the module questions adopt the coding frame as specified in the Basic Questionnaire, except for multiple response questions.

GESIS adds 'Not applicable' (NAP) codes for questions that have filters. NAP indicates that only a subsample and not all of the respondents were asked. Also in the case of country specific variables, all the other countries are coded NAP.

GESIS adds 'Not available' (NAV) for variables which in single countries may not have been conducted for whatever reason.

4.3.1 Country specific answer categories

ISSP data include some questions (variables) which have country specific answer categories such as DEGREE, RESPONDENT'S INCOME, FAMILY INCOME, PARTY AFFILIATION, REGION and SIZE OF COMMUNITY.
For country specific income variables with answer categories, the data is recoded to midpoints of the categories.

For occupation, official international occupation codes are used. While in the first years of the ISSP many countries used country specific occupation codes, ISCO 1988 has been established as a standard over the years.

4.3.2 Missing values

In general, the missing values are standardised across ISSP modules. For all variables a set of missing values is defined:

0: Not applicable (NAP), Not available (NAV)
7 (97, 997, 9997, ...): Refused
8 (98,998, 9998, ...): Don't know
9 (99, 999,9999, ...): No answer

4.4 Weighting

Please note, that there is **no total weight usable for international comparison**. While all ISSP data sets contain a weighting variable, the weights in this variable do not incorporate a common weighting scheme that can be applied to all countries of the same ISSP module.
 In the Study Description and/ or in the Background Variables Documentation of each country you will find more detailed information on the kind of weights that are used. You can see, whether

- a design weight
- weights to adjust for non-response bias or
- a combination of these both weights above or
- different weighting procedures

are applied. However, some countries dispense with weighting factors. If no weight is provided, the variable "Weight" is coded to 1.0. Otherwise the weighting factor is unequal 1.0 (but greater than 0).

It may be advisable to weight data to increase representativeness in certain cases. For ISSP data we strongly recommend consulting the National Study Descriptions for information on the certain weighting factor composition and maybe even the Characteristics of National Population for more context information. An initial overview of the national weighting procedures is provided in this Variable Report in chapter 6.

4.5 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social sciences, established by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the Basic Questionnaire with the variable description (variable name, values, and labels) of the data set. General remarks and comments referring to a certain variable are defined as variable notes. Notes mostly include additional information on country specific deviations from the ISSP standard, information about data problems or other specific characteristics.

5 Explanation of the variable documentation

The variable documentation part of this Variable Report describes each variable in the data file including all relevant information for this variable such as the single question components or further notes and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).
In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable 'C_ALPHAN'.

AT	Austria	JP	Japan
AU	Australia	KR	South Korea
BE-FLA	Belgium/Flanders	LV	Latvia
BG	Bulgaria	MX	Mexico
BR	Brazil	NL	Netherlands
CA	Canada	NO	Norway
CH	Switzerland	NZ	New Zealand
CL	Chile	PH	Philippines
CY	Cyprus	PL	Poland
CZ	Czech Republic	PT	Portugal
DE-E	Germany-East	RU	Russia
DE-W	Germany-West	SE	Sweden
DK	Denmark	SI	Slovenia
ES	Spain	SK	Slovak Republic
FI	Finland	TW	Taiwan
FR	France	US	United States
GB-GBN	Great Britain	UY	Uruguay
HU	Hungary	VE	Venezuela
IE	Ireland	ZA	South Africa
IL	Israel		

The example explained below (ISSP 2008) shows the information appearing in the variable documentation part of a Variable Report for a typical substantial variable. Results are usually broken down by country or presented as

frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age) results are not shown.

The complete question and answer texts are taken from the final Basic Questionnaire as provided.
All deviations are documented in this Variable Report.

As there is neither an international weighting factor nor a national weighting factor which would be comparable for all participating countries, all frequencies and tables are calculated from **unweighted data.**

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the data set.

QUESTION NUMBER and full QUESTION TEXT from the Basic Questionnaire, including interviewer instructions, if applicable. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the Basic Questionnaire. Abbreviations commonly used in the code definitions are DK (don't know), NA (no answer), NAP (not applicable) and NAV (not available).

DERIVATION information refers to the construction principle of derived variables.
NOTE delineates additional explanatory text or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies base on unweighted data. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on basis of the *valid cases*.

6 Variable Documentation

Variable, Label
Question Text (English Language)

V1 - GESIS Data Archive Study Number

GESIS Data Archive Study number ZA3950 for the ISSP 2004 on 'Citizenship I'.

Study number of the data set producer and archiving number

3950   GESIS Data Archive Study Number ZA3950

V1

Value	Label	Missing	Count	Percent	Valid Percent
3950			52550	100.0	100.0
	Sum		52550	100.0	100.0
	Valid Cases		52550		

V2 - GESIS Archive Version

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

V2

Value	Label	Missing	Count	Percent	Valid Percent
1.3.0 (2012-06-26)			52550	100.0	100.0
	Sum		52550	100.0	100.0
	Valid Cases		52550		

V3 - Respondent Number

Respondent Identification Number

This number uniquely identifies each respondent. It is composed of two sections containing eight numbers in total. The first two digits are identical with the country codes (01-42) of variable 'COUNTRY'. The digits following behind contain the original identification number.

COUNTRY - Country/ Sample (ISO 3166)

Country/ Sample (ISO 3166)

This variable holds the country codes for the participating countries. As these country codes are a mere enumneration, the codes/ values themselves do not contain ISO 3166 information. Although the country abreviations used in the value labels are closely adjusted to ISO 3166. For more information regarding this ISO standard, please see variable C_ALPHAN.

The country codes are incorporated in variable V3, Respondent Number.

C_ALPHAN - Country/ Sample Prefix ISO 3166 Code - alphanumeric

ISO 3166 Country/ Sample Prefix

This alphanumerical sample identification variable C_ALPHAN includes country codes that are based on ISO 3166.

All countries are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for Great Britain. No ISO standard codes are available for the "historical" East/ West subdivision of Germany (DE-E/ DE-W) and for the Flemish subsample of Belgium (BE-FLA), which primarily includes residents from Flanders and in addition residents from Brussels via selection on Dutch addresses. Concerning Israel, the variable 'IL_REG' can be used as a flag variable to distinguish between the Jewish and Arabic population.

This variable is used for the cross tabulations shown in the Variable Report.

V4 - Q1a Good citizen: Always vote in elections

Q.1

There are different opinions as to what it takes to be a good citizen. As far as you are concerned personally on a scale of 1 to 7,

where 1 is not at all important and 7 is very important, how important is it:

(Please tick one box on each line)

Q.1a Always to vote in elections

1   Not at all important
2   2
3   3
4   4
5   5
6   6
7   Very important
8   Can't choose, don't know
9   No answer, refused

V5 - Q1b Good citizen: Never try to evade taxes

Q.1

There are different opinions as to what it takes to be a good citizen. As far as you are concerned personally on a scale of 1 to 7,

where 1 is not at all important and 7 is very important, how important is it:

(Please tick one box on each line)

Q.1b Never to try to evade taxes

1 Not at all important

2 2

3 3

4 4

5 5

6 6

7 Very important

8 Can't choose, don't know

9 No answer, refused

V9 - Q1f Good citizen: Understand other opinions

Q.1

There are different opinions as to what it takes to be a good citizen. As far as you are concerned personally on a scale of 1 to 7,

where 1 is not at all important and 7 is very important, how important is it:

(Please tick one box on each line)

Q.1f To try to understand the reasoning of people with other opinions

1   Not at all important

2   2

3   3

4   4

5   5

6   6

7   Very important

8   Can't choose, don't know

9   No answer, refused

V11 - Q1h Good citizen: Help less privileged-ctry

Q.1

There are different opinions as to what it takes to be a good citizen. As far as you are concerned personally on a scale of 1 to 7,

where 1 is not at all important and 7 is very important, how important is it:

(Please tick one box on each line)

Q.1h To help people in (R's Country) who are worse off than yourself

1   Not at all important

2   2

3   3

4   4

5   5

6   6

7   Very important

8   Can't choose, don't know

9   No answer, refused

V17 - Q5a Pol actions: Sign a petition

Q.5

Here are some different forms of political and social action that people can take.

Please indicate, for each of one, whether: you have done any of these things in the past year; you have done it in the more distant

past; you have not done it but might do it; or have not done it and would never, under any circumstances, do it.

(Please tick one box on each line)

Q.5a Signed a petition

1   Have done it in the past year
2   Have done it in the more distant past
3   Have not done it but might do it
4   Have not done it and would never do it
8   Can't choose, don't know
9   No answer, refused

V20 - Q5d Pol actions: Attend pol meeting or rally

Q.5

Here are some different forms of political and social action that people can take.

Please indicate, for each of one, whether: you have done any of these things in the past year; you have done it in the more distant

past; you have not done it but might do it; or have not done it and would never, under any circumstances, do it.

(Please tick one box on each line)

Q.5d Attended a political meeting or rally

1   Have done it in the past year
2   Have done it in the more distant past
3   Have not done it but might do it
4   Have not done it and would never do it
8   Can't choose, don't know
9   No answer, refused

V23 - Q5g Pol actions: Contact media

Q.5

Here are some different forms of political and social action that people can take.

Please indicate, for each of one, whether: you have done any of these things in the past year; you have done it in the more distant

past; you have not done it but might do it; or have not done it and would never, under any circumstances, do it.

(Please tick one box on each line)

Q.5g Contacted or appeared in the media to express your views

1   Have done it in the past year
2   Have done it in the more distant past
3   Have not done it but might do it
4   Have not done it and would never do it
8   Can't choose, don't know
9   No answer, refused

V29 - Q6e Status of belonging: Oth voluntary assoc

Q.6

People sometimes belong to different kinds of groups or associations.

For each type of group, please indicate whether you: belong and actively participate; belong but don't actively participate; used to

belong but do not any more; or have never belonged to it.

(Please tick one box on each line)

Q.6e Another voluntary association

1   Belong actively, participate

2   Belong, don't participate

3   Used to belong

4   Never belonged

8   Can't choose, don't know

9   No answer, refused

V32 - Q7c Rights in democr: Gov equal treatment

Q.7

There are different opinions about people's rights in a democracy. On a scale of 1 to 7, where 1 is not at all important and 7 is very important, how important is it:

(Please tick one box on each line)

Q.7c ... that government authorities treat everybody equally regardless of their position in society

1   Not at all important

2   2

3   3

4   4

5   5

6   6

7   Very important

8   Can't choose, don't know

9   No answer, refused

V36 - Q8a Agree: No influence on what gov does

Q.8

To what extent do you agree or disagree with the following statements?

(Please tick one box on each line)

Q.8a People like me don't have any say about what the government does

1   Strongly agree
2   Agree
3   Neither agree nor disagree
4   Disagree
5   Strongly disagree
8   Can't choose, don't know
9   No answer, refused

in Brazil (BR):

2   Agree partly
4   Disagree partly

V40 - Q9a Unjust law: Likeliness of counter-action

Q.9a

Suppose a law were being considered by parliament that you considered to be unjust or harmful.

(Please tick one box only)

If such a case arose, how likely is it that you, acting alone or together with others, would be able to try to do something about it?

1   Very likely

2   Fairly likely

3   Not very likely

4   Not at all likely

8   Can't choose, don't know

9   No answer, refused

in Brazil (BR):

2   Likely

3   Unlikely

4   Very unlikely

in South Africa (ZA):

0   Not available

V41 - Q9b Unjust law: Likeliness serious attention

Q.9b

(IN POLAND: ONLY ASKED IF RESPONDENT ANSWERED WITH 'VERY LIKELY' AND 'FAIRLY LIKELY' (CODE 1, 2) IN V40)

Suppose a law were being considered by parliament that you considered to be unjust or harmful.

(Please tick one box only)

If you made an effort, how likely is that parliament would give serious attention to your demands?

1   Very likely

2   Fairly likely

3   Not very likely

4   Not at all likely

8   Can't choose, don't know

9   No answer, refused

in Brazil (BR):

2   Likely

3   Unlikely

4   Very unlikely

in Poland (PL):

0   NAP: Code 3-8 in V40

in South Africa (ZA):

V42 - Q10 Level of personal interest in politics

Q.10

How interested would you say you personally are in politics?

(Please tick one box only)

1   Very interested
2   Fairly interested
3   Not very interested
4   Not at all interested
8   Can't choose, don't know
9   No answer, refused

in Brazil (BR):

2   Interested

V43 - Q11a Agree: Mostly we can trust people in gov

Q.11

To what extent do you agree or disagree with the following statements?

(Please tick one box on each line)

Q.11a Most of the time we can trust people in government to do what is right.

1   Strongly agree

2   Agree

3   Neither agree nor disagree

4   Disagree

5   Strongly disagree

8   Can't choose, don't know

9   No answer, refused

in Brazil (BR):

2   Agree partly

4   Disagree partly

V53 - Q19b Pol parties - no real policy choices

Q.19

Thinking now about politics in (COUNTRY), to what extent do you agree or disagree with the following statements?

(Please tick one box on each line)

Q.19b Political parties do not give voters real policy choices

1 Strongly agree

2 Agree

3 Neither agree nor disagree

4 Disagree

5 Strongly disagree

8 Can't choose, don't know

9 No answer, refused

in Brazil (BR):

2 Agree partly

4 Disagree partly

V56 - Q21 Last nat election: level of fairness

Q.21

Thinking of the last national election in (COUNTRY), how fair was it regarding the opportunities of the candidates and parties to campaign?

(Please tick one box only)

1 Very fair
2 Somewhat fair
3 Neither fair nor unfair
4 Somewhat unfair
5 Very unfair
8 Can't choose, don't know
9 No answer, refused

in Brazil (BR):

2 Fair
4 Unfair

in Netherlands (NL):

1 Very honest
2 Somewhat honest
3 Neither honest nor dishonest
4 Somewhat dishonest
5 Very dishonest

V58 - Q23 Public service: Correcting own mistakes

Q.23

When the public service makes serious mistakes in (COUNTRY) how likely is it that they will be corrected?

(Please tick one box only)

in Switzerland (CH):

Note that in the national questionnaires two different interpretations of this question occur: In the GERMAN version the interpretation 'When the public service makes serious mistakes in Switzerland how likely is it that the public service is rebuked?', in the FRENCH and ITALIAN version the interpretation 'When the public service makes serious mistakes in Switzerland how likely is it that these mistakes will be corrected?' is asked.

in Great Britain (GB-GBN):

When the civil service makes serious mistakes in Britain how likely is it they will be corrected?

(Please tick one box only)

1 Very likely

2 Somewhat likely

3 Not very likely

4 Not at all likely

8 Can't choose, don't know

9 No answer, refused

V59 - Q24 Public service:Involvement in corruption

Q.24

How widespread do you think corruption is in the public service in (COUNTRY)?

(Please tick one box only)

in Great Britain (GB-GBN):

How widespread do you think corruption is in the civil service in Britain?

(Please tick one box only)

1   Hardly anyone is involved

2   A small number of people are involved

3   A moderate number of people are involved

4   A lot of people are involved

5   Almost everyone is involved

8   Can't choose, don't know

9   No answer, refused

in Cyprus (CY):

4   Code 4 was omitted by mistake; not used in the dataset

V61 - Q25b Democracy in (COUNTRY): 10 years ago

Q.25

On the whole, on a scale of 0 to 10, where 0 is very poorly and 10 is very well ...

(Please tick one box only)

Q.25b And what about 10 years ago? How well did democracy work in (COUNTRY) then?

0   Very poorly

1   1

2   2

3   3

4   4

5   5

6   6

7   7

8   8

9   9

10   Very well

98   Can't choose, don't know

99   No answer, refused

in CZ JP NL NZ:

1   Very poorly

Note:

CZ JP NL NZ: 10-pt-scales were used instead of 11-pt-scales

V62 - Q25c Democracy in (COUNTRY): 10 years fr now

Q.25c

On the whole, on a scale of 0 to 10, where 0 is very poorly and 10 is very well ...

(Please tick one box only)

And how about 10 years from now? How well do you think democracy will work in (COUNTRY)?

0 Very poorly

1 1

2 2

3 3

4 4

5 5

6 6

7 7

8 8

9 9

10 Very well

98 Can't choose, don't know

99 No answer, refused

in South Africa (ZA):

97 Not available

in CZ JP NL NZ:

1 Very poorly

Note:

CZ JP NL NZ: 10-pt-scales were used instead of 11-pt-scales

V68 - Q28a Meet people: respect at first encounter

Q.28

OPTIONAL QUESTION

Now we have some questions about your relations with other people. On a scale of 1 to 7, where 1 is not at all important and 7 is very important, how important is it for you personally:

(Please tick one box on each line)

Q.28a When you meet people for the first time, how important is it that you do or say something to show that you have respect for them?

1   Not at all important

2   2

3   3

4   4

5   5

6   6

7   Very important

8   Can't choose, don't know

9   No answer, refused

V69 - Q28b Meet people: tolerance of disagreement

Q.28

OPTIONAL QUESTION

Now we have some questions about your relations with other people. On a scale of 1 to 7, where 1 is not at all important and 7 is very

important, how important is it for you personally:

(Please tick one box on each line)

Q.28b When you meet people you strongly disagree with, how important is it to do or say something to show you tolerate them?

1 Not at all important

2 2

3 3

4 4

5 5

6 6

7 Very important

8 Can't choose, don't know

9 No answer, refused

V204 - R: Education I: years of schooling (EDUCYRS)

Education I: Years in school

AT: How many years from school to university education, but without vocational training?

AU: All up, how many years of education have you completed? (please include all primary and secondary school, and studies you have undertaken after high school, if your study was part-time, give the number of years of equivalent full-time study)

BE-FLA: derived and constructed from five separate source variables

CA: How many years of schooling have you completed?

CH: How many years of schooling (including training and further education; only if full-time) have you completed since your first class in primary excluding possible apprenticeship? (The category 'still at college, university' is constructed from another variable)

CL: Without counting repeated courses, how many years of formal studying do you have?

CZ: Years of (full-time) schooling including university, but not vocational training. Can you please count how many in total you have attended school? Include also years of primary school. Include only completed schools, do not include external study or evening schools.

DE: Constructed from 'general school leaving certificate', 'vocational training' and 'details of non-employment'.

DK: How many years of full-time schooling (not including trainee work etc.) do you have?

FI: How many years have you gone to school or studied alto- gether (including possible university studies, but excluding work placement)?

FR: Years in school: derived from 'How old were you when you finished your studies?' by subtracting 6 years

GB-GBN: Years in school: derived from 'How old were you when you completed your continuous full-time education?' by subtracting 5 years (school starting age)

HU: Computed from the two variables 'How many years in school have you completed?' and 'Are you still at school?'

IE: How many years of full-time education did you receive?

JP: Derived from two variables: 'How many years of education did you receive from the time you entered elementary school to the time you graduated or left your final place of education excluding higher vocational schools?' and 'Please indicate the last school you attended or the school you are currently attending'

KR: Derived from three variables: 'What is the highest level of school you have attended?', 'In what grade did you drop out?' and 'What grade are you in?'

LV: In total, how many years have you attended school (school, vocational school, university, but not including improvement of professional skills or vocational courses)?

MX: Years in formal school excl. Training for work

NO: How many years of education have you completed, other than compulsory school? Compulsory means the 9-year primary and lower secondary compulsory school, or the 7-year primary compulsory school (already computed and integrated in the present dataset)

NZ: The values for this variable were calculated from the variable asking for the amount of formal education. The responses almost certainly include some vocational training, and do not distinguish between those who are still at university/polytechnic and those who are not. The exact number of years was not asked, but estimated.

PH: How many years have you attended formal schooling, not including vocational training?

PL: Derived from PL_DEGR: What is the level of education that you have obtained until now?' and 'Are you currently in school or studying?'

PT: For how many years did you go to school, including the years you had to repeat and university studies, but not professional training courses or training internships?

RU: How many years altogether did you study, vocational training included?

SE: How many years have you attended school, all full-time education included?

SI: How many years in regular formal schooling?

TW: Derived from: Your education level is? Was your school completed?

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma? Did you ever complete one or more years of college? How many years did you complete? Do you have any college degree? What degree?

UY: How many years of education have you completed? Please do not count years in which you had repeated courses.

ZA: Not explicitly asked. Derived from: What is the highest level of education you have ever completed?

1   1 years

40   40 years

95   Still at school

96   Still at college, university

97   No formal schooling

98   Don't know

99   No answer, refused

in Switzerland (CH):

97   Not used

in Finland (FI):

95   Still at school, no formal education

in Japan (JP):

95   Still at high school

in Mexico (MX):

95   Still at school of basic or medium level

in Philippines (PH):

95   Still in elementary or high school

in Venezuela (VE):

0   Not available

in South Africa (ZA):

97   No schooling

V205 - R: Education II-highest education level (DEGREE)

Education II: Categories

AT: What is your highest achieved level of education?

AU: What is the level of high school education you have completed? What is the highest level you have completed since leaving school?

BE-FLA: 'If still in school, what kind of education do you follow?' and 'What is the highest degree you completed?'

BG: Highest education level

BR: What is respondent's degree of education?

CA: How far did you go in school?

CH: What is your highest education completed?

CL: Without counting repeated courses, what is your level of education?

CZ: What is your highest achieved level of education?

DE: What general school leaving certificate do you have? Please request highest school certificate. What vocational or professional training do you have?

DK: What school education do you have? What business training or higher education do you have beyond school education?

ES: Highest level of education (finished or unfinished)

FR: Which level of general education have you achieved?

GB-GBN: 'Have you passed any of the examinations on this card?' and 'And have you passed any of the exams or got any qualifications on this (other) card?' Highest educational qualification

IL: Highest qualification

IE: What is the highest level of education that you attained?

JP: Please indicate the last school you attended or the school you are currently attending.

KR: What is the highest level of school you have attended?

MX: Highest completed school level obtained; not asked directly but derived from MX_DEGR

NL: Computed from two variables: 'What is your highest completed educational qualification?' and 'At what stage of education are you at the moment?'

NO: What kind of general education, what kind of vocational education/training, what kind of tertiary education have you achieved? (Note: compulsory school was 7 years until about mid 1960's; 9 years of compulsory school was introduced during the 1960's, but at different times in different parts of the country)

NZ: Which one of these categories best describes your highest level of education/formal qualification?

PH: What is your highest educational attainment?

PL: What is the level of education that you have obtained until now?

PT: Which level of education did you complete?

RU: What education do you have?

SE: What is your highest level of education until now?

SI: Name last school you have finished, regularly or unregularly.

TW: Derived from: 'Your educational level is…?' and 'Was your school work completed?'

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma? Did you ever complete one or more years of college? How many years did you complete? Do you have any college degree? What degree?

UY: What is the highest level of education you have achieved? Don't count years in which you had to repeat courses

ZA: What is highest level of education you have ever completed

0   No formal qualification, none, still at school

1   Lowest formal qualification attainable

2   Qualifications which are above the lowest qualification, but below the usual entry requirement for universities (intermediary secondary completed)

3   (Usual) Entry requirement for universities (higher secondary completed; the German Abitur, the French Bac, English A-level, etc.)

4   Qualifications which are above the higher secondary level, but below a full university degree; other education

5   University degree completed

8   Don't know

9   No answer

in Brazil (BR):

5   University degree completed incl. Master, PhD

in Switzerland (CH):

0   incomplete compulsory education

in Great Britain (GB-GBN):

0   no secondary qualifications

in Uruguay (UY):

0   incl. incomplete primary school

3   (Usual) Entry requirement for universities incl. technical education completed

in CL CY CZ ES FR HU IE LV MX SI:

0   incl. incomplete primary school

V244 - R: Current employment status (WRKST)

Respondent: Current employment status - current economic position, main source of living

AU: Constructed from the two variables 'In your main job for which you are paid, do you normally work...?' and 'Which of the following best describes what you were doing last week?'

BE-FLA KR: Information derived and integrated from various questions

DE: Derived from 'current employment status' and 'occupational status'

GB-GBN: Constructed from three variables: 'Which of these descriptions applied to what you are doing last week, that is seven days ending last Sunday?'; 'In your present job, are you working full-time or part-time?' and 'In the 7 days ending last Sunday did you have any paid work of less than 10 hours a week?'

NO: Are you/have you ever been in paid work? If yes, in your main job you are/were…? Do you regard yourself mainly as…?

1   Full-time employed, main job

2   Part-time employed, main job

3   Less than part-time

4   Helping family member

5   Unemployed

6   Student, at school, in education, vocational training, in government active labour market programmes

7   Retired

8   Housewife (-man), home duties

9   Permanently disabled, sick

10   Other, not in labour force, not working

97   Refused

98   Don't know

99   No answer

in Austria (AT):

2   Half-time

3   Less than half-time

in Australia (AU):

1   Self-employed and employed, full time

3   A few hours a week

5   Unemployed, looking for work

6   Full-time school or university student

in Belgium/ Flanders (BE-FLA):

3   Less than part-time, temporarily out of work because of illness, maternity/parental leave or education leave or career break

5   Unemployed, looking for a job, seeking first job

in Bulgaria (BG):

7   Incl. working pensioner

in Brazil (BR):

1   Entrepreneur, self-employed, freelancers, public authority, full-time employed: 44 hours or more

2   15-44 hours

3   Less than 15 hours

4   Helping family member unpaid

5   Unemployed for 12 months/for more than 12 months, R has searched for work in the last 12 months; R has search for first

employment

7   Excl. working pensioner

in Canada (CA):

1   35 hours and more

2   15-35 hours

in Switzerland (CH):

1   Including seasonal work

3   Casual work

4   Employed in the firm of a relative

10   Army/civil/alternative community service, other

in Chile (CL):

2   Half-time

3   Less than part-time and work occasionally

5   Unemployed, looking for work, looking for first employment

in Cyprus (CY):

1   35 hours and more

2   15-34 hours

3   Less than 15 hours

in Czech Republic (CZ):

1   Full-time employed, self-employed, freelance, 35 hours and more

2   Half-time or more, self-employed, freelance, 15-34 hours

3   Less than half-time, self-employed, freelance, less than 15 hours

7   Incl. working pensioner

8   Incl. on maternity leave

in Germany (DE):

9   Not used in the national dataset

10   Army/civil/alternative community service, other

in Denmark (DK):

1   Full-time employed and self-employed, 30 hours and more

2   Part-time employed and self-employed, 10-29 hours

3   Less than part-time (<10hrs), temporarily out of work because of illness, maternity/parental leave or education leave or career

break

7   Job release scheme etc. (pension benefits between early retirement and normal retirement), old age retirement

9   Early retirement

in Finland (FI):

1   35 hours and more

2   15-34 hours

3   Less than 15 hours

7   Retirement based on old age or years of service, retirement based on other reasons

10   Army/non-military service, on parental leave

in France (FR):

1   35 hours and more

2   15-35 hours

3   Less than 15 hours

in Great Britain (GB-GBN):

1   30 hours or more

2   10-29 hours, main job

3   Less than 10 hours

4   Not used in the national dataset

5   Unemployed, registered and not registered at a Job Centre, looking actively for a job, wanting a job

6   In full-time education, on government training/employment programme

10   Waiting to take up paid work already accepted, other

in Hungary (HU):

3   Less than part-time, temporary/seasonal work

8   Incl. on maternity leave

in Ireland (IE):

1   30 hours or more

2   10-29 hours, main job

3   Less than 10 hours

4   At work as relative assisting

5   Unemployed, looking fo ra job, seeking first job

in Japan (JP):

1   Operate own business, working for a private organisation, serving in government: 35 hours and more

2   Operate own business, working for a private organisation, serving in government: 15-34 hours

3   Operate own business, working for a private organisation, serving in government: less than 15 hours

in South Korea (KR):

3   Not used in the national dataset

4   Helping family member unpaid

5   Incl. temporarily not working and preparing for beginning work

7   Old age pensioner or early retirement

8   Staying at home

in Latvia (LV):

1   40 hours or more

2   15-39 hours

3   < 15 hrs, temporarily out of work

4   Helping family member (in business, paid)

in Mexico (MX):

3   < 15 hrs, temporarily out of work

4   Helping family member unpaid

in Netherlands (NL):

2   12-32 hours

3   Less than 12 hours

in New Zealand (NZ):

1   More than 35 hours

2   15-35 hours

3   < 15 hrs, temporarily out of work

10   Not used in the national dataset

in Norway (NO):

1   30 hours or more

2   15-29 hours

3   Less than 15 hours

4   Helping family member (in business, paid)

7   Old age pensioner or early retirement

8   Incl. taking care of others

9   Social security, welfare

in Philippines (PH):

1   40 hours or more

2   10-39 hours

3   Less than 10 hours

4   Helping family member unpaid

in Poland (PL):

1   Incl. farmers and persons working on their own business; incl. working pensioners, students and people with disabilities; more than

35 hours

2   Incl. working pensioners and students, 15-35 hours

3   Seasonal or commission work, odd jobs; maternity/parental leave; less than 15 hours

4   Not used in the national dataset

5   Unemployed, looking for work

6   In school, university, not working full/part-time

7   Excl. working pensioner, but incl. persons with disabilities

9   Not used in the national dataset

in Portugal (PT):

3   Less than 15 hours

4   Helping family member unpaid

7   Old age pensioner or early retirement

in Russia (RU):

1   More than 35 hours

2   15-35 hours

3   Less than 15 hrs, casual work

in Sweden (SE):

1   More than 35 hours

2   15-35 hours

3   Less than 15 hours

in Slovenia (SI):

1   35 hours and more

2   15-34 hours

3   < 15 hrs, temporarily out of work

5   Unemployed with or without financial support

7   Retired with or without additional employment

in Taiwan (TW):

3   Non-routine work, temporarily unemployed

4   Self-employed

in United States of America (US):

1   More than 35 hours

2   35 hours or less

3   Not used in the national dataset

4   Not used in the national dataset

in Uruguay (UY):

1   30 hours or more

2   Less than 30 hours

3   Less than part-time and work occasionally

5   Unemployed, looking fo ra job, seeking first job

in Venezuela (VE):

1   More than 35 hours

2   15-35 hours

3   < 15 hrs, temporarily out of work

in South Africa (ZA):

1   Self-employed and employed, full time

2   Self-employed and employed, part-time

3   Temporarily sick

4   Not used in the national dataset

5   Unemployed, looking and not looking for work

8   Housewife (man) not working or looking for work

V246 - R: Occupation ILO,ISCO 1988 4-digit (ISCO88)

Respondent's Occupation: ILO/ISCO - International Code 1988

AT AU BG CH CL CY CZ DE DK ES FI FR GB-GBN HU IE IL KR LV MX NL NO PH PL PT SE SK SI TW US UY: Current or previous main occupation - ILO/ISCO 1988

AU: What kind of work do/did you do in your main job? Coded according to the Australian Standard Classification of Occupations ASCO, 1997. A concordance was created between ASCO and ISCO 1988.

BE-FLA: Current or previous main occupation - ILO/ISCO 1988; Current and previous Flemish Classification of the Occupations (NIS) is used and mapped to ILO/ISCO88 (3-digit)

BR JP NZ RU: Current main job - ILO/ISCO 1988

VE ZA: Current job - ILO/ISCO 1988 main occupation groups (1-digit)

CA: If you work, what is your occupation? In not working NOW, please tell us about your last job.

CZ: What is/was your occupation or working status in your main job? What work do/did you do? Czech national occupation codes have been recoded to Standard ISCO88.

FR: Current and previous French Classification of the Occupations (INSEE) and the socioprofessional categories (PCS 1994) are used and mapped to ILO/ISCO 1988

GB-GBN: Now I want to ask you about your present/last/future job. The British Standard Occupational Classification 2000 (SOC) was translated and mapped to ISCO88-COM

HU: What is (was) your (last) occupation? Based on the 4-digit Hungarian Classification FEOR, converted into ISCO88 by a standard recode programme.

IE: What is/was your occupation? ILO Occupation Codes based on ISCO88-COM

JP: Please give details about the main type of work you are engaged in.

NO: What is/was your work title. Please make a short description of your tasks. Norwegian Standard Classifications of Occupations (STYRK) based on ISCO88-COM are recoded according a correspondence syntax into ILO/ISCO88.

PH: ILO/ISCO88 (3-digit) is matched to ISCO88 (4-digit)

US: What kind of work do/did you normally do? What do/did you actually do in that job? ILO/ISCO 1988 based on the 1980 Census Occupational Codes

UY: What kind of work do/did you do in the job where you get your highest income?

0   NAP: not in labour force, never had a job, never been in paid work, not in paid work

9996   Not classifiable; inadequately described

9997   Refused

in Sweden (SE):

9999   No answer, inadequately described

Note:

See Note C. in the Appendix of the Variable Report 199.

V247 - R: Workg f priv.,pub sector, selfempl. (WRKTYPE)

Private versus public sector or self-employed: (If R is employee in current/previous job) Do you work at present or did you work in your last job in the private or public sector?

BE-FLA: Do/did you work for the government or in the private sector?

BR: What is the sector you are working in?

CA: Is your job in the private or public sector? In your (main) job are/were you an employee or self-employed?

CZ: Two original variables were used for coding: 'R work/ worked in' and 'current economic status'

DE: Constructed from 'current and former occupational status', 'employment status' and 'employment in public sector'.

DK: Are/were you in public or private employment or selfemployed?

GB-GBN: (If R is/was employee in current/previous job) Which of the types of organisation on this card do you/will you be working/did you work for?

FI: Is/was your employer the state, a municipality, a state-owned enterprise or a private enterprise?

JP: Derived from two variables 'Current employment status' and 'Number of employees'

KR: Are/were you employed by the government, a publicly owned firm, a private firm, or a non-profit organisation?

LV: Do you work in public or private sector? For not working respondents, please tell about your recent occupation

NO: Is the firm/organisation you work/worked for ..?

NL: Which type of organisation do you work for at the moment or which type of organisation did you work for in your last occupation?

NZ: Which of these categories best describes who you work for (or who you worked for most recently)?

PL: What is/was the form of ownership of this place of work?

PT: What sector do/did you work in?

TW: Are/were you a boss or an employee? Do/did you work for a private employer or a government organisation?

US: Are/were you employed by the federal state, or local government or by a private employer? Are/were you selfemployed or do/did you work for someone else?

UY: Please choose one of the following options, depending on if you work/worked in the public or private sector.

0   NAP (unemployed, not in labour force, never had a job, not in paid work, not working)

1   Works for government or public sector

2   Works for publicly owned firm or enterprise

3   Works for private firm or sector

4   Self-employed

9   No answer, don't know, can't choose, refused

in Austria (AT):

0   Never had a job

2   Not used

in Australia (AU):

0   Never had a job

1   Federal/state/local government, a government owned business

2   Not used

3   Private enterprise or company, family business or farm, non-government organisation incl. charities

in Belgium/ Flanders (BE-FLA):

0 Never had a job

4 Derived from another source Variable: incl. farmer

in Bulgaria (BG):

0 Currently not in labour force

2 Including co-operatives

in Brazil (BR):

0 Currently not in labour force

1 Incl. federal public administration, state and local authorities

4 Incl. freelancer

6 Charity/ voluntary sector, churches etc., others

in Switzerland (CH):

0 Never had a job

1 Incl. federal, regional and local authorities, railway (SBB), post etc.

2 Not used

in Czech Republic (CZ):

0 Never had a job

1 Governmental organisation, civil service (army, police, ministry etc.), local communities

2 State company, public institution (school, hospital)

3 Large joint-stock company, limited company, co-partnership, co-operative (even with state participation), incl. foundation and non-profit organisation

4 Derived from another source Variable

in Germany - East (DE-E):

0 Never had a job

4 Derived from another source Variable: Incl. independent professionals, farmer on a collective farm

in Germany - West (DE-W):

0 Never had a job

4 Derived from another source Variable: Incl. independent professionals, farmer

in Denmark (DK):

0 Never had a job

1 Works for State, central or local public administration, municipality, police

3 Work for private enterprise, incl. assisting spouse

in Finland (FI):

0 Never had a job

1 Works for State, central or local public administration, municipality, police

3 Private enterprise, other employer

4 Derived from another source Variable

in France (FR):

0 Currently not in labour force

1   Governmental organisation, civil service (army, police, ministry etc.), local communities

2   Nationalised organisations, public company

in Great Britain (GB-GBN):

0   Never had a job

1   Local/central government, universities, health authorities, police, civil service, armed forces, NHS Trusts

2   Nationalised industryor public corporation (incl. the Post Office and the BBC)

3   Including, i.e. limitedcompanies and PLCs

4   Derived from another source Variable

6   Charity/ voluntary sector, churches etc., others

in Hungary (HU):

0   Never had a job

4   Self-employed, free professionals, farmer

in Ireland (IE):

0   Never had a job

1   Civil service, health sector, education, defense forces

2   Commercial and non-commercial semi-states

3   Other private companies

in Japan (JP):

0   Currently not in labour force

2   Not used

in South Korea (KR):

0   Never had a job

3   Including non-profit organisations

in Latvia (LV):

0   Never had a job

1   In a budget institution

2   A state or self-government institution/enterprise, (incl. cooperatives, joint ventures and unprofitable organisations not financed by

the state)

4   Self-employed or employer in a private enterprise

in New Zealand (NZ):

0   Not working

2   Publicly-owned private sector organisation

3   Privately-owned private sector organisation, incl. non-profit/charity/welfare organisations

in Norway (NO):

0   Never been in paid work

1   Local, central government

2   Other public or semi-public organisation

3   Private firm, organisation, trust

4   Derived from another source Variable

in Poland (PL):

0   Never had a job

1   State enterprise, state treasury company, budgetary unit

2   Communal enterprise, cooperative, ownership social organisation (foundation, religious/political org.)

3   Incl. foreign enterprise, joint-stock company, limited liability company, civil partnership

4   Incl. freelancer, incl. farmer

in Portugal (PT):

0   Never had a job

1   Works for State, central or local public administration, municipality, police

2   Nationalised organisations, public company

in Sweden (SE):

0   Never had a job

2   Public owned, combined public and private

in Slovenia (SI):

0   Never had a job

1   Works for State, central or local public administration, municipality, police

2   Public establishment (health, education), public enterprise (electricity, traffic), publicly owned firm, agricultural cooperative

4   Including farmer

in United States of America (US):

0   Never had a job

2   Not used

3   Incl. non-profit, welfare organisations

in Uruguay (UY):

0   Never had a job

1   Incl. federal public administration, state and local authorities

2   Government owned business (e.g. antel)

in South Africa (ZA):

0   Not available

in CY CL ES MX NL PH SK TW:

V251 - S-P: Current employment status (SPWRKST)

Spouse/partner: Current employment status

What is the current economic status, main source of living of your spouse/partner?

AU: Which of the following best describes what your partner was doing last week?

BE-FLA KR: Information derived and integrated from various questions

DE: Derived from 'partner's current employment status' and 'partner's occupational status'

JP: Is your spouse in continuous, gainful employment?

NO: What is your spouse/partners main activity, or source of income?

PT: What is the professional situation of your spouse/partner?

UY: Thinking about your spouse or partner, please choose one of the following options, based on whether he/she works or not

0   NAP (not married; no spouse/partner)

1   Full-time employed, main job

2   Part-time employed, main job

3   Less than part-time

4   Helping family member

5   Unemployed

6   Student, at school, in education, vocational training

7   Retired

8   Home duties, housewife (-man)

9   Permanently disabled, sick

10   Others, not in labour force, not working

97   Refused

98   Don't know

99   No answer

in Australia (AU):

3   Working a few hours a week

4   Helping family member

5   Unemployed, looking for work

in Belgium/ Flanders (BE-FLA):

3   Less than part-time (DK: <10 hrs), temporarily out of work because of illness, maternity/parental leave or education leave or career

break

4   Working in a family company

5   Unemployed, looking for a job, seeking first job

in Canada (CA):

1   35 hours and more

2   15 - 35 hours

4   Helping family member

in Switzerland (CH):

1   Including seasonal work

3 Casual work

4 At work as a relative assisting

10 Army/alternative community service, other

in Chile (CL):

3 Less than part-time and work occasionally

in Cyprus (CY):

1 35 hours and more

2 15 - 34 hours

3 Less than 15 hours

in Czech Republic (CZ):

1 Including self-employed and freelancers

7 Working pensioner and retired pensioner

8 Incl. maternity benefit

in Germany (DE):

9 Not used in the national dataset

10 Army/alternative community service, other

in Denmark (DK):

1 Full-time employed and self-employed, 30 hours +

2 Part-time employed and self-employed, 10-29 hours

3 Less than part-time (DK: <10 hrs), temporarily out of work because of illness, maternity/parental leave or education leave or career break

7 Job release scheme etc. (pension benefits between early retirement and normal retirement), old age retirement

9 Early retirement

in Finland (FI):

1 35 hours and more

2 15 - 34 hours

3 Less than 15 hours

7 Retired by age, working years or by other reasons

9 Not used in the national dataset

10 Army/non-military service, on parental leave

in France (FR):

1 35 hours and more

2 15 - 35 hours

3 Less than 15 hours

in Great Britain (GB-GBN):

3 Not used in the national dataset. (Partners working less than 10 hours per week are coded as not working)

4 Not used in the national dataset

5 Unemployed, registered and not registered, looking for a job, wanting a job

6 In full-time education, on government training scheme, on employment programme

10   Waiting to take up paid work already accepted, other

in Ireland (IE):

1   30 hours and more

2   10 - 29 hours, main job

3   Less than 10 hours

4   At work as a relative assisting

5   Unemployed, looking for a job, seeking first job

in Japan (JP):

1   35 hours or more; incl. operating own business, working for government/public service or working for a private organisation

2   15 - 34 hours; incl. operating own business, working for government/public service or working for a private organisation

3   Less than 15 hours; incl. operating own business, working for government/public service or working for a private organisation

4   Helping with the family business

in South Korea (KR):

3   Not used in the national dataset

7   Old age pensioner or early retirement

8   Staying at home

in Latvia (LV):

1   40 hours and more

2   15 - 39 hours

3   Less than 15 hours, temporarily out of work

4   Working in a family company

in Netherlands (NL):

2   12 - 32 hours

3   Less than 12 hours

in New Zealand (NZ):

1   More than 35 hours

2   15 - 35 hours

3   Less than 15 hours, temporarily out of work

10   Not used in the national dataset

in Norway (NO):

2   Part-time and less than part-time

3   Not used in the national dataset

4   Not used in the national dataset

7   Old age pensioner or early retirement

9   On social security, disabled

in Philippines (PH):

1   40 hours and more

2   10 - 39 hours

3   Less than 10 hours

4   Helping a family member (unpaid)

in Poland (PL):

1   More than 35 hours, incl. farmers and persons working on their own business, also incl. working students and working

pensioners

2   16-36 hours, incl. working students/pensioners

3   15 hours or less, seasonal or commission work, incl. maternity/parental leave

4   Not used in the national dataset

5   Unemployed, looking for work

6   Student, at school and not working full/part time

7   Excl. working pensioners, but incl. persons with disabilities

9   Not used in the national dataset

in Portugal (PT):

3   Less than 15 hours

4   Non-paid family worker

7   Old age pensioner or early retirement

in Russia (RU):

1   More than 35 hours

2   15 - 35 hours

3   Less than 15 hours

in Sweden (SE):

1   More than 35 hours

2   15 - 35 hours

3   Less than 15 hours

in Slovenia (SI):

1   35 hours and more

2   15 - 34 hours

3   Less than 15 hours, temporarily out of work

5   Unemployed with and without financial support

7   Retired with and without additional employment

in United States of America (US):

1   More than 35 hours

2   35 hours or less

3   Not used in the national dataset

4   Not used in the national dataset

in Uruguay (UY):

1   30 hours and more

2   Less than 30 hours

3   Less than part-time and work occasionally

4   Helping family member

5   Unemployed, looking for a job, seeking first job

in South Africa (ZA):

1   Self-employed and employed, full-time

2   Self-employed and employed, part-time

3   Temporarily sick

4   Not used in the national dataset

5   Unemployed, looking and not looking for a job

8   Housewife (man) not working or looking for work

in BR VE:

V252 - S-P: Occupation ILO,ISCO 1988 4-digit (SPISCO88)

Spouse Occupation: ILO/ISCO - International Code 1988

AT AU BE-FLA BG CA CH CL CY CZ DK ES FI FR HU IE IL KR LV MX NL NO NZ PH PL PT SE SK SI TW US UY: Present or last occupation - ILO/ISCO 1988

AU: What kind of work does/did your partner do in the main job? Coded according to the Australian Standard Classification of Occupations ASCO, 1997. A concordance was created between ASCO and ISCO 1988.

BR DE GB-GBN RU: Current main job - ISCO 1988

CA: If spouse/partner is working, what is her/his occupation? If spouse/partner is not working NOW, please tell us about her/his last job.

CZ: What is/was the occupation of your spouse/partner in her/his main job? What job does/did she/he do?

FR: Current and previous French Classifications of the Occupations (INSEE) and the socioprofessionnel categories (PCS 1994) are used and mapped to ILO/ISCO 1988

GB-GBN: SPISCO88 is derived from the Standard Occupational Classification 2000 (SOC) using the translation table to ISCO88-COM

HU: What is (was) her/his (last) occupation? Based on the 4-digit Hungarian Classification FEOR, converted into ISCO88 by a standard recode programme

NO: What is/was your work title. Please make a short description of your tasks. Norwegian Standard Classifications of Occupations (STYRK) based on ISCO88-COM are recoded according a correspondence syntax into ILO/ISCO88.

PH: ILO/ISCO88 (3-digit) is matched to ISCO88 (4-digit)

US: What kind of work does/did your spouse normally do? What does/did your spouse actually do in that job? ILO/ISCO 1988 based on the 1980 Census Occupational Codes

UY: What kind of work does/did he/she do in the job where he/she gets/got his/her highest income?

VE: Current job - ILO/ISCO 1988 main occupation groups

V253 - S-P:Workg f priv,pub sector,self-empl. (SPWRKTYP)

Spouse/partner: private versus public sector or self-employed (If spouse/partner works dependent) Does she/he work in the public sector at present or has she/he ever worked in the public sector before? In her/his main job, is (was) she/he an employee or self-employed?

BE-FLA: Do/did your partner work for the government or in the private sector?

CH: Due to an error in the programming of the questionnaire, type of work for the partner has only been asked for current job and not for a past job (if partner has no current job).

DE: Constructed from 'partner's current occupational status', 'partner's employment status/'employment in public sector'.

FI: Is/was the employer of your spouse the state, a municipality, a state-owned enterprise or a private enterprise?

GB-GBN: Which of the types of organisation on this card does he/she work? (current job)

NO: In which firm/organisation does your spouse/partner work?

NL: Which type of organisation does your spouse/partner work for or did work for in her/his last occupation?

TW: What is/was your spouse's/partner's occupation? Is/was she/he self-employed or employed?

UY: Please choose one of the following options, depending on if your husband/wife or partner works/worked in the public or private sector.

0   NAP (unemployed, not in labour force, never had a job, not in paid work, not working, no spouse/partner)

1   Works for government or public sector

2   Works for publicly owned firm

3   Works for private firm or sector

4   Self-employed

9   No answer, don't know, can't choose, refused

in Austria (AT):

0   No spouse/partner, spouse never had a job

2   Not used in the national dataset

in Australia (AU):

0   No spouse/partner

1   Federal/state/local government, a government owned business

2   Not used in the national dataset

3   Private enterprise or company, family business or farm, non-government organisation incl. charities

in Belgium/ Flanders (BE-FLA):

0   No spouse/partner, spouse never had a job

2   Not used in the national dataset

4   Incl. farmer, free profession, entrepreneur and wholesalers

in Switzerland (CH):

0   No spouse/partner, not in labour force

1   Including federal, regional and local authority, railway (SBB), post etc.

2   Not used in the national dataset

in Czech Republic (CZ):

0   No spouse/partner

1   Governmental organisation, civil service (army, police, ministry etc.), local council

2   State company, public institution (school hospital)

3   Large joint-stock company, limited company, co-partnership, co-operative (even with state participation), incl. foundation and non-profit organisation

4   Including freelance, derived from SPWRKST

in Germany - East (DE-E):

0   No spouse/partner, not in labour force

4   Incl. independent professionals, freelancing, farmer on a collective farm

in Germany - West (DE-W):

0   No spouse/partner, not in labour force

4   Incl. independent professionals, freelancing, farmer

in Denmark (DK):

0   No spouse/partner, spouse never had a job

1   Works for State, central or local public administration, municipality, police

3   Work for private firm, incl. assisting spouse

in Spain (ES):

0   No spouse/partner, spouse never had a job

3   Including non-profit organisations, welfare

in Finland (FI):

0   No spouse/partner, spouse never had a job

1   No spouse/partner, spouse never had a job

3   Private enterprise, other employer (incl.self-empl)

4   Not possible to separate self-employed spouses, thus those are coded into code 3

in France (FR):

0   No spouse/partner, spouse never had a job

1   Code 1 includes both: working for government AND working for a publicly owned enterprise

in Great Britain (GB-GBN):

0   No spouse/partner, not in labour force

1   Central/local government, universities, health authority, civil service, police, armed forces etc.

2   Nationalised industry or public corporation (incl. the Post Office and the BBC)

3   Including, e.g., limited companies and PLCs

6   Non-profit organisations, welfare organisations, voluntary/charity sector, trade union, other

in Hungary (HU):

0   No spouse/partner, spouse never had a job

4   Incl. independent professionals, freelancing, farmer

in Ireland (IE):

0   No spouse/partner, spouse never had a job

1   Civil service, health sector, education, defence forces

2   Commercial and non-commercial semi-states

3   Other private companies

in Japan (JP):

0   No spouse/partner, not in labour force

2   Not used in the national dataset

4   Spouse is operating own business, spouse is helping with family business

in South Korea (KR):

3   Including non-profit organisations, welfare

in Latvia (LV):

0   No spouse/partner, spouse never had a job

1   Incl. budget institutions (educational, medical, self-government, public administration, state agency or government-funded civic
organisation)

2   State or self-government organisation (incl. state-shared and non-profit organisations, cooperatives and joint-ventures)

in Norway (NO):

0   No spouse/partner

1   Public administration or services

in Poland (PL):

0   No spouse/partner, spouse never had a job

1   Incl. budgetary units and state enterprises (which are including one-person state treasury companies and joint-stock companies in
which the capital share of the state or state-like company exceeds 50% of the whole capital of the company)

2   Incl. cooperatives (production trade or service), communal enterprises and ownership social organisations (i.e. foundations,
religious/political organisations)

3   Incl. limited liabilities companies and civil partnerships

4   Incl. independent professionals, freelancing, farmer on a private farm

in Portugal (PT):

0   No spouse/partner, spouse never had a job

1   Works for State, central or local public administration, municipality, police

in Slovenia (SI):

0   No spouse/partner, spouse never had a job

1   Works for State, central or local public administration, municipality, police

2   Incl. public establishment (health, education), public enterprise (electrician, traffic), agricultural cooperative

in Taiwan (TW):

0   No spouse/partner, spouse never had a job

2   State-owned enterprise

in Uruguay (UY):

0   No spouse/partner, spouse never had a job

1   Federal/state/local government, a government owned business

in Venezuela (VE):

0   No spouse/partner, not in labour force

in CL CY KR MX NL PH SE SK:

V254 - R: Earnings (RINC)

Respondent's earnings

AT: Personal monthly net income after taxes in EUR (midpoints)

AU: What is your annual gross income before tax or other deductions from all sources? (midpoints in Aus. Dollar)

BE-FLA: How much is your personal monthly net income, everything included like salary, retirement pay and other income? (amount in EUR, rounded). In which category do you place your net monthly income? (midpoints of the classes)

BG: Personal monthly net income in Bulgarian Leva (BGN)

BR: R's monthly earnings in Brazilian Reais (BRL)

CA: And what was your own total personal income from all sources in 2003 before taxes in CAD? (midpoints)

CH: May I ask you what is your personal monthly income, that is the amount that is left after deduction of the socialinsurance (AHV etc.) but before deduction of the taxes?In Swiss Francs (CHF). Income information was combined from a divided source variable: the first part of the question asks for income in a direct form and the second (only asked if R is not willing to respond) asks if R would at least be willing to give an approximate indication of the income.

CL: R's monthly net income in Chilean Pesos/CLP (midpoints)

CY: R's monthly income in CY pounds (midpoints of the classes)

CZ: What is your personal average net income per month in total? It includes incomes from main job or business from additional money providing activities or property and average social incomes as unemployment benefits maternal benefits, allowances, etc, not including childallowances and state compensatory benefits for children.(midpoints of the categories/classes, in Czech Korunas)

DE: How high is your own monthly net income after deductions of tax and social security contributions in EUR? For self-employed ask for average net monthly income. If answer refused please ask for alphabet letter (additional list inquiry question with income categories - midpoints).

DK: What is your total annual gross income before taxes?Annual income before deduction in Dkr (midpoints)

ES: R's monthly net earnings in EUR (midpoints)

FI: What is your own average monthly income before tax in EUR?

FR: By means of the list below, can you say to me what is the amount of your professional monthly income in EUR?

GB-GBN: Which of the letters on this card represents your own gross or total earnings, before deduction of income tax and national insurance? (annual income in GBP - midpoints)

HU: Net income per month in Hungarian Forint (HUF)

IE: Which group does your own gross income fall into, before taxes and other deductions per year in EUR? (midpoints)

IL: Net income per month in New Israeli Shekel (midpoints NIS)

JP: What amount of income did you earn last year, inclusive of tax, casual and part-time income? (midpoints in thous. Yen)

KR: Before taxes and other deductions, what is your total monthly average income from this job including bonuses and other allowances in Korean won (midpoints in thous.)

LV: What were your personal earnings after deductions last month including all incomes - salaries, stipends, benefits, pensions, rent for your ownership etc. in Lats?

MX: R's monthly net income after taxes in Mexican Pesos

NL: What is your average monthly net income after deductions social insurance and retirement premium in EUR?(midpoints of the classes)

NO: About how large is your own yearly gross income before taxes and allowances including pensions, social security benefits etc. in Norwegian Kroner.

NZ: Which of the following categories best describes your own yearly income from all sources before tax in NZ$?(midpoint values of the categories)

PH: About how much is your own monthly income in Pesos (PHP)?

PL: Taking into consideration the last 12 months, please tell me what was your average monthly income/earnings from your job or business after taxes in Polish Zlotys (PLN)?

PT: Which of the following options correspond to your individual income? (average monthly net income in EUR midpoints)

RU: What was your total income last month from all sources in New Russian Roubles? (midpoints in RUR)

SE: What is your approximate income per month before taxes in Swedish Krones (SEK)?

SI: What was your last regular monthly income after taxes and social security payments from all sources in Slovenian Tolars (SIT)?

SK: R's monthly net income in Slovak Koruna (SKK)

TW: What is your average monthly work income including bonus overtime compensation in New Taiwan Dollars (midpoints)?

US: Did you earn any income from the job you worked in 2003?R's earnings from all jobs in 2003 before taxes or other deductions in US$ (midpoints).

UY: Looking at the card, could you please tell me the number that corresponds to your gross monthly income, after tax or other deductions from all sources? Please include any pensions and allowances, and income from interests or dividends, as well as help from family and friends, rents and others (midpoints of the classes in Pesos).

ZA: Please give me the letter that best describes your total monthly income before tax and other deductions. Please indicate all sources of income (midpoints in Rand).

US (in US Dollar): under 1.000 (500); 1.000 – 2.999 (2000); 3.000 – 3.999 (3500); 4.000 – 4.999 (4500); 5.000 – 5.999 (5500); 6.000 – 6.999 (6500); 7.000 – 7.999 (7500); 8.000 – 9.999 (9000); 10.000 – 12.499 (11250); 12.500 – 14.999 (13750); 15.000 – 17.499 (16250); 17.500 – 19.999 (18750); 20.000 – 22.499 (21250); 22.500 – 24.999 (23750); 25.000 – 29.999 (27500); 30.000 – 34.999 (32500); 35.000 – 39.999 (37500); 40.000 – 49.999 (45000); 50.000 – 59.999 (55000); 60.000 – 74.999 (67500); 75.000 – 89.999 (82500); 90.000 – 109.999 (100000); 110.000 – over (999996)

UY (in UYU): 3.000 or less (2000); 3.000 – 5.999 (4500); 6.000 – 7.499 (6750); 7.500 – 9.499 (8000); 9.500 – 11.499 (10500); 11.500 – 13.499 (12500); 13.500 – 16.499 (15000); 16.500 – 20.499 (18500); 20.500 – 26.499 (23500); 26.500 – 38.999 (32750); 39.000 – more (45250)

ZA (in Rand): 1 – 500 (250); 501 – 750 (625); 751 – 1.000 (875); 1.001 – 1.500 (1250); 1.501 – 2.000 (1750); 2.001 – 3.000 (2500); 3.001 – 5.000 (4000); 5.001 – 7.500 (6250); 7.501 – 10.000 (8750); 10.001 – 15.000 (12500); 15.001 – 20.000 (17500); 20.001 – 30.000 (25000); 30.000 – more (35000)

V256 - How many persons in household (HOMPOP)

Size of household: Total number of persons living in household

AU AT CA CH DK JP NO NZ SE SI TW: How many persons live altogether in your house (household), including yourself?

BE-FLA: How many people aged 18 or older are part of your household, including yourself? How many people aged 6 to 17? How many people aged 5 or younger?

BR: How many persons live in your house? (incl. respondent, but excluding maids and servants); (NOTE that only persons aged 18 years and older are asked)

CZ: How many members including yourself are there in your household? As household we understand individuals residing in one appartment or family house, who together financially manage the household.

DE: Apart from yourself, are there other people living in your household? Please count toddlers or people who normally live there, but are currently absent, e.g. in hospital/on holiday.

ES: How many persons live in your household, incl. respondent, maids and domestic helpers?

FR: Age and sex of every person of the household (constructed)

GB-GBN: Including yourself, how many people live here regularly as members of this household?

IE: How many people aged 18 or more live in your household? How many people aged 17 or under?

KR: How many family members, including yourself, presently reside in your home? Do not include those who are temporarily living elsewhere due to schooling or employment.

NL: How many persons live in your household, including yourself? (all persons sharing the same kitchen, subsequently including children and housemates)

PH: Number of persons in household including servants, transients, boarders taken from the Census of Household

PL: Data derived from the PGSS Household Members Card, collected by interviewer before the interview incl. Respondent

PT: How many people live in your house, including you and people who are not part of the family, guests, employees, etc.

RU: How many people, who are members of your family, incl. Yourself and children of any age, live together with you?

US: List of household members with each person's age.

UY: How many adults, aged 18 years and more live permanently in this household that is four or more days a week? How many people under 18 years old live permanently in hh? Excl. Maids etc.

ZA: Please list all persons in the household who eat from the same cooking pot and were resident 15 out of the past 30 days.

1   1 person

30   30 persons

99   No answer, don't know, refused

in Brazil (BR):

0   None, only persons under 18 years are recorded

95   Other, 50-70 persons

V257 - Household composition:children+adults (HHCYCLE)

Household cycle - Household composition

AT TW: Constructed from 'How many persons in hh?' and 'How many persons are under 18 years?'

AU: How many persons live in your house, including yourself? Please tell us how old each member in your house is and describe your relationship with each of them.

BE-FLA: How many people aged 18 or older are part of your household, including yourself? How many people aged 6 to 17? How many people aged 5 or younger?

CA: Please specify the composition of your household (adults and children under 18)

CH: Constructed from three different source variables: 'How many persons live constantly in your hh'?, 'How many children do you have'?, 'Does child 1, does child 2 etc. live in hh'?

CL: Constructed from 'No. of adults 18 years and older' and 'No. of dependent children up to 18 years living in household'. Exclude domestic helpers.

CZ: Constructed from two variables: 'No. of members in hh' and 'No. of dependent children up to 18 years in the common hh'.

DE: Composition of household constructed from detailed household list with age of each household member.

DK: Derived from the variables 'number of persons in household' and 'number of children less than 18 years'.

FI: Number of persons in hh; number of persons aged 18 and more; number of children aged 7 to 17 years; number of children aged under 7 years; year of birth of children under 18 living in household.

FR: Constructed from the information of the household list.

GB-GBN: Derived from the Household Grid, which contains the ages of all people in the household.

HU: Year of birth of all family members. Persons older than 18 years are considered as adults, persons up to 18 years as children.

IE: How many people aged 18 or more live in your household? How many people aged 17 or under?

JP: How many persons live in your household, including yourself? How many people living in household aged 17 or less?

KR: Constructed from the household list: number, age and relationship of family members residing at home.

LV: How many adults 18 years and older live in your family? How many children less than 18 years live in your family?

MX: Derived from number of persons in family and from number of people less than 18 years living in family.

NL: Derived from a question asking for number, age and gender of the household members as well as their corresponding relationships.

NO: How are the household members distributed on age groups: number of children 0-2 years, 3-5 years, 6-12 years, 13-17 years, number of persons 18 years or more including yourself?

NZ: Derived from the variables 'Total no. Of persons in hh' and 'No. Of children under 18 in hh'.

PH: Household composition: adults and children (less than 18 years), excluding servants, transients, boarders

PL: Derived from the PGSS 'Household Members Card' collected by interviewer before interview with information about all persons living in the household. Combination of hh members grouped according to their age.

PT: How many adults and underage (less than 18 years) family members, including you, live in your house?

SE: Adult = 18 years or older; child = 17 years or younger

SI: All persons in hh; number of persons aged 18 and more; number of children aged 6 to 17 years; number of children below 6 years.

US: List of household members with each person's age: hh members less than 6 years, hh members 6 thru 12 years, hh members less 13 thru 17 years, hh members 18 years and older and the sum of children.

UY: Constructed from number of adults 18 years and more and from number of people under 18 years living in household.

ZA: Calculated first by identifying the adults 18 years and more and then children 17 years and less.

1   Single household

2   1 adult, 1 child

3   1 adult, 2 children

4   1 adult, 3 or more children

5   2 adults

6   2 adults, 1 child

7   2 adults, 2 children

8   2 adults, 3 or more children

9   3 adults

10   3 adults with children

11   4 adults

12   4 adults with children

13   5 adults

14   5 adults with children

15   6 adults

16   6 adults with children

17   7 adults

18   7 adults with children

19   8 adults

20   8 adults with children

21   9 adults

22   9 adults with children

23   10 adults

24   10 adults with children

25   11 adults

26   11 adults with children

27   12 adults

28   12 adults with children

95   Otherwise

99   No answer, refused

in Brazil (BR):

0   Not available

in Denmark (DK):

95   13 persons or more

99   No answer, don't know, refused, no valid answer

V258 - R: Party affiliation: left-right (derived) (PRTY_LR)

Political party affiliation: left/right placement - derived from AT_PRTY to ZA_PRTY (V259 to V296), except: BR ES IE KR MX NZ PH SK UY VE

ES PH SK: In politics, there are often used terms 'the Left' and 'the Right'. Where do you place yourself on the scale?

IE: People often use the term 'right wing' or 'left wing' in describing political opinions. Where would you put yourself on the scale?

KR: To what degree do you think yourself politically liberal or conservative?

MX: The political party you sympathize with, in which ideological orientation would you locate it?

NZ: Where on the following scale would you say your political views lie?

US: The US recode considers both: the party affiliation AND the subjective intensity.

UY: As you might know, people in this country describe political orientations as more closely to the left, to the center or to the right.

Could you please tell with which of the following positions do you identify the most?

VE: In our society there are political groups from far left to far right. Where do you place yourself in the scale?

0   Not applicable

1   Far left etc.

2   Left, centre left

3   Centre, liberal

4   Right, conservative

5   Far right etc.

6   Other, no specification

7   No party preference

8   Don't know, undecided, can't choose, can't say

V274 - R: Party affiliation: Great Britain GB-GBN (GB_PRTY)

GB-GBN_PRTY - Great Britain: (If R supports a party or is closer to one party than others) Which one? (If R is no closer to one party than others) If there were a general election tomorrow which political party do you think you would be most likely to support? (Labour Party is categorized as 'left, centre left', the Liberal Democrats are coded 'centre, liberal' as in previous years. Note, however, that analysis of the party manifestos at the 2001 general election shows that the Liberal Democrats are now TO THE LEFT of Labour on many issues.)

0 Not available: all other countries

1 CONS - Conservative Party (arose in the 1830s, but its origin can be traced to the Tory Party back in the17th century; centre-right, conservative)

2 LAB - Labour Party (founded in 1900, LAB evolved from a socialist, pro-trade union party to a centre-left social-democratic party; this repositioning in the1980s/1990s was branded New Labour; social-democratic)

3 LD - Liberal Democrats (LD was called Liberal Party/LP to 1988, when it merged with the Social DemocraticParty/SDP to form the Social and Liberal Democrats/SLD; in 1989 the party adopted the name of Liberal Democrats/LD; the British liberal tradition goes back to the 17th century, when first the Whigs versus the Tories, then the successor parties Liberal Party/LP versus Conservative Party/CONS determined British po-litics; SDP was founded in 1982 as a centrist breakaway group of the Labour Party; social-liberal)

6 SNP - Scottish National Party (founded in 1934 as the result of the merger of the National Party of Scotland/NPS and the Scottish Party; centre-left)

7 PC - Plaid Cymru (Party of Wales, founded in 1925; PC is a social-democratic, Welsh-separatist party)

8 GREEN - Green Party of England and Wales (formed in1973 as the Ecology Party; in the 1980s it was re-named to its current name; the Scottish wing split to form the Scottish Green Party/SGP in 1996)

93 Other answer

V276 - R: Party affiliation: Ireland (IE_PRTY)

IE_PRTY - Ireland/Eire: Do you feel closer to one of the political parties than to the others? If yes, which party?

0   Not available: all other countries

1   FF - Soldiers of Destiny -The Republican Party (Fianna Fail; founded in 1926 as a breakaway from Sinn Fein/SF; FF opposed to the Anglo-Irish Treaty of 1921, which created the Irish Free State; in the 1930s FF stood for 'tit for tat' policy by starting an economic war with Britain; in 1937 FF drew up a new constitution, which claimed that Ireland consists of the entire island; in the 1990s FF played an active role in paving the way for a peace process in Northern Ireland culminating in the 'Good Friday Agreement'; populist, republican, national-conservative party)

2   FG - Tribe of the Gaels/aka: Family of the Irish (Fine Gael; founded in 1933 as a merger of the Centre Party, Cumann na nGaedhael/Society of the Gaels/CGand the Blueshirts; FG was formed by the faction who was in favour of the Anglo-Irish Treaty of 1921, which created the Irish Free State and divided the island in the Republic of Ireland (1948) and Northern Ireland; centre-right, christian-democratic party)

3   LAB - Irish Labour Party (Pairti Lucht Oibre; founded in 1912 at a conference of the Irish Trade Union Congress; the Anglo-Irish treaty of 1921 divided the LAB when some extreme socialists sided with FF; in the1990s LAB played an active role in contributing to the peace process; in 1997 LAB merged with Democratic Left; LAB is the sister party of the Northern Irish SDLP/Social Democratic and Labour Party; social-democ)

4   PD - Progressive Democrats (Dan Pairty Daonlathach;founded in 1985 as a split from FF; combines right-wing economic policies with liberal social policies; liberal party)

5   GP - Green Party (Comhaontas Glas; founded in 1982 as Ecology Party of Ireland, renamed into its current name in 1987; aims to be an open, non-hierarchial party, which finds expression in the party's structure: the party has no leaders with all positions within it rotating after one year; GP has strong links with the Northern Irish Green Party; ecologist)

6   SP - Socialist Party

7   SF - We Ourselves (Sinn Fein; founded in 1905; founded as an Irish separatist monarchist party; in 1917 moved to an Irish republican party; SF under went successive splits (1922, 1926, 1970) from which emerged a range of parties (Fianna Fail; Official Sinn Fein, Sinn Fein-The Workers' Party, Workers' Party); nearly all Irish parties have historical links to SF; officially SF initiated steps towards moving the party away from violence such as decommissioning of arms by the IRA; extreme-left party)

V297 - R: Vote last election: yes, no (VOTE_LE)

Voted last election

AT: Which political party did you vote for at the last parliamentary election (Nationalratswahl) in 2002?

AU: Did you vote in the Federal Election in October, 2004?

BG: Did you vote in the last Parliamentary Elections in June, 2005?

CA: Did you vote in the last federal election of 2002?

CH: Which party did you vote for at the last parliamentary election (Nationalratswahl) in October, 2003?

CL: Did you vote in the last elections of parliament in December 2001?

CZ: Let's go back to the last elections to the Chamber of deputies that were held on July, 14th and 20th, 2002. Did you take part in the elections?

DE: The last general election took place on September 2002. Were you eligible to vote? Did you vote?

DK: Did you vote in the previous election in November 2001?

ES: Did you vote at the last election in March 2004?

FI: Did you vote in the last parliamentary elections in 2003?

FR: Did you vote in the first round of the French Presidential Elections, 2002?

GB-GBN: Thinking back to the last general election in 2001, we have found that a lot of people didn't manage to vote. How about you: did you manage to vote in that election?

HU: Did you vote in the first round of the general elections in 2002?

IE: Did you vote in the last general election, May 2002?

JP: Did you vote in the Upper House election in July?

KR: Which candidate or party did you vote in the last April's National Assembly elections?

LV: Did you vote in the 8th Parliament elections on October 5th, 2002?

MX: Did you vote in the federal elections of July 6 in 2003 to elect deputies?

NL: Which party did you vote for in the Parliamentary Election (Tweede-Kamerverkiezingen) in 2002? (derived from NL_PRTY)

NO: Did you vote in the 2001 national election?

NZ: At the 2002 General Election, who did you vote for ('vote party' and 'vote candidate')?

PH: Did you vote in the May 2004 election or not?

PL: Did you vote in the (last) election to the Seym and Senat in September 2001?

PT: Did you vote in the last elections, Assembly of the Republic in March, 17, 2002?

SE: Did you vote in the last parliamentary election?

SI: Did you vote in the last parliamentary elections in October 2000?

SK: Did you vote in the elections 2002 (September 20th/21st)?

TW: Whom did you vote for in the last presidential election, March, 2004?

US: In 2000, you remember that Gore ran for President on the Democratic ticket against Bush for the Republicans. Do you remember for sure whether or not you voted in that election?

UY: Did you vote in the last national elections in 1999?

VE: Did you vote at the last presidential election?

ZA: For which party did you vote for in the 2004 election?

DE HU: As a rule, how often do you go to church?

ES: How frequently do you attend mass or other religious services without counting occasions to a social type of ceremony such as weddings, communion or funerals?

FI: How often do you attend worship services or other religious services, ceremonies or events?

GB-GBN: (If any religion) Apart from such special occasions as weddings, funerals and baptisms, how often nowadays do you attend services or meetings connected with your religion?

JP: How often do you attend a place of worship or prayer? Exclude ceremonial occasions such as wedding or funerals.

LV: How often do you attend religious services? (If R can't choose between code 2 and code 3, code 2 must be noted)

NL: In recent years, how often on an average did you attend a religious service or feast of a religious group?

NO: How often do you attend religious services or other religious meetings? (apart from weddings, funerals etc.)

PL PT: How often do you attend mass and religious services?

SI: Do you attend religious services?

TW: How often do you participate in religious activities?

ZA: Apart from special occasions such as weddings, funerals and baptisms, how often do you attend services or meeting connected with your religion?

0   NAP, no religion

1   Several times a week

2   Once a week

3   2 or 3 times a month

4   Once a month

5   Several times a year

6   Once a year

7   Less frequently

8   Never

97   Refused

98   Don't know, varies too much

99   No answer

in Belgium/ Flanders (BE-FLA):

3   Several times a month

5   Only on church holiday such as Christmas/Eastern

6   Not used

7   Almost never

in Brazil (BR):

1   Once a week or more

2   Not used

6   Not used

in Canada (CA):

1   Once a week or more

2   Not used

6   Not used

in Czech Republic (CZ):

4   About once a month

in Germany (DE):

1   More than once a week

3   Between 1 or 3 times a month (collapses code 3,4)

6   Not used

7   Less than several times a year (includes code 6)

in France (FR):

1   Once a week or more

2   Not used

6   Not used

in Great Britain (GB-GBN):

1   Once a week or more

2   Not used

3   At least once in two weeks

4   At least once a month

5   At least twice a year

6   At least once a year

7   Less than once a year

8   Never or practically never

in Israel (IL):

1   Several times a week, every day

in Norway (NO):

2   Every week

4   About once a month

6   About once or twice a year

7   Less than once a year

in Poland (PL):

2   Every week

3   Incl. nearly every week

4   About once a month

6   About once or twice a year

7   Less than once a year

98   Hard to say

in Russia (RU):

0 Not available

in Slovenia (SI):

4 At least once a month

5 On important holidays and special occasions

in United States of America (US):

2 Every week and nearly every week

4 About once a month

6 About once or twice a year

7 Less than once a year

in South Africa (ZA):

1 Once a week or more

2 Not used

3 At least once in two weeks

5 At least twice a year

6 At least once a year

8 Never or practically never

in KR TW:

7 Less than once a year

V301 - R:Top Bottom self-placement 10 pt scale (TOPBOT)

TOPBOT: Top - Bottom self-placement (10 pt scale)

AT BR DK FR NO PH SE SK: Note that the labels are reversed to the standard in the national questionnaire (01. highest .... 10. lowest), but already recoded according to the standard.

AU DE FR IE KR US: In our society there are groups of people which tend to be towards the top and groups which tend to be towards the bottom? Below is a scale that runs top to bottom. Where would you put yourself on this scale?

CA: Some people consider themselves to be member of a specific social class. Of the following groups would you consider yourself a member of ...?

CH FI: There are different classes in our society. Some social classes are higher and some lower. On a scale from 1 to 10 where 10 is the highest class and 1 is the lowest, where would you place yourself?

CZ TW: In our society, there are groups which are considered to have high social status and on contrary groups of low social status: Where would you place yourself on this scale? (01. low social status ......10. high social status)

DK: In our society, there are some groups which are perceived as higher ranked and other groups which are perceived as lower ranked. Where would you place yourself on this scale? (01. Top of society ......10. Bottom of society)

HU: Where would you place yourself on a 10 point scale regarding your social circumstances?

JP: If current Japanese society were divided into 10 strata, to which stratum do you think you belong?

LV: In our society there are groups of people which are closer to the top of the society and some which are closer to the bottom? Where do you think you are on this scale?

MX UY: If we had a rank of the COUNTRY's families from 1 to 10 according to their standard of life, where the poorest families would be placed in the level 1 and the richest families would be placed in the level 10. Where would you place your family in your rank?

NL: If you take a look at the illustration of the social scale below, on which rung of the ladder would you place yourself at the present stage?

NO: In Norway some groups of people are almost at the top of the social ladder while others are almost at the bottom. Where on the scale would you place yourself?

NZ: In terms of your social status, which one of the following categories do you think you fit into?

PL: In our society, there are social groups that occupy higher positions and others that occupy lower positions. Below is a scale that runs from top to bottom. Where would you place yourself on this scale? (01. Bottom .... 10. Top)

PH: At present, where will you put yourself on this card regarding your current situation in life?

PT: In the following scale, where 1 corresponds to the lowest level of the social scale and 10 to the highest level, which point would you place yourself?

1   Lowest
2   2
3   3
4   4
5   5
6   6
7   7
8   8
9   9
10 Highest
98 Don't know, hard to say
99 No answer, refused

in Canada (CA):

1   Lower class

3   Working class

5   Upper working class/lower middle class

6   Middle class

8   Upper middle class

10   Upper class

99   No answer, no class affiliation, refused

in Latvia (LV):

98   Can't say

in Poland (PL):

98   Hard to say

in CZ TW:

1   Low social status

10   High social status

in AU DE IE KR US:

1   Bottom

10   Top

in BE-FLA DK:

1   At the bottom of society

10   At the top of society

in MX UY:

1   Poorest

10   Richest

US_SIZE - United States: Recoded from 'actual size of place of interview' in GSS (4-digit number)

0   Not available: all other countries

1   1 - 9 million inhabitants

2   500.000 - 999.999 inhabitants

3   100.000 - 499.999 inhabitants

4   50.000 - 99.999 inhabitants

5   10.000 - 49.999 inhabitants

6   1.000 -   9.999 inhabitants

7   Less than 1.000 inhabitants

Note:

/ US: This Note refers to V374 and V378 contains specific explanations about size and type of the place of residence.

NORC Size of Place Code

Source: GSS Methodological Report No.4.

Within an SMSA and --

01 A large central city (over 250.000)

02 A medium size central city (50.000 to 250.000)

03 A suburb of a large central city (a)

04 A suburb of a medium size central city

05 An unincorporated area of a large central city (division, township, etc.)

06 An unincorporated area of a medium central city

Not within an SMSA, (within a country) and --

07 A small city (10.000 to 49.999)

08 A town or village (2.500 to 9.999)

09 An incorporated area less than 2.500 or an unincorporated area of 1.000 to 2.499 (c)

10 Open country within larger civil divisions, e.g. township, division

Remarks:

(a) A suburb is defined as any incorporated area or unincorporated area of 1.000+ (or listed as such in the U.S. Census PC (1)-A

books) within the boundaries of an SMSA but not within the limits of a central city of the SMSA. Some SMSAs have more than one

central city, e.g., Minneapolis-St. Paul. In these cases, both cities are coded as central cities.

(b) If such an instance were to arise, a city of 50.000 or over which is not part of an SMSA would be coded '07'.

(c) Unincorporated areas of over 2.499 are treated as incorporated areas of the same size. Unincorporated areas under 1.000 are

not listed by the Census and are treated here as part of the next larger civil division, usually the township.

SRCBELT

1 Central city of 12 largest SMSAs

2 Central city of remainder of the 100 largest SMSAs

3 Suburbs of 12 largest SMSAs

4 Suburbs of the remaining 100 largest SMSAs

5 Other urban (counties having towns of 10000 or more)

6 Other rural (counties having no towns of 10000 or more)

V379 - Family origin, ethnic group, identity (ETHNIC)

Nationality, Ethnic and Language Code

To which ethnic group do you belong or from which country you or your ancestors are coming?

BE-FLA: Do you/your father/your mother have a Belgian nationality from birth?

BG: Family origin, ethnic group, identity

BR: What is your race or skin-colour?

CA: To which ethnic or cultural groups did your ancestors belong?

CH: Which citizenship/nationality do you have? (include also dual citizenships)

DE: What citizenship do you have? If you have several citizenships, please name all of them.

FI: Added from the registers of the fieldwork institute

HU: Do you think that the respondent is a gipsy? We ask the interviewer whether the R is a gipsy or not.

LV: What is your ethnic identity?

NZ: Which of the following categories describe your ethnic origin? Please tick as many as you need to show which ethnic group(s) you belong to. Respondents were only classified in the European categories if they hadn't ticked any of the previously mentioned ethnic groups.

SI SK: What is your nationality?

TW: What is your father's ethnicity?

US: Are you Spanish, Hispanic or Latino? What is your race? Indicate one or more races that you consider yourself to be.

ZA: Race of respondent

V380 - Administrative mode of data-collection (MODE)

Administrative mode of data collection

DK: In total, 89,6% of the interviews were completed by mail, 10,4% were completed as telephone interviews. The variable is derived from the SFI survey database of respondent's mode of answering the questionnaire.

GB-GBN: All background variables collected face to face using CAPI. All ISSP questions collected on paper questionnaires which were left with R and collected later.

US: The US GSS uses CAPI (Computer Assisted Personal Interview) Method for data collection

Australia
ISSP 2004 – Citizenship I
Study Description

Study Description: Australia

Study title: ISSP 2004 Citizenship

Fieldwork dates: Start: 7 September 2005
                            Finish: 29 December 2005

Principal   Rachel Gibson, The Australian National University
investigators: Shaun Wilson, Macquarie University

Sample type: The sample was stratified by Australian states and territories using population counts based on Australian Electoral Commission (AEC) Statistics as at 29th July 2005. The selection of individuals within the stratified sample was random using the Electoral Roll for Australia produced by the AEC. This frame includes all registered voters who must be citizens of Australia (or a British subject on a Commonwealth electoral roll as at 25 January 1984). Since voting in Australia is compulsory, there is a very high proportion of the adult Australia population covered by this frame—approximately 92 percent in 2003.
A systematic random sample from each state and territory list was drawn by taking every nth name starting with a random start point of size proportional to the population of registered voters. The sampled units were named individuals.

Fieldwork Institute: Australian Social Science Data Archive

Fieldwork methods: Self-completion, paper and pencil, mailed to, mailed back by respondent

Sample size: 1914

Response rates:

5000	A - Total issued
395	B – Ineligible (address vacant, wrong ages,...)
4605	C - Total eligible (in scope sample)
1914	D - Total ISSP questionnaires received
2691	E - (= C - D; = F + G + H) Total non-response
320	F - Refusals (refusing to take part)
2357	G - Non-contact (never contacted)
14	H - Other non-response

Language: English

Weighted: No weighting

Weighting Procedure: n/a

Known Systematic Properties of the sample:

Gross sample
Using a sampling frame derived from the AEC Electoral Roll (2005) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population.

Net sample
The AuSSA 2005 sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2001 Census. The major biases are: age (median age is older than the Census population), education (over-representation of persons with post-secondary school qualifications), and gender (slight over-representation of women).

Deviations from ISSP-questionnaire: None

Study Description

Study Description: Bulgaria

Study title: 'Citizenship'2004' and 'Work orientation'2005'

Fieldwork dates: 15.07.2005 – 26.07.2005

Principal   Lilia Dimova, Agency for Social Analyses (ASA), Sofia, Bulgaria
investigators:

Sample type: Two stages random sample. The first stage of the sampling procedure
                        was based on the list of electoral sections from the Local elections
                        2003. The total number of the electoral sections is 12313. Electoral
                        sections cover the whole territory of the country and respectively
                        provide access to the whole Bulgarian population aged 18 and over.
                        The agency disposes of the complete list of electoral sections, which
                        includes: its number, territorial location, and number of registered
                        voters. Selection of electoral sections included in the sample was
                        based on the procedure of systematic random selection**.** Within each
                        selected 125 units were randomly selected 9 respondents who were 18
                        of age and over

Canada
ISSP 2004 – Citizenship I
Study Description

Study Description: **Canada**

Study title:	2004 Citizenship
Fieldwork dates:	January 29th-Marth 31th, 2004
Principal investigators:	Carleton University Survey Centre
Sample type:	Stratified Random
Context of ISSP questionnaire	National Identity with Citizenship
Fieldwork methods:	Self-completion Mail

Sampling Method: A stratified random sample (by province by gender) of 3,000 Canadian residents was purchased from *Cornerstone List Brokerage*, based on residential phone listings. (% of Canadians without phones < 2%)

The design consisted of two mailouts and 1 reminder notice.

The first mailout of 3,000 packages was mailed on January 29, 2004 and included a questionnaire, explanatory letter printed on the front cover and a postage paid return envelope. On February 10th a reminder postcard was mailed out to the entire sample. On February 26th a second mailout was sent to the respondents who had not returned their survey along with a additional letter explaining the importance of their participation in the project.

Chile
ISSP 2004 – Citizenship I
Study Description

Study Description: **Chile**

Study title: First National Public Opinion Study 2005

Fieldwork dates: June 11 – July 3, 2005

Principal investigators: Carolina Segovia
                               Centro de Estudios Públicos

Sample type: The guiding methodological principle underlying CEP's public opinion surveys is that effective and accurate survey research must be based on a truly representative sample of the universe in question. For CEP's purpose, this universe is made up of Chilean adults 18 years of age and older. Our studies use a probability multistage cluster sample of 1,505 individuals.

Table I. Regional Breakdown of Population (%)			
Region	**% Population 18 years of age and older[1]**	**Region**	**% Population 18 years of age and older[1]**

VI Libertador Bdo. O'Higgins	5,1	XII Magallanes and Antarctic	1,0
XIII Metropolitan (Santiago)	40,7		

[1]Source: *2002 Census Data* National Institute of Statistics.

Sampling Stages
First Stage
The first stage of the sampling process sets the number of completed interviews per cluster at 5; a cluster is defined as a block (manzana) or populated entity (entidad).1 The application of 5 interviews per cluster to the total number of interviews targeted in the sample (1,505) yields 301 primary sampling units (PSUs) to be identified in the first stage of sample selection.
The PSUs are proportionally distributed throughout the regions of the country, taking into account the region's contribution to population (both urban and rural), as described in Table II.

---

1 Blocks *(manzanas)* are used in urban areas, while in rural areas the census equivalent is the entity *(entidad)*.

TABLE 2

Number of Clusters per Region

Region		Number of clusters		
		Urban	Rural	Total
I	Tarapacá	7	1	8
II	Antofagasta	10	0	10
III	Atacama	5	0	5
IV	Coquimbo	9	3	12
V	Valparaíso	28	3	31
VI	Libertador Bdo. O'Higgins	10	5	15
VII	Maule	12	6	18
VIII	Bío Bío	30	7	37
IX	La Araucanía	11	6	17
X	Los Lagos	14	7	21
XI	Aisén	2	0	2
XII	Magallanes and Antarctic	3	0	3
XIII	Metropolitan (Santiago)	118	4	122
	TOTAL	259	42	301

Using the most reliable digital information on hand, i.e. 2002 census data, a cumulative listing of population by province *(provincia)*, borough *(comuna)*, district *(distrito)*, zone *(zona)* and block *(manzana)* was prepared in the urban case; and by province, borough, district, locality *(localidad)* and entity *(entidad)* in the rural case (geographically arranged).

In both the rural and the urban case a fixed interval is set for each region by dividing the total population for that region by the number of PSU's assigned to it. Within each region, a purely random selection process is followed, such that each individual (as represented by population statistics) has a calculable probability of being selected as the reference point for a PSU.

This is carried out through a computerised, random, proportionate-to-population process to select blocks in the urban areas and entities in the rural areas. A computer program is developed to select the 259 urban blocks and the 42 rural entities for the sample. All the blocks and entities are identified by number and located on a census map.

Second Stage

The second stage in the sampling process is to select households (dwellings) within PSUs. Selection rules for households within chosen blocks and entities are provided to interviewers, to enable them to select households randomly within each cluster. After taking a census of each selected block and entity, a random walk or systematic sampling[2] procedure is followed, whereby every nth dwelling is included in the sample until a total of 5 households are identified.

Third Stage

The third stage is to select, within each household, a person to be interviewed. Interviewers are instructed to apply a random selection process (random number table) to identify the person to be interviewed.

Other Important Aspects in the CEP Sample Design

In the second and third stages, the interviewer has to make a minimum of three attempts on three different days to try to reach the original house or person to be interviewed. In these attempts the interviewer must deliver a letter signed by the CEP director explaining the nature of CEP and the aims of the study.If the original household or person finally cannot be contacted, they are replaced. The rules for replacement are as follows:

A. Blocks and Entities

The replacement of a block or entity will occur only in the following situations:

1)   Vacant lots that could not be detected prior to sample selection

2)   Areas which are almost inaccessible

3)   Entities and/or blocks intended basically for commercial use

4)   Parks or stadiums

5)   Areas belonging to the armed forces

Blocks and entities are randomly replaced: the original selection is replaced with the one whose identification number comes immediately before that of the original. If this is not successful, the block/entity with the identification number immediately following the original selection is taken.

---

2 The total number of numbered dwellings was divided by 5 (the number of interviews per cluster); this gave an interval length, such that if it was 43/5 = 8, starting

B. Households

Failed dwellings are accounted for as follows:

1) by outright refusal to receive the interviewer, even having received the letter from the CEP director.

2) by the absence of occupants at a house after three visits on three different days (vacations or other reasons).

3) the house is unoccupied.

4) access denied (condominiums or buildings with security guards)

5) other special cases (foreigners with whom it is impossible to communicate, etc.)

Each failed dwelling is randomly replaced by another one from the same block/entity. The replacement interval is defined as (k-1), where k= the original selection interval. Starting from the last house originally selected, the interval (k-1) is added to select the first replacement house, and so on. The fieldwork treatment of replacement houses as regards the number of repeat visits is the same as for the original houses.

C. Individuals

Individuals are replaced under the following circumstances:

1) when the person selected refuses to answer the questionnaire, even after receiving the letter from the CEP director.

2) when the person selected cannot be located after three attempts on three different days, or will be away for a period longer than the duration of fieldwork.

3) the person offers to respond on a date long after the closing date of the field work.

4) individuals with serious physical or psychological handicaps which prevent them from responding (mentally handicapped, deaf and dumb, etc..)

5) the individual is physically and psychologically fit, but is ill, in bed and does not want, or is unable to respond to the survey.

6) the selected individual is a foreigner with less than 5 years in the country (unable to vote).

7) the person starts to answer but he/she does not want to finish the interview.

8) other specific cases.

In replacing individuals, the dwelling is replaced according to the rules explained above, and a random selection process chooses an individual from the new household.

It is important to bear in mind that, by using these replacement rules, the sample size achieved is always very close to 1505 (issued sample size).

Fieldwork methods: Face-to-face interviews

Fieldwork institute: ICCOM

Sample size: *1,505*

Response rates: As was explained above in the section "Sample type", the sampling method used by CEP involves the random replacement of those blocks/entities, dwellings or individuals, which for the reasons described above cannot in the end be contacted.
Accordingly, keeping this in mind and using the method for counting the response rate established by the ISSP, we have that:

A = 1,505 = Issue sample
B = 0 = Ineligible
A-B = 1,505 = C= Total eligible
D =1,505= Sample achieved
E = C-D= 0
Response rate = A/D = 1505/1505 = 100%
Non-response rate = 0/1505 = 0.0%

However, for the type of sampling used by CEP, these data are not real. CEP uses the following method for calculating the response rate.

Let A = Number of original interviews achieved (not replaced) = 1,242
Let B = Number of non-original interviews achieved (replaced) = 263
Let C = Number of questionnaires received = A+B = Total sample = 1,505

B = D1 + E1 + F1 + D2 + E2 + G + F2 = 263
where :
D1 = Number of interviews replaced due rejection of household = 107
E1 = Number of interviews replaced due to no contact in house (empty house + nobody comes to the door) = 64
F1 = Number of interviews replaced for other household reasons = 6

D2 = Number of interviews replaced due to individual rejection = 40
E2 = Number of interviews replaced due to failure to make contact with selected individual = 35
G = Number of interviews replaced due to physical or psychological impediment of selected individual = 7
F2 = Number of interviews replaced for other individual reasons = 4

No-response rate = Number of non-original interviews achieved (replaced) / total number of interviews (replaced + original)
= B / C = 263 / 1,505 =17,5%

Language: Spanish

Weighting: Yes

Weighting procedure:

A weighting procedure is applied in order to correct for distortions in the representativeness of the sample as regards three variables of interest: Gender, Age, (grouped in five categories: 18-24 years, 25-34, 35-44, 45-54, 55 or older) and Urbanity (classification of place of residence as urban or rural). This makes it possible to obtain a sample with characteristics similar to those of the population. The weights are constructed by calculating the quotient between the expected distribution and that observed in the cross between Urbanity, Gender and Age. The expected distribution is obtained from the 2002 census data provided by the National Institute of Statistics. The result of the weighting slightly corrects for problems of under- and over-representation among certain specific groups of the population.

Known Systematic Properties in Sample: The sample design described above has been used in the last 21 surveys and has given good results, so it can be stated that it does not have properties that might be causing some type of bias in the results.

141	H - Other non-response

Language: Czech

Weighted: Yes

Weighting procedure: Total weight is constructed from:
                           1) design weights based on proportion of household sizes,
                           2) post-stratification weights based on region, sex, education, age,
                           economical activity, and size of the community.
                           The weights were derived from data of the Czech Statistical Office.
                           Method: raking based on loglinear modelling.

Known systematic   Due to response differences the basic socio-demographic characteristics -
properties of the   sex and education - are significantly different from the known population
sample: characteristics.

Deviations from ISSP
questionnaire:

No deviations in the questionnaire. There are new value codes for CZ_PRTY and CZ_DEGR, which differ from the ISSP 2004 standard setup. Information on coding can be found in the "cz04info.doc".

Specification of income variables:

RINCOME: Total average net income of respondent per month in CZK. It includes incomes from main job or business, incomes from additional gainful activities or property, rents, social incomes as are unemployment benefits, maternal benefits, allowances, etc. It does not include child allowances and state compensatory benefits for children. Income asked in categories, i.e. midpoints of categories are coded.

INCOME: Total average net income of household per month in CZK. It includes incomes and rents of all members of household and all social benefits, allowances and complementary incomes. Income asked in categories, i.e. midpoints of categories are coded.

For the technical report, etc.:
Stud. Scient. Adm David Hedegaard Andersen. Dept. of Economics, Politics and Public Administration, Fibigerstraede 1, 9220 Aalborg OE, Denmark.

Sample type: Sampling-procedure: A representative sample (simple random sample) was drawn from the *Central Population Register* (CPR) – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.

The fieldwork method was postal survey (self-completion). One reminder was sent out to respondents who had not returned the questionnaire. After this telephone interviews were attempted. If respondents were not reached, they were contacted at least five times before given up as "not meet". Because of a poor feedback from the respondents a second letter was sent out to the respondents who had not answered or had not refused to answer.
In total 89,6 percent of the interviews where completed by mail and 10,4 percent were completed as telephone interviews (cf. MODE).
No substitutions were permitted at any stage of the selection process or during the fieldwork.
The questions in the module were asked in the prescribed order.

Sample size: Issued: 1845
Achieved: 1186

Response rates: The response rate is calculated to percent.
Full productive interviews / (Issued names – (respondents moved, no forwarding address + respondents deceased)):
1186 / (1845-(12+20)) x 100 = 65,4 pct.

Description	(N)
Issued names	1845
Selected respondent moved, no forwarding address	12
Selected respondent too sick/incapacitated to participate	43
Selected respondent deceased	20
Personal refusal by selected respondent	374
Other type of unproductive reaction	210
Full productive interviews	1186

Finland
ISSP 2004 – Citizenship I
Study Description

Study Description: **Finland**

Study title: Kansalaisvaikuttaminen Suomessa (in Finnish)
Medborgarpåverkan i Finland (in Swedish)

Fieldwork dates: September 8th – November 1st, 2004

8th of Sep, 2004	questionnaires mailed
15th of Sep, 2004	thank you/reminder postcard sent to all respondents
30th of Sep, 2004	dead line of answering the questionnaire
11th of Oct, 2004	replacement questionnaires sent to non-respondents
1st of Nov, 2004	dead line of answering the replacement questionnaire
15th of Nov, 2004	last questionnaire received

Principal investigators: Prof. Raimo Blom, University of Tampere
Prof. Harri Melin, University of Turku
Eero Tanskanen, Statistics Finland, Helsinki (fieldwork)

Sample type: Target population: household population aged 15 to 74. Sampling design: a systematic random sample of individuals.

Sampling frame: population register, sorting order: domicile code and birth date. Stratification: implicit geographic stratification. No clustering.

Fieldwork Institute: Statistics Finland, Helsinki

Fieldwork methods: Postal (both directions), self-completion, paper and pencil

Sample size: Issued: 2 500

Response rates:

A – Total issued	2500
B – Ineligible (address unknown or living abroad)	9
C – Total eligible	2491
D – Total ISSP questionnaires received	1354
E – Total non-response	1137
F – Refusals	9
G – Non-contact	-
H – Other non-response	1128
Final response rate	54,4 %

Language: Questionnaires in Finnish and Swedish. Information on language from the population register.
Finnish (94,5 % of total sample) and Swedish (5,5 % of total sample)

Weighted: Weight variables are included in the data-set. Basic data are unweighted.

Weighting procedure: The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-response a calibration method was used for the creation of the weights.

The following marginal distributions of the population were used: 1) gender (male, female), 2) age classes (15–24,25–34,…, 65–74), 3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region, 4) type of community (urban - semi-urban - rural). There are two weights available for calculations: 1) a weight that expands the results to the population level (the sum of the weights is the size of the population) and 2) a weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data). Both of the weights are based on the same calibration process, only the scale differs.

Known systematic properties of the sample: Sampling frame is updated and covers total population. A cross-sectional sample does not contain attrition by definition.

After having used our standard sampling procedures for over 20 years we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure <= 1 by definition.

Geert Molenberghs (LUC), Prof. dr. Jef Breda (UFSIA)

Sample type: Two-stage random sampling procedure

1st stage: selection on postcode of 146 clusters of 10 addresses each in Flanders and 8 clusters of 5 addresses each in Brussels. Size of the population per postcode is taken into account when selecting clusters. No substitution but in order to cope with non-response and to reach about 1500 face-to-face interviews: over sampling of certain postcodes depending on differential regional non-response rates.
2nd stage: using the National Register N=2571 addresses (2475 in Flanders and 96 in Brussels) were randomly selected within the groups born 1919-1986 in the randomly selected postcodes.

The National Register is a national governmental institution that stores data on all residents in Belgium: name, address, gender, date of birth, nationality, and composition of the family.

Fieldwork institute: TNS Dimarso / Brussel

Fieldwork methods: Survey social-cultural changes in Flanders including the standard background variables: CAPI Face-to-face interviews with trained interviewers (1 day training).
ISSP-module: drop-off questionnaire arrives with interviewer, self-completion by respondent and mailed back by respondent to MVG - APS. Follow-up of drop-off questionnaire by MVG - APS.

Sample size: N=1554 respondents in Survey social-cultural changes in Flanders of which 1398 respondents completed the drop-off questionnaire.

Response rates:

2413	A - Total issued (total sample)
186	B - Ineligible (address vacant, wrong ages,...)
2227	C - (= A - B) Total eligible (in scope sample)
1398	D - Total ISSP questionnaires received

829	E - (= C - D; = F + G + H) Total non-response
577	F - Refusals (refusing to take part)
208	G - Non-contact (never contacted)
44	H - Other non-response
	A=available addresses (n=2571) - never used addresses by fieldwork institute or interviewer (n=158) B=deceased (n=7) + moved-out (n=72) + language barrier (n=26) + disabled, demented (81) F= refusal face to face interview (n=421) + face to face interview but no drop-off (n=156) H= other non-response (n=14) + interviewer fraud (n=26)+ technical problems sending data (n=4)

Language: Dutch

Weighted: Yes

Weighting procedure: For the total of the drop-off questionnaires a weighting variable was computed, taking into account sex, age group and level of education (Nationaal Instituut voor de Statistiek, Labor Force Survey, Flanders, 2003)

Known systematic properties of the sample:

Realized drop-off versus realized total sample:
- The realized drop-off sample (N=1398) is representative for the realized total sample (N=1554) for the variables age, gender, and level of education.

Realized drop-off versus population:

Following groups are (slight) under represented:
- lower educated (primary education or no diploma) 18-24 years old men and women
- lower educated 45-54 years old men and women
- lower educated 55-85 years old women

Following groups are (slight) over represented:
- 18-24 years old men with higher secondary education
- 45-54 years and 65-74 years old men with non-university higher education
- 65-75 years old men with university education
- 35-44 years old women with university education
- 45-54 years and 55-64 years old women with higher secondary education
- 55-64 years old women with non-university higher education
- 65-74 years old women with lower secondary education

Deviations from ISSP questionnaire: Following standard background variables were not included in the survey:
PARTY_LR   Party affiliation - left-right
(Not asked but coded in a 5-point left - right scheme by data

<u>producers)</u>
nat_PRTY   Party affiliation - Country-specific
VOTE_LE   Vote last general election: Yes/no

Study Description

Study Description: **Germany**

Study title: ISSP 2003 Germany – Citizenship I

Fieldwork dates: 2.3.2004-12.7.2004

Principal investigators: Dr. Janet Harkness, Prof. Dr. Peter Ph. Mohler

Sample type: Two stage random sample. Names and addresses from registers of inhabitants kept by municipalities. Adults of 18 and older living in private accommodation

Fieldwork institute: TNS Infratest Sozialforschung (Germany)

Fieldwork methods: Self-completion questionnaire, interviewer in attendance. Background variables were asked face-to-face (CAPI).

Sample size: 1332 (ISSP 2003 and ISSP 2004 were fielded in split together with ALLBUS, the German General Social Survey; number of ALLBUS 2004 interviews: 2946; number of ISSP 2003 interviews: 1287)

Response Rates:

N=3603	W=2471	E=1132	A – Total issued (total sample)
N=351	W=242	E=109	B – Ineligible (address vacant, wrong ages, etc.)
N=3252	W=2229	E=1023	C – (=A–B) Total eligible (in scope sample)
N=1332	W=896	E=436	D – Total ISSP interviews received
N=1920	W=1333	E=587	E – = C - D; = F + G + H) Total non-response
N=1390	W=945	E=445	F – Refusals (refusing to take part)
N=217	W=159	E=58	G – Non-contact (never contacted)
N=313	W=229	E=84	H – Other non-response* (ALLBUS without ISSP Interviews included here)

Language: German

Weighted: No

Weighting procedure: Sample for eastern Germany deliberately over-samples the five eastern federal states. If all of Germany is taken as the unit of analysis (rather than the eastern and western states) weighting is necessary.
Weighting factor for West Germany: 1,210130
weighting factor for East Germany: 0,568173
(recoding of the country variable is necessary)

Known systematic properties of the sample: None for the total sample

Deviations from ISSP questionnaire: ISSP substantive questionnaire: no deviations;
Background variables: no deviations

Great Britain
ISSP 2004 – Citizenship I
Study Description

Study Description: **Great Britain**

Study title: British Social Attitudes 2004

Fieldwork dates: June 2004 to November 2004

Principal investigators   National Centre for Social Research

Sample type: Clustered random sample: addresses were selected with equal probability in a stratified clustered design. One person aged 18+ was interviewed per address.

Fieldwork institute: National Centre for Social Research

Fieldwork methods: The ISSP module is implemented as a self-completion questionnaire, completed by the respondent after the main face-to-face interview and collected by the interviewer.

Sample size: 853

Response rates:

2067	A – Total issued (total sample)
175	B - Ineligible (address vacant, wrong ages,...)
1892	C - (= A - B) Total eligible (in scope sample)
853	D - Total ISSP questionnaires received
1039	E - (= C - D; = F + G + H) Total non-response
572	F - Refusals (refusing to take part)
209	Face-to-face interview but no self-completion
67	G - Non-contact (never contacted)
191	H - Other non-response

Language: English

Weighted: Yes

Weighting procedure: Addresses were selected with equal probability (except in Scotland where allowance was made for MOI – see below) but only one person interviewed at each address. Therefore weights need to be applied to correct for different number of adults at each address. The weights are calculated by the following formula:
Weight = (number of households at the address * number of adults in selected household) / MOI
Where MOI is the Multiple Output Indicator (MOI>1 indicates more than one household at the address).
Very large weights were capped and the weights were scaled to make the weighted sample size equal to the unweighted sample size.

Known systematic   Sample excludes Scotland north of the Great Glen.

properties of the sample:	
Deviations from ISSP questionnaire:	Optional variables V64 to V69, Ethnic and TopBot are not available. The following variables were collected only if the respondent was not economically active/retired and the spouse partner was economically active/retired : SPISCO88, SpWrkTyp.

Hungary
ISSP 2004 – Citizenship I
Study Description

Study Description: **Hungary**

Study title: Citizenship

Fieldwork dates: 03.12.2004. – 20.12.2004.

Principal investigators: TARKI Social Research Centre

Sample type:

We use probability sample of 18+ years old Hungarian population that has been selected in multiple stages with proportional stratification. No clustering was applied, consequently sample has no design effect.

A total sample of settlements is divided into two parts:

(1) cities over 80,000 inhabitants

(2) other settlements

(1) Cities over 80,000.

All the 10 Hungarian cities (Budapest + 9 cities) are selected to the settlement sample. In these cities individuals are selected following the simple random sampling schema, which is proportional to town's population 18+ and counter-proportional to the assumed response rate and non-eligible cases. Different estimated response rates and ineligible addresses are applied in Budapest, and in the other cities.

(2) Other settlements

(Including suburb of Budapest)

This part of the sample is selected using a stratified two-stage sampling design:

- Stratification: proportional sample allocation to six regions.

- First stage within each stratum: the selection of the sample settlements (towns and villages) is selected with probabilities proportional to the number of inhabitants aged 18+. The selection of the PSUs (primary sampling unit) is without replacements, so each PSU can be selected only once.

- Second stage within a selected settlement: individuals are selected following the simple random sampling schema, which is proportional to settlements population 18+ and counter-proportional to the assumed response rate and non-eligible cases. Different estimated response rates and ineligible addresses are applied in suburb of Budapest, towns and villages.

The names and addresses of respondents are obtained from the Central Registry and Electoral Office, with the help of simple random sampling.

Fieldwork institute: TÁRKI RT Social Research Centre

Fieldwork methods: face to face interview

Sample size: in the final ISSP file:1035

Response rates:

2300	A – Total issued (total sample)
238	B – Ineligible (address vacant, wrong ages,...)
2062	C - (= A - B) Total eligible (in scope sample)
1035	D – Total ISSP questionnaires received
1027	E - (= C - D; = F + G + H) Total non-response
487	F – Refusals (refusing to take part)
161	G – Non-contact (never contacted)
379	H – Other non-response

Language: Hungarian

Weighted: yes or no, whether a weighting factor exists in the data-set:
                        YES

Weighting procedure: Exact description of the weighting procedure / algorithm
                        In order to correct the sampling error we computed a weighting variable
                        taking into account the type of residence (Budapest, other city, village),
                        sex (male, female), age (18- 29, 30- 39, 40- 49, 50- 59, 60- 69, 70- x)
                        and highest educational level (inadequate education to university). The
                        weight of each cases was computed as WEIGHT = (n/n')* (N'/N),
                        where N = respondent above the age of 18 in the sample of 2001 census,
                        N' = 1035, n = frequency of the population category in the census
                        subsample the case belongs to, n' = parallel frequency in the 2004
                        Citizenship module.

Ireland
ISSP 2004 – Citizenship I
Study Description

Study Description: **Ireland**

Study title: Citizenship 2004

Fieldwork dates: -

*Principal   -
investigators:*

Sample type: The sample used in the ISSP survey was selected as a three-stage
                           clustered probability sample of the adult population drawn from the
                           electoral register.

                           First stage of sample selection

                           At the first stage of sample selection the national population on the
                           register was grouped into clusters with a minimum population size of
                           1,000 adults. (These clusters were based on the most geographically
                           disaggregated areal units available in the country – the so-called
                           District Electoral Divisions (DEDs)). These clusters with a minimum
                           population size of 1,000 persons constituted the primary sampling
                           units (PSUs). The PSUs were selected with a probability proportionate
                           to size (PPS). A total of 100 sampling points was selected.

                           Second stage of sample selection

                           At the second stage of selection the target household was selected
                           from within each PSU on a systematic basis using a random start.

                           Third stage of sample selection to identify the respondent

                           At the third stage we selected the target person for interview within
                           household from within the set of persons aged 18 years or more using
                           a so-called 'next birthday' rule. The next birthday' rule is a simple
                           randomisation procedure which provides a randomly selected
                           respondent in much the same way as a Kish grid etc.

                           What, if any, are the known limitations of your net sample?

                           Using the Electoral Register as the population frame means that very
                           recently generated households which are not yet registered on the list
                           have, by definition, a zero probability of selection. This is not a major
                           issue and is, in fact, common to all population lists. The data were
                           reweighted using a minimum information loss program which
                           controls, *inter alia*, for age; gender; household size (number of adults
                           in the household); marital status; level of educational attainment;
                           region; principal economic status. This reweighting scheme addresses
                           any such small bias as may emerge from frame effects.

Fieldwork methods:

Sample size: 1,648

Response rates:

Total number of <u>starting</u> or <u>issued</u> names / addresses (gross sample size)	1,648
addresses which could not be traced at all / selected respondents who could not be traced	48
addresses established as empty, demolished or containing no private dwellings	40
selected respondent too sick / incapacitated to participate	
selected respondent away during survey period	
selected respondent had inadequate understanding of language of survey	
no contact at selected address	
no contact with selected person	
personal refusal by selected respondent	252
proxy refusal (on behalf of selected respondent)	
other refusal at selected address	
other type of unproductive reaction (please write in full details in the box below) [Most of these were 'soft' refusals where the respondent was not available for interview throughout the fieldwork period despite repeated call-back]	220
full productive interview (net sample size)	1,065
partial productive interview	23

Language: English

Weighted: Yes

Weighting procedure: The weights were constructed using a minimum information loss routine with marginal constraints based on age; gender; Principal Economic Status; region; marital status; level of educational attainment; household size (number of persons aged 18 years and over). As described above at Q34, the number of persons aged 18 years or over resident in the household is a critical dimension of the re-weighting schema as this controls for the design effects resulting from pps for household selection which results from using the Electoral Register as a population frame.

Study Description

Study Description: **Israel**

Study title: ISSP Citizenship

Fieldwork dates: 15.02 – 01.09.2005

Principal   Noah Lewin-Epstein
investigators:

Sample type: The sample designed to be representative of only adult citizens of your country.
First Stage: Division into strata (based of geographic location, community size and socioeconomic characteristics).
Second Stage: Sampling of statistical areas (the smallest ecological unit) within strata.
Third Stage: Sampling of addresses within statistical areas for the interviewing.
Fourth Stage: Interviewing of specified number persons within statistical unit.

Fieldwork institute: B.I. and Lucille Cohen

Fieldwork methods: Face-to-face

Sample size: 1034

Response rates:

1.901	A - Total issued (total sample)
132	B - Ineligible (address vacant, wrong ages,...)
1.769	C - (= A - B) Total eligible (in scope sample)
1.034	D - Total ISSP questionnaires received
735	E - (= C - D; = F + G + H) Total non-response
418	F - Refusals (refusing to take part)
257	G - Non-contact (never contacted)

60	H - Other non-response
	    49 respondents have inadequate understanding of language of survey

ISSP 2004 – Citizenship I
Study Description

Study Description: **Japan**

Study title:	ISSP Citizenship
Fieldwork dates:	November 13 to November 21, 2004
Principal investigators:	Hiroshi ARAMAKI, Toshiyuki KOBAYASHI (NHK Broadcasting Culture Research Institute)
Sample type:	Two-stage stratified random sample of Japanese 16 or older First, urban and rural areas are divided into a number of groups (strata) based on similarities in local features and industrial structures. From each of those groups, streets and village-sections are again grouped together to form sampling units. From among such sampling units, 150 survey spots are selected at random. Then, from *the Basic Resident Registers* for these spots, 12 sample individuals aged 16 or over are selected according to a fixed random number.
Fieldwork institute:	Central Research Services, Inc.
Fieldwork methods:	Self-completion (drop-off and pickup later)
Sample size:	Issued 1.800, Achieved 1.343

Response rates:

1.800	A - Total issued (total sample)
65	B - Ineligible (address vacant, wrong ages,...)
	21 respondents were not found
	44 respondents moved somewhere else
1.735	C - (= A - B) Total eligible (in scope sample)
1.343	D - Total ISSP questionnaires received
380	E - (= C - D; = F + G + H) Total non-response
213	F - Refusals (refusing to take part)
107	G - Non-contact (never contacted)
	18 respondents had not lived at home for one year or more
	43 respondents had not lived at home for 10-364 days
	22 respondents had not lived at home for 9 days or less
	6 respondents were not at home temporarily
	18 respondents were ill in bed at home
72	H - Other non-response
	4 respondents were dead
	54 respondents didn't return or lost the questionnaire
	8 wrong respondents were fielded

Mexico
ISSP 2004 – Citizenship I
Study Description

Study Description: **Mexico**

Study title: Citizenship (ISSP 2004 Module)

Fieldwork dates: *3-12* February , 2006

*Principal   Federico Curiel and Jorge Godinez, Instituto de Mercadotecnia y
investigators:*   Opinión (IMO).

Sample type: For the realization of the survey a design of multistage stratified
                        random sample was applied with two partitions of the universe of
                        national population aged 18 and over and four selection stages for the
                        urban cases and three for the rural cases.
                        First partition: The universe was divided in 8 strata of states.
                        Second partition: Inside each stratum the universe was divided by the
                        size of the cities, according to population size: Metropolis, more than
                        500,000, big city, from 100,000 at 500,000; middle city, from 50,000
                        to 100,000, and small city, less than 50,000, for the rural case, are the
                        towns with less than 2,500 inhabitants.
                        First selection stage: Assigned the cases for stratum Ageb's was
                        selected for the urban cases and towns for the rural ones. They were
                        applied a total of 16 interviews on the average by Ageb and 10 cases
                        for town.
                        The Ageb means Basic Geo-statistic Area, they are perfectly defined
                        geographical units and with inhabitants group with known
                        demographic and economic variables, its delimitation is smaller to the
                        municipality and it facilitates studies for clusters.
                        Second selection stage: Inside each selected Ageb two blocks were
                        chosen for the urban case, for the rural case the housings were chosen.

                        Third selection stage: For the urban case they were selected 10
                        housings on the average by block, in the rural towns it was selected
                        the responsive individual by Kish rule.
                        Fourth stage: It only applies for the urban cases and refers to the
                        selection of the responsive individuals by Kish rule.

Netherlands
ISSP 2004 – Citizenship I
Study Description

Study Description: **Netherlands**

Study title: "ISSP 2003+2004: Nationale Identiteit en Burgerschap. Schriftelijke vragenlijst 2004-2005."

Fieldwork dates: Dec. 12 2004 – Mar. 31 2005.

Principal investigators: Harry B.G. Ganzeboom

Sample type: (Step 1:) Simple random address sample, (Step 2:) random date selection of household member

The data will appear in the ISSP publicly released data as two independent data-files. The user should be aware that the social background variables are identical between these modules, and the two files should be matched, not added.

The user should also be aware that the complete datafile (described in this documentation), including all the collected information on demography and social background, as well as the standardized ISSP variable is available has been archived at DANS [Data Archiving and Networked Services] in the Hague, the successor to the Steinmetz Archive. The appropriate bibliographic reference to this file will be:

Ganzeboom, Harry B.G. [principal investigator] & Elsbeth de Groot, "ISSP 2003+2004: Burgerschap en Nationale Identiteit. Schriftelijke vragenlijst 2004-2005." [machine-readable data file]. The Hague: DANS. To be archived.

QUESTIONNAIRE DEVELOPMENT AND POST-PROCESSION

The questionnaire was developed at VUA in close consultation with SCP. For the repeat questions of the modules translation from previously held modules were copied. Translations of new questions were developed in in-depth discussion between VUA and SCP researchers. The background variable modules were drafted anew, in close correspondence with specifications in the ISSP master documentation. However, the mandatory background questions were complemented with a large number of supplementary questions, in particular on parental background.

   The questionnaire was organized in four consecutive parts:
   Z01..Z08H_ACT: Demographics: age, sex, marital status, education of respondent and spouse, household box
   A01A..A24: National Identity module:
   B01..B66: Citizenship module.
   Z09U..Z42: Demographics: employment, occupation, father's and mother's education and occupation, income, religion, media participation, political participation, union membership, other ISSP

standard variables.

The 2003 and 2004 modules were thus asked in consecutive order, without interruption by other questions.

All questionnaires were checked on completeness and inconsistencies upon mailback. Multiple answers were resolved by choosing randomly one of the chosen responses. All verbatim information to open ended questions was transferred to a coding file. All coding was conducted by the principal investigator. The coding file (with the verbatim information) has been archived with the datafile, but is only accessible with special permission of the PI.

Response: 41,3% (*)

The fieldwork consisted of the following stages:
One week before fielding an advance letter was sent to all 4500 addresses in the sample. A few reactions were received at this stage that indicated that the address was out of frame (address does not exist, inhabitants have moved, undeliverable) or respondents could or did not want to participate.
Questionnaires were mailed.
One week after the first mailing, a reminder on postcard was sent to all addressed.
Three weeks after the first questionnaire was sent, a reminder in the form of a formal letter was sent. This letter invited respondents who did not want to participate, to return the questionnaire empty – in order not to be reminded again.
Six weeks after the first questionnaire, a second copy of the questionnaire was sent.
Two weeks after the delivery of the second copy of the questionnaire, all respondents with a known phone number were reminded by phone. Their responses were classified into (1) phone refusal, (2) willingness to participate. When respondents told us they had not received a questionnaire or had thrown it away, a third copy of the questionnaire was sent.
Two weeks after the initial phone reminder, respondents who had expressed willingness to participate, were reminded once again by phone.

Throughout the fieldwork, respondents could call (in fact: call an answering machine) to ask further information, refuse participation or make comments. Once respondents had expressed non-willingness to participate, either by phone or mail, they were not contacted again. General information on the ISSP project and the datacollection was also provided on a website, that was referred to on the questionnaire and all the information send to the respondent.

Table 1: Mailings and response pattern						
Week	Arrival Date	Action	Sent out	Response End week	Refused	Out of frame

Fieldwork institute:　　Free University Amsterdam

Fieldwork methods:　　Postal survey

Sample size:　　1823

The sample was drawn from the national addresses list of DMdata, a subsidiary of TPG, the Dutch national postal agency. The specifications called for one randomly drawn residential address each from 4500 randomly chosen six-digit postal code tracts. A postal code tract typically contains from a dozen up to a few dozen addresses. For over 85%, the addresses are associated with a family name – the remaining 15% were addressed as "To main occupant [hoofdbewoner]". The addresses were matched with the national phone register, which resulted in 70% of addresses being associated with a phone number.

Sampling within households was conducted by random date selection. The addresses were stratified in 12 random date groups and the addressed was invited to have the questionnaire completed by the household member whose birthday was closest to the date specified.

Table 2: Response and non-response			
	N		
Initial sample	4500	100.0%	
Undeliverable	101	2.2%	

Net sample	4399		100.0%
Valid response	**1823**		**41.4%**
Explicit refusal	652		14.8%
No response	1924		43.7%

Language: Dutch

Weighted: No

Weighting procedure: post-stratification
There are four pieces of information that can inform us about selectivity that occurs because of non-response, and can be used to post-stratify the data.

Sample-frame information
Location of the sampled address. It is to be expected that response in urban areas, and in particular in the four major cities (Amsterdam, Rotterdam, The Hague, Utrecht) is lower than elsewhere.
Name: for about 11% of the sample there was no access to a name of the inhabitants. This has decreased the response.
Phone: for about 32% of the sample there was no access to a phone number. Apart from obstructing the opportunity to use the fourth and fifth (phone) reminders, it is to be expected that not being listed in the phone-register is a correlate of willingness to participate.
Foreign family name: Family names in the Netherlands can with considerable accuracy be classified as foreign and non-foreign. In particular Moroccan and Turkish names are easy to recognize, this is much harder for Surinamese and Antillean names.

In 13 cases, the respondents had removed their identification number from the mailed back questionnaire, although they supplied useable information. These questionnaires cannot be connected to the sample frame information and thus cannot be post-stratified in this respect (and these respondents kept receiving reminders to the very end…)

Ecological information (neighbourhood characteristics)
Neighbourhood characteristics (connected to the detailed postal code in the sample frame) can be expected to predict response patterns
This information has not been used for post-stratification. Its usefulness is left for future investigation.

Household box information
Selectivity may also occur within responding households. Each respondent was asked to complete a household box , which gives access to information of all household members with respect to:
    Sex
    Age
    Position in household
    Main activity

Highest completed / current education.
In addition, we have information on:
Total number of persons in household eligible for the sample (i.e.
all household members of 16 and older).
Using this information, a synthetic sample can be formed that is
representative of all household members in the designated age bracket
(16-75+). The actual sample should be representative of this synthetic
sample. All this information was used to develop the post-
stratification weight.

Netherlands
ISSP 2004 – Citizenship I
Characteristics of National Population

<u>National benchmark information</u>
Finally, sample distributions can be compared to known distributions
in the national population or other (presumably more representative)
surveys. However, in order to make a valid comparison, one has to
make sure that the variables in question are identically measured. We
believe this can be done with sufficient precision with respect to:

Formal marital status
Age
Sex
Participation in last national election

Note that we do not believe that highest/current education or main
activity can be compared to national benchmark information, because
responses to these questions are too sensitive to question formats.

The weight was developed using iterative proportional fitting with a
precision of ± 1% of the margins of the benchmark distributions.

Sources: * Sampling frame, ** Household box, *** Population statistics

In summary, it can be said that one group was severely underrepresented in our effective sample: young adults, in particular in as far as they live in their parents' households. Among these, the younger children (16 year olds) are particularly underrepresented. However, the highest marginal weight (2.1) is generated to non-voters. Non-voting has been found to be a strong correlate of non-response in surveys, as is the presence of name and phone number in the address register. Note on the other hand, that the sample is fairly representative with respect to education and main activity. An unexpected finding is that the four large cities are only moderately underrepresented.

Deviations from ISSP Questions:	See notes
Literature:	-

SAMPLING INFORMATION

Sampling Procedure

The sample was randomly selected from the 2002 New Zealand electoral roll, which contains the names of all registered voters over the age of 18 years. The achieved sample is generally representative of the New Zealand population over 18 years of age, but people under 30 are underrepresented in the sample, while those over 30 are overrepresented, and the proportion of women is higher than in the population whereas the proportion of men is lower. The data have **not** been weighted to correct these biases. However, comparisons of unweighted survey results with results obtained from the sample weighted so that its age-sex distribution matched that of the New Zealand population over 18 (taken from 2001 Census), showed only minor differences between estimates.

Survey Administration Procedure

The questionnaire together with a covering letter was sent to the 2500 selected participants on 29 June 2004. A reminder letter was mailed to participants whose questionnaires had not been returned by 15 July. A second reminder and another questionnaire were sent to those participants who had not returned their questionnaires by 29 July. The survey was closed off on 7 September, 10 weeks after the initial mailing.

Response Rate

The response rate achieved was 1370/(2500-293) = 62.1%

	Response from first mailing	**Response from second mailing**	**Response from third mailing**

Norway
ISSP 2004 – Citizenship I
Study Description

Study Description: **Norway**

Study title: Citizenship

Fieldwork dates: 29.09 2004 - 26.11 2004

Principal investigators: Knut Kalgraff Skjåk, NSD.
Torill Aalberg, Department of Sociology and Political Science, The Norwegian University of Science and Technology.
Anders Todal Jenssen, Department of Sociology and Political Science, The Norwegian University of Science and Technology.
Lawrence E. Rose, Department of Political Science, University of Oslo.

Sample type: The sample was a simple random sample of individuals from the Central Register of Persons, aged 18-79 years.

Fieldwork institute: TNS Gallup

Fieldwork methods: The survey was conducted as a mail survey. The fieldwork included one reminder and two follow-ups with questionnaires.

Sample size: 1404

Response rates:

2499	A - Total issued (total sample)
108	B - Ineligible (address vacant, wrong ages,...)
2391	C - (= A - B) Total eligible (in scope sample)
1404	D - Total ISSP questionnaires received
987	E - (= C - D; = F + G + H) Total non-response
117	F - Refusals (refusing to take part)
848	G - Non-contact (never contacted)
22	H - Other non-response

Language: Norwegian

Weighted: No

Weighting procedure: -

Known systematic properties of the sample:
Deviations from ISSP questionnaire: Net sample:
People with higher education slightly over-represented

Philippines
ISSP 2004 – Citizenship I
Study Description

Study Description: **Philippines**

Study title: ISSP 2004 Module on Citizenship in the Philippines

Fieldwork dates: June 4 – 29, 2004

Fieldwork: **Location**
The ISSP 2004 Module on Citizenship survey covers the entire Philippines and had four major study areas: National Capital Region (NCR), Balance Luzon (outside NCR), Visayas and Mindanao.

Timetable:
Fieldwork:

National Capital Region	-	June 4-29, 2004
Balance Luzon	-	June 9-23, 2004
Visayas	-	June 7-21, 2004
Mindanao	-	June 8-18, 2004

Respondents: Data was gathered through face-to-face interviews of voting-age adults (18 years old and above). It asked a host of questions about political, social and economic issues, some undertaken as regular indicators monitored over time and others reflective of current concerns as well as specific personal information. It also obtained information and background characteristics about the household, the household head and family members.

Sampling Method: <u>Sampling Sizes and Error Margins.</u> An indicator of data quality used is the standard error of the estimate, on which the margin for sampling error is based. As survey statistics are mostly proportions, the key measure of data precision is the standard error of a proportion taken from a sample. It is <u>computed as follows:</u>

$$\pm Z * \sqrt{p(1-p)/n}$$

Where Z, at 95% confidence level is 1.96; p is the sample proportion estimate and n is the sample size. The overall sample size of 1,200 voting-age adults for each of the questionnaires gives a maximum error margin of ±2.83% at the 95% confidence level, assuming a simple random sampling design. The sampling error is at its highest when the true proportion being estimated is close to 50%.

The following approximate 95%-confidence margins for sampling error should be made when aggregating data at various levels:

	Sample Size	Error margin
Philippines	1200	±3%
National Capital Region	300	±6%
Balance Luzon	300	±6%
Visayas	300	±6%
Mindanao	300	±6%

However, somewhat higher error margins should be expected since multi-stage cluster sampling was used; this design-effect is not readily measurable through established statistical software.

Sampling scheme. The Philippines were divided into four study areas: National Capital Region(NCR), Balance Luzon, Visayas, and Mindanao. The sample size for each of the four study areas was 300 voting-age adults.

Multi-stage probability sampling was used in the selection of sample spots. The allocation of sample units in each stage was as follows:

	Sample Prov.	Sample Mun.	Spots	Probability Respondents
National Capital Region	-	17	60	300
Balance. Luzon	10	15	60	300
Visayas	5	15	60	300
Mindanao	5	15	60	300
	20	62	240	1200

** The number of municipalities for Balance Luzon, Visayas and Mindanao is dependent on what spots, i.e., barangays, are actually selected. Thus, the number of municipalities may vary.

For the National Capital Region

Stage 1. Selection of sample Spots(Barangays)

For NCR's first stage, 60 Barangays are distributed among the 17 NCR cities and municipalities in such a way that each city/municipality was assigned a number of Barangays that was roughly proportional to its population size. An additional provision was that each municipality must receive at least one precinct. Barangays were then selected at random from within each municipality.

Stage 2. Selection of Sample Households

In each sample barangay, interval sampling is used to draw 5 sample households:
A starting point in the spot map was assigned at random.
The first sample household was selected randomly from the households nearest to the starting point. Subsequent sample households were chosen using a fixed interval of 6 households in between the sampled ones; i.e. every 7th household was sampled.

Stage 3. Selection of Sample Adult

For the third stage, in each selected household, a respondent is randomly chosen among the household members who were 18 years

of age and older, using a probability selection table. In selecting the probability respondent of a household, only male family members were pre-listed in the probability selection table of odd-numbered questionnaires; only female family members were pre-listed for even-numbered questionnaires. In cases where there was no qualified probability respondent of a given gender, the interval sampling of households would continue until five sample respondents were identified.

For the rest of the Philippines

Stage 1. Allocation and selection of sample provinces
Balance Luzon was further divided into 5 regions: CAR + Region II, Region I, Region III, Region IV and Region V; Visayas into 3 regions: Region VI, Region VII and Region VIII; and Mindanao into 6 regions; Region IX, Region X, CARAGA, Region XI, Region XII and ARMM. Using probability proportional to population size (PPS) of the region, the allocation of 10 provinces in Luzon, and 5 in Visayas and 6 in Mindanao were as follows:

Luzon		Visayas		Mindanao	
CAR/REG II	1	Region VI	2	Region IX	1
Region I	1	Region VII	1	RegX	1
Region III	2	Region VIII	1	CARAGA	1
Region IV	3	Non-quota	1	Region XI	1
Region V	1			Region XII	1
Non-quota	2			ARMM	1
Total	10		5		6

The non-quota provinces were selected without replacement using probability proportional to their remainders. The remainders are fractions derived when the proportion of the regions (based on their respective study area) are multiplied by 10 for Luzon, and 5 for Visayas and 6 for Mindanao. For instance, if 1.45 is obtained for Region I, then 1 province is assigned to this region and remaining fraction of 0.45 is included for the allocation of the non-quota province.

Given the quota for each region, sample provinces were then selected by PPS, without replacement. An additional provision is that each region must receive at least one province.

Stage 2. Allocation and selection of sample Spots

Once the sample municipalities were selected, 60 spots for each of the major areas were allocated among the sample municipalities. Using the quota set for spots in each region, the spots were distributed in such a way that each municipality was assigned a number of spots roughly proportional to its population size.

Luzon		Visayas		Mindanao	
CAR/REG II	8	Region VI	24	Region IX	10
Region I	8	Region VII	22	RegX	9

Total	60		60		60

Sample barangays within each sample province were randomly selected with equal probabilities.

Sample barangays were then classified as urban or rural based on the latest National Statistics Office classification (2000).

Stage 3. Selection of Sample Households

For the third stage, within each sample spot, five households were established by systematic sampling. In urban barangays as well as in rural barangays, designated starting points were randomly assigned - it was either: 1) a municipal/barangay hall, 2) a school, 3) the barangay captain's house, or 4) a church/chapel/mosque. A random start from 1-6 was also randomly generated for each spot. Thus, if a particular spot has a random start of 4, the first sample household should be the 4th household from the designated starting point. The sampling interval for urban barangays was seven, while for rural barangays it was two.

Stage 4. Selection of Sample Respondents

For the fourth and final stage, as discussed earlier, a respondent was randomly chosen from among the voting-age adults in each selected household using a probability respondent selection table.

Research Methodology:

a. Preparation

   1. Questionnaire

   The definitive language-version of the questionnaire, Tagalog, was translated into English, Cebuano, Ilonggo, Ilocano and Bicolano by language experts. Then the language translation was translated back to Tagalog by another set of experts to make sure that the messages were conveyed accurately.

   2. Pre-Testing and finalizing the questionnaire

   SWS pre-tested the questionnaire on 10 voting-age adults from different socio-economic classes in order to:
   - Determine the time length of the interview
   - Improve the wording of the questions, if necessary
   - Eliminate unnecessary questions or add new items, as the

case may be
- Test question sequence and identify biases
- Correct and improve translation
- Change open-ended questions into multiple choice questions
- Find out which items are conceptually vague
- Check accuracy and adequacy of the questionnaire instructions
- Determine whether the focus of the question is clear
- Identify interviewer's recording difficulties

3. Training

(a) Training was conducted in 8 central locations: Manila, Baguio City, Iloilo City, Cebu City, Baybay, Leyte, Zamboanga City, Cagayan de Oro City and Cotabato City. The interviewers needed to cover Luzon were trained in Manila and Baguio City. Those trained in Iloilo City covered Iloilo and Negros Occidental, those trained in Cebu City
covered Bohol and Cebu, while those trained in Baybay, Leyte covered Eastern Visayas areas. Those trained in Zamboanga City covered Zamboanga del Sur and Sulu areas, those trained in Cagayan de Oro City covered Misamis Oriental and Surigao del Norte, while those trained in Cotabato City covered North and South Cotabato areas.

(b) Training time – The minimum training time for group supervisors and interviewers was 3 days prior to field implementation.
(c) Training Activities – These mainly consisted of:
> One or two day's office training to learn the basics of the project.
> Mock interviews with co-workers to get accustomed to the flow of interviewing and questionnaire format.
> Interviews were practiced with a supervisor until the interviewer could be left on her own.

(d) Evaluation of interviewer's work - All first interviews of each field interviewer were observed by her field supervisor, and then evaluated. Only after meeting a certain evaluation criteria was an interviewer left to interview on her own, although her field supervisor always stayed within the vicinity of the sample spot to conduct checks.

b. Field Work

(1) Workers on Hand
> For this project, a total of 53 field staff were deployed:

	Field Manager = 1
NCR	Field Supervisor = 1
	Field Interviewers = 12
Balance Luzon	Field Anchors = 2
	Field Auditors = 3
	Field Interviewers = 8
Visayas	Field Anchors = 2
	Field Auditors = 1
	Field Interviewers = 10

Mindanao   Field Anchors = 3
                                Field Auditors = 0
                                Field Interviewers = 11

(2) Supervision
Supervisors reporting to the field manager monitored the
study full-time. They observed interviewers, (at least 10% of
total interviewers were observed by supervisors), followed-
up   and did surprise checks on the field interviewers. They also
ensured that field logistics were received promptly and
administered properly.

(3) Spot-checking
Part of quality control was to make sure at least 30% of each
interviewer's output was spot-checked and back-checked.
Once an incomplete or inconsistent answer was spotted in the
questionnaire, the field interviewer went back to the
respondent's house to re-ask the question for verification.

c.   Number of calls and Substitution
A respondent not contacted during the first attempt was visited for
a second time. If the respondent remained unavailable, a
substitute who possessed the same qualities (in terms of gender,
age bracket, and socio-economic class) as the original
respondent   was interviewed. The substitute respondent was taken
from
another household beyond the covered intervals in the sample
precinct/barangay.

d. Field Editing
(a). After each interview, the interviewer was asked to go over her
own work and check for consistency.
(b). All accomplished interview sheets were submitted to the
assigned group supervisor who, in turn, edited every interview.
(c). Data Processing
(1) Office editors conducted final check on all interviews prior
to coding.
(2) A data entry computer program verified and checked the
consistency of the encoded data before data tables were
generated.

Weighting procedure: To yield representative figures at the national level, census-based population weights were applied to the survey data. The weight projection was computed by dividing the projected population in the area by the sample size of the same area. Appropriate projected factors were applied so that original population proportion were reflected in the data tables using this formula:

$$\text{Projection factors (Weight)} = \frac{\text{Population}}{\text{No. of Interview}}$$

For questions answered by the sample voting-age adults, the following projection factors were used:

	2004 NSO Projected population Aged 18 and above	Total Sample size (PR)	Projection factor for 1 Probability Respondent (000)
NCR	7,245,306	300	24.1510198809
Balance Luzon	20,796,326	300	69.3210865858
Visayas	9,777,073	300	32.5902439969
Mindanao	11,304,824	300	37.6827479489
TOTAL	**49,123,530**	**1,200**	

For questions pertaining to household(HH), the following projection factors were used:

	2004 NSO Projected HH Population	Total Sample size	Projection factor (000)
NCR	2,335,161	300	7.7838706845
Balance Luzon	6,889,866	300	22.9662193570
Visayas	3,286,814	300	10.9560457079
Mindanao	3,806,091	300	12.6869710214
TOTAL	**16,317,932**	**1,200**	

For questions pertaining to household members, the following projection factors were used:

	2004 NSO Projected HH Population	Total Sample size	Projection factors (000)
NCR	11,070,287	1,489	7.4347125588
Balance Luzon	34,914,835	1,465	23.8326518771
Visayas	16,807,079	1,512	11.1157929894
Mindanao	19,871,398	1,507	13.1860637027
TOTAL	**82,663,599**	**5,973**	

The SPSS version of the data file is already weighted according to

The SPSS version of the datafile is already weighted according to the above projection factors. As the data are weighted, the total number of cases that appear is 49,124. The figure is in thousands, i.e., 49,123,530 persons representing NSO's projected number of adults (18 years old and above) for year 2004 based on the 1995 Census.

Researchers who are defining data using the ASCII files should apply these projection factors.

Poland
ISSP 2004 – Citizenship I
Study Description

Study Description: Poland

Study title:	Polish General Social Survey/ISSP, 2003/04

Fieldwork dates: January, 2005

Principal investigators: Bogdan Cichomski, Institute for Social Studies, Warsaw University (ISS UW) and Warsaw School of Social Psychology (SWPS)

Sample type: Multi-stage area probability sample.
The sample was drawn from The Common Electronic Population Evidence System - PESEL (a governmental agency).

Sampling procedure consists of the three stages:
1. In each of the 16 voivodships in Poland places of living were divided up into three categories
   1) capital of the region
   2) other cities
   3) villages
In voivodships with the higher number of people the class "cities" was additionally divided up into 2-6 smaller categories. In Mazowieckie and Slaskie voivodships there was also a division into two strata in the "villages" class.
As an effect there was 65 strata taking into consideration the administrative division of the country and type and size of the place of living.

Assumed sample size was divided up into the strata taking into consideration different completion rates in classes of places of living in voivodships. It means that from classes of places of living where the completion rates are known to be lower then in other there was an over-representative sub-sample sampled.

2. Then in CBOS (Public Opinion Research Center) cities and villages communes were sampled. After that in PESEL data-base some small areas of the cities and villages communes were sampled. Persons to be interviewed were chosen also from the PESEL data-base from the previously selected areas. In cities, small areas covered some streets and it's neighborhood and in villages the areas of one village and/or some of it's streets.
3. In each stratum at least two small areas were sampled. From each small area six adults living in different locations and in different households were sampled.

Fieldwork institute: Public Opinion Research Center (CBOS), Warsaw

Fieldwork methods: Face to Face supplement completed by interviewer after the PGSS

interview

Sample size: 1277 = number of respondents achieved on ISSP 2003

Response rates:

2106	A - Total issued (total sample)
204	B - Ineligible (address vacant, wrong ages,...)
1902	C - (= A - B) Total eligible (in scope sample)
1277	D - Total ISSP questionnaires received
625	E - (= C - D; = F + G + H) Total non-response
218	F - Refusals (refusing to take part)
325	G - Non-contact (never contacted)
82	H - Other non-response

Language: Polish

Weighted: YES

Weighting procedure: Weighting procedure assumes that after weighting the sample size is equal to the number of completed interviews.

$$\text{weight: } W1_{is} = \frac{r_{is}}{\sum_{i=1}^{n} r_{is}} \; {}^{*}n$$

where:

i – record ID , i=1,2,.......n

n – the number of completed questionnaires

N – the number of inhabitants who are 18 or older.

r_{is} - completion rate in the class of place of living s where the i interview was conducted.

$$r_{is} \; \frac{LW_s}{LZR_s}$$

LW_s - sample size drawn in the class of the place of living s, proportional allocation assumed

LZR_s - number of completed interviews in the class of the place of living s

s – class of the place of living (s=1,2,….,6)

    s=1 - village

    s=2 – cities up to 19999 inhabitants

    s=3 – cities 20000-49999 inhabitants

    s=4 – cities 50000-99999 inhabitants

    s=5 – cities 100000-499999 inhabitants

    s=6 – cities 500000 and more inhabitants

After stratification „ex post" for k-categories weights were calculated taking into consideration the structure of polled population on the basis of statistical data coming from the Central Statistical Office (GUS) in division for villages and cities, sex and age category.

$$W2_{i_k} = \frac{\left(\dfrac{X_k}{\sum\limits_k X_k}\right) * 100}{\left(\dfrac{\sum\limits_{i_k=1}^{n_k} W1_{is_k}}{\sum\limits_{i=1}^{n} W1_{is}}\right) * 100}$$

$$\left(n = \sum_k n_k\right)$$

$$\left(n = \sum_{i=1}^{n} W1_{is}\right)$$

where:

X_k - number of people in k-category according to GUS data

$X = \sum\limits_k X_k$

i_k - questionnaires by record ID which belong to the k-category

n_k - total number of questionnaires which are rated to k-category

$$WX_{isk} = W1_{is} * W2_{i_k}$$

WX_{isk} weight for i-respondent belonging to the k-category and drawn in s-class of the place of living.

Known systematic properties of the sample:	No biases or other deviation of the sample (after weighting; see: National Population Characteristics, 18 years or older; POLAND). You can observe in the National Population Characteristics for Poland some deviations in two highest age categories which is caused by different age grouping for men and women and used for weight calculation.
Deviations from ISSP questionnaire:	not asked ETNIC background and "standards" optional questions. Opional questions on the Big Five Screening (BFS) battery are included
Publications:	None

Portugal
ISSP 2004 – Citizenship I
Study Description

Study Description: **Portugal**

Study title:	Portuguese Social Attitudes 2003/2004
Fieldwork dates:	April to September 2004
Principal investigators:	Manuel Villaverde Cabral, Jorge Vala, Alice Ramos, all at Instituto de Ciências Sociais da Universidade de Lisboa.

Sample type: Stratified random probability. The sample is designed to be representative of adults aged 18 or over living in private accommodation in Portugal. The sample method involved a multi-stage design: stratification by region and habitat; Selection of sampling units (100); selection or streets: selection of addresses by random root; selection of individuals by the last birthday method.

Stratification factors used:

- NUTES (North, Center, Lisbon and Tagus Valley, Alentejo and Algarve)

 - HABITAT (less than 2.000 hab.; 2 - 10 thousand hab; 10 - 30 thousand hab; 30 - 100 thousand hab; more than 100 thousand hab)

In order to get a representative sample, near 50% of the interviews were made in habitats with less than 2000hab. Some problems came up, such us, a level of non-responses and refusals higher than expected.

Fieldwork institute:	TNS-Euroteste

Weighting procedure:

Data were weighted in order to reproduce the population distribution according to the following variables: NUTSII, size of locality, age groups, gender and educational level. Bellow we present the distribution by gender, age and educational level for the population and for the sample (not weighted and weighted).

RESIDENT POPULATION, BY AGE GROUP, LEVEL OF ACADEMIC QUALIFICATIONS AND SEX (TOTAL)

Russia
ISSP 2004 – Citizenship I
Study Description

Study Description: **Russia**

Study title: 'ISSP-2004 Module "Citizenship II"

Fieldwork dates: February, 26,2005 – March,15,2005

Principal investigators: L.Khakhulina, Levada-Center

Sample type: Description of the sampling procedure

Stratification procedure. Nationwide sample (N=1800) was divided among:

a)   7 large administrative macro regions (**Federal Okrugs**) proportionate to the size of the local population aged 18+ of each macro region

b)   5 **types** of rural districts and urban settlements* in each of 7 regions proportionate to the size of the local population aged 18+ of each type. As a result of the stratification procedure the sample was distributed among 35 strata (2 capital cities - Moscow and S-Petersburg - are considered as 2 separate strata) in proportion to the size of a stratum ($M(j,i)$**

* 1)less than 10,000; (rural districts & small urban settlements)
  2)from 10,000 – to100,000;
  3)from 100,000 – to 500,000;
  4)from 500,000 – to 1,000,000;
  5)over 1,000,000 inhabitants

** j-number of the Federal Okrug (j = 1…7)
  i- number of a type (i = 1….5)

Selection primary sampling units (PSUs). All cities over 500, 000 inhabitants were included in the sample as self-representative units. Urban and rural settlements were considered as primary sample units (PSUs). In each stratum (excluding strata of cities over 500,000 and 2 capital cities) one or more PSUs were selected with the probability proportionate to the size of PSUs . A number of PSU's selected in each stratum can be calculated by the following method. We consider as a limitation *k* - a number of household (respondents) interviewed in each PSU (8-9). A numer of PSU's in each strata define as $M(j,i) / k$.

Totally 176 PSUs were selected (128 urban settlements and rural ones).

Selection of sampling points (SSUs). Electoral districts were used as sampling points In the cities over 500,000 inhabitants the number of surveyed SSUs was defined by condition of 4-5 interviews per SSU.. In the rest of selected PSU two sampling points were randomly selected from the list of all electoral districts of this PSU.

Totally 410 sample points were selected.

Selection of households. The households were selected by a random route method. If a household or a respondent refused to participate in the survey or not been achieved for 4 visits an interviewer should

visit the next door address.

Selection of respondents. Within a household a member with the nearest birthday was selected for interviewing. In order to reach a selected respondent an interviewer visited each address up to 4 times in different days of a week and at different time of a day.

Fieldwork institute: Levada-Center

Fieldwork methods: Personal face-to face interview

Sample size: N=1800

Response rates:

6304	A - Total issued (total sample)
222	B - Ineligible (address vacant, wrong ages,...)
6082	C - (= A - B) Total eligible (in scope sample)
1800	D - Total ISSP questionnaires received
3367	E - (= C - D; = F + G + H) Total non-response
592	F - Refusals (refusing to take part)
3637	G - Non-contact (never contacted)
53	H - Other non-response

Language: Russian

Weighted: yes, a weighting factor exists in the data set

Weighting procedure: exact description of the weighting procedure / algorithm

 a) Main principles of weighting procedure

The weighting was realized for Russia in total:

The total expected number N of respondents for a certain region being treated equal

$N = N0 * P$,

where N0 denotes the size of total sample, P - the share of the region population in the entire population.

The following groups were controlled in weighting:

(1) men aged 18-24 years with high or incomplete high education
(2) men aged 25-39 years with high or incomplete high education
(3) men aged 40-54 years with high or incomplete high education
(4) men aged 55+ years with high or incomplete high education
(5) men aged 18-24 years with average education
(6) men aged 25-39 years with average education
(7) men aged 40-54 years with average education
(8) men aged 55+ years with average education
(9) men aged 18-24 years with incomplete average education
(10) men aged 25-39 years with incomplete average education

(11) men aged 40-54 years with incomplete average education
(12) men aged 55+ years with incomplete average education
(13) women aged 18-24 years with high or incomplete high education
(14) women aged 25-39 years with high or incomplete high education
(15) women aged 40-54 years with high or incomplete high education
(16) women aged 55+ years with high or incomplete high education
(17) women aged 18-24 years with average education
(18) women aged 25-39 years with average education
(19) women aged 40-54 years with average education
(20) women aged 55+ years with average education
(21) women aged 18-24 years with incomplete average education
(22) women aged 25-39 years with incomplete average education
(23) women aged 40-54 years with incomplete average education
(24) women aged 55+ years with incomplete average education

As a result of correction, every respondent $X[k]$ has the definite weight $W[k]$, within the limits $0 < W[k] < \sim10$, so that the following conditions were valid :

1) the value of $sum(W[k])$ for the region concerned was equal to N

and

2) for every controlled group $G[i]$ the value $Q[i]$ being equal to

$$Q[i] = sum(\ W[k]\ |\ X[k].belong\ to\ G[i]\ )\ /\ N,$$

was closed to a proportion $P[i]$ of group $G[i]$ in the region population

i.e. $Q[i] \sim P[i]$, $i=1,2,...,16$.

The value of J being equal to

$$J = sum(\ (Q[i]-P[i])**2\ ) + (sum(W[k])/N - 1)**2\ ,$$

was used as the criterion for minimization on the weights` sets variety.

Known systematic properties of the sample:	description of biases or other deviations of the sample
Deviations from ISSP questionnaire:	no

Slovakia
ISSP 2004 – Citizenship I
Study Description

Study Description: **Slovakian Republic**

Study title: ISSP Citizenship 2004

Fieldwork dates: start April 6, 2005 – end April 20, 2005

Principal   Department of Sociology, Comenius University in Bratislava,
investigators: Šafárikovo nám. 6, 811 01, Bratislava, Slovak Republic

Sample type: As for regional organisation of Slovakia, a model of 12 traditional
                          regions was used, since it provides for a better reflection of regional
                          particularities rather than the current model of 8 self-governing regions.
                          Based on the proportion of households living in flats in each
                          traditional region, the number of selection units (totalling 350) was
                          calculated per each traditional region. The territorial selection unit
                          represented a census district. For each territorial selection unit
                          included in the research, a starting address was selected by random
                          choice from the prepared database of streets and house numbers. On
                          each starting address, the interviewer proceeded by the method of
                          chance walk to select 4 households in which they were supposed to
                          conduct an interview. The household represented the selection unit for
                          sample production. The member of a household who was over 18
                          years old and who was to celebrate birthday the soonest was chosen to
                          be a respondent. There was no upper age limit closing the sample. The
                          sample was designed as representative for adults living in private
                          houses/flats.

Fieldwork institute: TNS SK, s.r.o., Štefánikova 19, 814 94 Bratislava 1, Slovak Republic

Fieldwork methods: face-to-face interviews

Sample size: 1.072 respondents

Response rates:

1.400	A - Total issued (total sample)
21	B - Ineligible (address vacant, wrong ages,...)
1.379	C - (= A - B) Total eligible (in scope sample)
1.072	D - Total ISSP questionnaires received
307	E - (= C - D; = F + G + H) Total non-response
205	F - Refusals (refusing to take part)
102	G - Non-contact (never contacted)
0	H - Other non-response

Language: Slovak and Hungarian languages

Weighted: Yes

Weighting procedure:	The approximation in weighting is done on the basis of a linear model referring to real structure of age, education and sex based on the 2001 Census of population, houses and flats. This procedure led to the increase in significance of persons with basic education, of male and of age groups from 18 to 29 years. The Citizenship 2004 file contains an individual analytical weight (variable 'weight'). We suggest that this weight be used in all analyses.
Known systematic properties of the sample:	description of biases or other deviations of the sample
Deviations from ISSP questionnaire:	The questionnaire contains a set Big Five Screening (BFS) questions – self-description of respondent's qualities (items 80 to 90). Items 67 to79 (indicators of trust in institutions, of interpersonal trust) were adapted to ISSP research in Czech Republic. Coding of job classification under ISCO-88 was carried by the research team from Comenius University.

Slovenia
ISSP 2004 – Citizenship I
Study Description

Study Description: **Slovenia**

Study title: Slovene Public Opinion Survey 2003/4: International Survey on
                            Citizenship and Slovenian public opinion

Fieldwork dates: October 2003 – November 2003

Principal   Niko Toš, Public Opinion and Mass Communication Research Centre
investigators: (CJMMK), Ljubljana.

Sample type: Universe: The adult residents of SR Slovenia, older then 18 years,
                            living on permanent address. Excluded: Institutionalised people.
                            Central Register of Population (a list of names and addresses
                            constantly undated by public administration) is employed as a
                            sampling frame. Sampling procedure: The sample is two-stage
                            stratified random sample from Central Register of Population , where
                            every population unit has equal probability of selection. First stage
                            PSU selection is made by probability proportional to size of CEA
                            (Clusters of Enumeration Areas). CEA are stratified according to 12
                            regions*6 type of settlement. At second stage systematic random
                            selection inside CEA brings fixed numbers of persons with name and
                            address. Split-halves samples were used for parallel SJM surveys.

ISSP 2004 – Citizenship I
Study Description

Study Description: **South Africa**

Study title: South African Social Attitude Survey 2004

Fieldwork dates: August-September

Principal   Dr.S.P Rule:
investigators: Human Sciences Research Council

Sample type: A sample of 3 500 respondents was selected throughout South Africa
                            in groupings of seven and situated in 500 census enumerator areas
                            (EAs) as determined in the 2001 census. Each EA was classified in
                            terms of the dominant lifestyle category by the Human Sciences
                            Research Council (HSRC) in its analysis of the 1996 census data. In
                            order to ensure adequate representation in the sample from each
                            province and from each of the four dominant population groups, the
                            sample was stratified by province and by population group.
                            Disproportionately large samples were selected from areas know to be
                            inhabited by the two smallest components of the population, namely
                            (i) areas with dominantly Indian populations and (ii) the Northern
                            Cape. Within the EAs, the seven households were randomly selected
                            and within the household, the respondent were selected using a Kish
                            grid.

Fieldwork institute: Human Sciences Research Council

Fieldwork methods: Fact-to-face interviews

Sample size: Number of respondents in the final ISSP file

Response rates:

3500	A - Total issued (total sample)
360	B - Ineligible (address vacant, wrong ages,...)
3140	C - (= A - B) Total eligible (in scope sample)
2775	D - Total ISSP questionnaires received
365	E - (= C - D; = F + G + H) Total non-response
304	F - Refusals (refusing to take part)
51	G - Non-contact (never contacted)
10	H - Other non-response

Language: English, Afrikaans, Tswana, Xhosa, Venda, Zulu

Weighted: Yes

Weighting procedure: Basic sampling weight bas3d on SAS Procedure Survey Select
                            compensating for unit non-response by dividing the sampling weights
                            by the response rate per EA.

Known systematic properties of the sample:	Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape

Deviations from ISSP questionnaire: In question ATTEND: For those people who have no religion, attendance of religious services was not asked. Code 00 has been assigned to those who have no religion.
KR: 00 Those who have no religion
The optional questions (V64-V69) were not asked.

Publications: Not Yet

Remarks on the Survey Questionnaire: - EDUCYRS has been derived from KR_DEGREE.
- RINCOME and INCOME were asked as follows:
RINCOME: Before taxes and other deductions, what is your total monthly average income from this job? This includes your base pay, bonuses, and other allowances. (IF THE RESPONDENT DOES NOT HAVE A REGULAR MONTHLY INCOME (EX. FARMER), THEN DIVIDE THE ESTIMATED ANNUAL INCOME BY 12.)

INCOME: Before taxes and other deductions, what is the total average monthly income of your household? This includes all sources of income (ex. work income, interest or dividends, property income, rent, pensions, welfare support, or the money personally provided by somebody) from all household members including yourself. (IF THE RESPONDENT DOES NOT HAVE A REGULAR MONTHLY INCOME (EX. FARMER), DIVIDE THE ESTIMATED ANNUAL INCOME BY 12.)

Study Description

Study Description: **Sweden**

Study title:	Citizenship
Fieldwork dates:	February 2004 to April 2004.
Principal Investigators:	Jonas Edlund (Associate Professor) and Stefan Svallfors (Professor), Department of Sociology, Umeå University, Umeå, Sweden.
Sample type:	One representative sample of the Swedish population 18-79 years.
Fieldwork institute:	SIFO.
Fieldwork methods:	Separate postal survey with several reminders. Respondents received an introductory letter and a gift (value about USD 3). The gift was free and was not associated with any obligations. See the below table for a detailed description.
Context of ISSP questionnaire:	Separate survey
Language:	Swedish
Weighted:	No
Sample size:	1295
Known bias in data:	No

Fieldwork details:

2/2	Introductory letter about the survey
9/2	Postal survey + lottery ticket
18/2	Postal reminder + questionnaire
1/3	Postal reminder + questionnaire
31/3	Postal reminder + questionnaire [only to those with unknown telephone numbers]
1-8/4	Reminder by telephone + questionnaire to those wishing a questionnaire [only to those with known telephone numbers]

Special notes on background variables referring to occupation

All occupational variables refer to the respondent's present or (if the respondent is currently not working) last occupation.
ISCO. 4-digit. Where information for 4-digit coding is not available, 3- or 2-digit codings have been applied, using zeros for the missing digits. Examples: isco code 733 is coded as 7330 in the datafile, isco code 73 is coded as 7300 in the datafile.

Response rates:

2000	A – Total issued (total sample)
73	B – Ineligible
1927	C – (=A-B) Total eligible (in scope sample)
1295	D – Total ISSP questionnaires received

Switzerland
ISSP 2004 – Citizenship I
Study Description

Study Description: **Switzerland**

Study title: ISSP 2004 Citizenship

Fieldwork dates: 16th of March 2005 until 7th of July 2005

Principal   Institut SIDOS, Ruelle Vaucher 13, CH-2000 Neuchâtel
investigators:

Sample type: The ISSP 2004 survey was combined with the „MOSAiCH" survey in Switzerland. The sampling procedure was the following:

- Stratification of the households into 6 regions (Espace Mittelland, North of Switzerland, East of Switzerland, Center of Switzerland and Italian-speaking part of Switzerland)

- Random selection of households from the extended phone register

- Sending of an information letter + a flyer on the survey

- At least 5 face to face contact attempts from the interviewer to fix a date for the interview. Households or persons that couldn't be reached after 5 attempts or households or persons that refused to participate were contacted again by the telephone central of the survey institute.

- Random selection of one person in each household with the KISH method

- CAPI Interview

Fieldwork institute: MIS Trend, Institut pour l'étude des marchés et les sondages d'opinion, Pont-Bessières 3, 1005 Lausanne

Fieldwork methods: CAPI

Sample size: 1078

Response rates:

2300	A - Total issued (total sample)
173	B - Ineligible (address vacant, wrong ages,...)
2127	C - (= A - B) Total eligible (in scope sample)
1078	D - Total ISSP questionnaires received
1049	E - (= C - D; = F + G + H) Total non-response
855	F - Refusals (refusing to take part)
45	G - Non-contact (never contacted)
149	H - Other non-response

Language: German, French and English

Weighted: Yes

Weighting procedure: The weight is defined according to the following criteria:
- probability for the repondent to be selected in his/her household
- Age
- Gender

The estimation of age and gender is based on the Swiss annual Population Statistics (ESPOP) 2004

The age was recoded into the following six categories:
1)   18-24 years
2)   25-34 years
3)   35-44 years
4)   45-54 years
5)   55-64 years
6)   65 and older

The weight is also a combination of the three criteria.

Known systematic properties of the sample: -

Deviations from ISSP questionnaire: None

Publications: -

Approximation of years of schooling in Switzerland, population 18 years and older

The Swiss federal Census asks for the highest achiedved education, not for the years of schooling. Therefore they make an approximate calculation of the years of schooling.

OFS (Swiss federal statistics office)	Years of schooling (approxim. of A. Borkowski, OFS)	ISCED code	ISCED
Aucune formation achevée	0-8	0	Not completed primary education
Scolarité obligatoire	9	2	Lower secondary
Ecole de culture générale ou préparant à une formation	12	3	Upper secondary
Apprentissage, école professionnelle à plein temps	12	3	
Maturité	13	3	
Ecole normale	13	3	
Formation professionnelle supérieure	14	4	Post secondary
Ecole professionnelle supérieure	14	5	
Haute école spécialisée	16	5	First stage of tertiary
Université, haute école	19	5-6	First and second stage of tertiary education
Sans indication			No indication

ISCED	%	Approximate years of schooling
Total	100	
Not completed primary education	3.0	0-8
Lower secondary or second stage of basic education	21.6	9
Upper secondary education	49.4	12-13
Post secondary, non tertiary education	9.5	14
First stage of tertiary education	1.1	16
First and second stage of tertiary education	6.8	19
No indication	8.6	

Taiwan
ISSP 2004 – Citizenship I
Study Description

Study Description: **Taiwan**

Study title: Taiwan Social Change Survey: the Fifth Survey of the Fourth Cycle

Fieldwork dates: 07/04/2004~for about one month

Principal investigators: Ying-hwa Chang

Sample type: Three-stage Stratified PPS Sampling
(1)PSU=township,
(2)Li(administrative unit under township,
(3)respondent

Fieldwork institute: Center for Survey Research, Academia Sinica

Fieldwork methods: Face-to-face interview

Sample size: 1781

Response rates:

4012	A - Total issued (total sample)
153	B - Ineligible (address vacant, wrong ages,...)
3589	C - (= A - B) Total eligible (in scope sample)
1781	D - Total ISSP questionnaires received
2078	E - (= C - D; = F + G + H) Total non-response
585	F - Refusals (refusing to take part)
1360	G - Non-contact (never contacted)
133	H - Other non-response

Language: Chinese(Manderin, Taiwanese, or Hakka)

Weighted: Yes

Weighting procedure: The data was weighted using an iterative proportional raking scheme. For each respondent, sample data was weighted by sex, age, urbanization and education degree groups. Weights were then generated to match the population of Taiwan area.

Known systematic properties of the sample: A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.

Deviations from ISSP questionnaire: Data does not include the variable of **R: Party affiliation.**
The codes of some variable are different from ISSP Standard Setup. These variables are TWN_DEGR, NEMPLOY, RINCOME, INCOME, TWN_PART, TWN_SIZE, and ETHNIC.

Publications: Report for Taiwan Social Change Survey (2005), Institute of Sociology.

A Comparison of the 2004 Current Population Survey

to the 2004 General Social Survey

Tom W. Smith and Seokho Kim

September, 2005

In accordance with the documentation standards of the International Social Survey Program (ISSP), we compare in Table 1 the distributions for age, gender, years of schooling, and labor force participation from the 2004 General Social Survey (GSS) with the latest available Census estimates from the 2004 Current Population Survey (CPS).[15]

First, the weighted and unweighted GSS distributions match the CPS figures about equally well overall (Table 2). The weighted figures are better on gender, the unweighted figures are closer for education, and there is no meaningful difference on age and labor force participation.

Second, the GSS-CPS matches are generally good. Age distributions correspond closely across most age groups, but the GSS did underrepresent those under 25 and 65 and over. Women are overrepresented on the GSS. This is common to virtually all full probability, random respondent surveys.[16]

Third, the GSS underrepresents the least educated and overrepresents the most educated. It appears that much of this difference results from variations between the CPS and the GSS in how the item on education is asked and coded rather than because of sampling representation. Finally, the GSS overrepresents those currently employed.

---

[15]The 2004 GSS fielded the national identity and citizenship modules.
[16]The CPS uses household informants rather than random respondents.

Table 1

A Detailed Comparison of the 2004 Current Population Survey (CPS)
and the Weighted and Unweighted 2004 General Social Survey (GSS)

A. Age

	CPS	GSS Weighted[17]	GSS Unweighted
18-24	13.0	11.0	9.0
25-29	8.9	10.0	10.0
30-34	9.4	10.1	10.6
35-39	9.7	8.3	8.9
40-44	10.6	10.8	10.4
45-49	10.2	12.1	11.7
50-54	9.0	9.4	8.8
55-59	7.5	9.2	8.4
60-64	5.7	6.6	7.4
65+	16.1	12.5	14.9
n		1480	1467

B. Gender

	CPS	GSS Weighted	GSS Unweighted
Female	51.7	55.1	55.4
n		1485	1472

C. Years of Schooling, 25 years or older

	CPS	GSS Weighted	GSS Unweighted
0-8	6.3	3.7	3.9
9-11	8.6	8.4	9.7
12	32.0	25.6	25.6
13-15	25.5	31.0	30.5
16+	27.7	31.3	30.3
n		1316	1334

D. Labor Force Participation, 16 years or older[18]

	CPS	GSS Weighted	GSS Unweighted
Employed	63.2	68.5	66.3
Unemployed	3.9	3.6	3.5
Not in Labor	32.9	27.9	30.2
n		1485	1471

---

[17] Weighted by number of eligible respondents (i.e. 18+) in the household.
[18]The GSS figures are based on 18+.

Table 2

A Summary Comparison of the 2004 Current Population Survey
and the Weighted and Unweighted 2004 GSS

(GSS % - CPS %)

	Weighted	Unweighted
A. Age		
18-24	-1.9	-4.0
65+	-3.6	-1.3
B. Gender		
Female	-3.4	-3.8
C. Years of Schooling, 25+		
0-8	-2.6	-2.4
16+	+3.7	+2.6
D. Labor Force Participation		
Employed	+5.3	+3.2
Unemployed	-0.4	-0.5
Not in Labor Force	-5.0	-2.7

Uruguay
ISSP 2004 – Citizenship I
Study Description

Study Description: **Uruguay**

Study title: Citizenship - (ISSP 2004 Module)

Fieldwork dates: From July 12 to August 16, 2004

*Principal
investigators:*   Zuleika Ferre, Giorgina Piani, Máximo Rossi from
                           Department of Economics and Juan José Goyeneche, Guillermo Zoppolo
                           from Institute of Statistics from University of Uruguay

Sample type: The sampling frame used was the 1996 Population Census. The
                           Universe population are adults (18 year-old or more) that reside in
                           Urban areas.

                           The design is stratified multistage. Two major regions are represented:
                           Montevideo Metropolitan Area (strata 1-7) and Urban population in the
                           rest of the Country (5000 or more inhabitants cities, strata 11-13).

                           In strata 1 to 7, Census Zones (usually one block) are selected by a
                           systematic proportional to size (pps) scheme ("size" being the number
                           of people on each block), then four households are selected on each
                           block, and one person per household is selected via the "next birthday"
                           rule.

                           In strata 11 to 13, four cities are selected per stratum via systematic pps
                           sampling. Size again being number of people residing on each city.
                           Census Zones, households and persons are selected in the same way as
                           in strata 1 to 7.

                           Sample allocation:

                           Table 1

Stratum	Population	Sample
1	224.396	96
2	367.513	156
3	428.118	184
4	286.499	120
5	78.576	32
6	191.474	80
7	21.368	12
11	349.935	144
12	325.190	144
13	317.427	140
Total	2.590.496	1.108

Fieldwork institute: Department of Economics – Faculty of Social Sciences, University of Uruguay

Fieldwork methods: Face to face interviews

Context of ISSP questionnaire: The Citizenship 2003 module was carried out in conjunction with de Citizenship 2004 module.

The questionnaire was structured as follows: firstly, the Citizenship module, the National Identity module, and finally, demographic variables.

Sample size: 1108

Response rates:

CONCEPT	Total
A - Total issued (total sample)	1389
B - Ineligible (address vacant, wrong ages,...)	0
C - (= A - B) Total eligible (in scope sample)	1389
D – Total ISSP questionnaires received	1108
E - (= C - D; = F + G + H) Total non-response	281
F - Refusals (refusing to take part)	176
G - Non-contact (never contacted)	72
H - Other non-response (incomplete questionnaires)	33

Language: Spanish

Weighted: The data submitted are not weighted

Weighting procedure: The weight is computed as the inverse of the selection probability for each person. The steps concerning the household selection are done with pps sampling, so the household weights are equal to number of households on stratum divided by the number of households selected on each stratum. The household weight is then expanded by the person weight, which corresponds to the number of adults on the household. On some households the number of adults goes up to 10, as a conservative measure we reduced these weights considering a maximum number of 5 for the person weight. Since we estimated the number of household per stratum, we finally adjusted the weights in order to match the number of people per stratum that appear on the previous table 1.

Known systematic properties of the sample: None that we are aware.

Deviations from ISSP questionnaire: The questionnaire was translated as closely as possible from English to Spanish, maintaining the meaning and significance of each sentence and word.

Some general comments about the demographics variables:

UNION: The code 2 was not included.

INCOME and RINCOME: In these questions, incomes were measured in categories and we coded them.

URBRURAL: It was not self assessement. Was coded by the field supervisor.

The value labels for UY_DEGR, INCOME, RINCOME, UY_PRTY, UY_REG AND UY_SIZE are:

VALUE LABELS UY_DEGR
01 'None'
02 'Incomplete primary school'
03 'Completed primary school'
04 'Incomplete secondary'
05 'Completed secondary'
06 'Incomplete technical education'
07 'Completed technical education'
08 'Incomplete university'
09 'Completed university'
10 'Incomplete non university high education'
11 'Completed non university high education'
99 'NA'
00 'Not available'.

VALUE LABELS INCOME RINCOME
01 'Less than $3.000'
02 '$3.00 to $5.999'
03 '$6.000 to $7.499'
04 '$7.500 to $9.499'
05 '$9.500 to $11.499'
06 '$11.500 to $13.499'
07 '$13.500 to $16.499'
08 '$16.500 to $20.499'
09 '$20.500 to $26.499'
10 '$26.500 to $38.999'
11 'More than $39.000'
999997 'Refused'
999998 'Dont know'
999999 'NA'
000000 'No own income, not in paid'.

VALUE LABELS UY_PRTY
01 'Red Party'
02 'National Party'
03 'Wide front Party'
04 'Independent Party'

05 'Liberal Party'
06 'Other Party'
96 'No party preference'
99 'NA'.

VALUE LABELS UY_REG
01 'Metropolitan statistical area of Montevideo'
02 'Rest of urban population'.

VALUE LABELS UY_SIZE
01 '1.597.943 urban population'
02 '992.552 urban population'.

3449 Customs, tax and related government associate professionals not elsewhere classified
3450 Police inspectors and detectives
3460 Social work associate professionals
3470 Artistic, entertainment and sports associate professionals
3471 Decorators and commercial designers
3472 Radio, television and other announcers
3473 Street, night-club and related musicians, singers and dancers
3474 Clowns, magicians, acrobates and related associate professionals
3475 Athletes, sportspersons and related associate professionals
3480 Religious associate professionals

Clerks
4000 Office workers and clerks
4100 Office clerks
4110 Secretaries and keyboard-operating clerks
4111 Stenographers and typists
4112 Word-processor and related operators
4113 Data entry operators
4114 Calculating machine operators
4115 Secretaries
4120 Numerical clerks
4121 Accounting and bookkeeping clerks
4122 Statistical and finance clerks
4130 Material-recording and transport clerks
4131 Stock clerks
4132 Production clerks
4133 Transport clerks
4140 Library, mail and related clerks
4141 Library and filing clerks
4142 Mail carriers and sorting clerks
4143 Coding, proof-reading and related clerks
4144 Scribes and related workers

4190 Other office clerks, DK: including assisting spouse
4200 Customer services clerks
4210 Cashiers, tellers and related clerks
4211 Cashiers and ticket clerks
4212 Tellers and other counter clerks
4213 Bookmakers and croupiers
4214 Pawnbrokers and money-lenders
4215 Debt-collectors and related workers
4220 Client information clerks
4221 Travel agency and related clerks
4222 Receptionists and information clerks
4223 Telephone switchboard operators
4290 CY: Other customer services clerks
4300 Office helping workers
4400 Post office
4500 Railway official, higher civil service

Service workers and shop and market sales workers
5000 Personal service, sale
5100 Personal and protective services workers
5110 Travel attendents and related workers
5111 Travel attendents and travel stewards
5112 Transport conductors
5113 Travel guides
5120 Housekeeping and restaurant services workers
5121 Housekeepers and related workers
5122 Cooks
5123 Waiters, waitresses and bartenders
5130 Personal care and related workers
5131 Child care workers
5132 Institution-based personal care workers
5133 Home-based personal care workers
5139 Personal care and related workers not elsewhere classified
5140 Other personal services workers
5141 Hairdressers, barbers, beauticians and related workers
5142 Companions and valets
5143 Undertakers and embalmers
5149 Other personal services workers not elsewhere classified
5150 Astrologers, fortune-tellers and related workers
5151 Astrologers and related workers
5152 Fortune-tellers, palmists and related workers
5160 Protective services workers
5161 Fire-fighters
5162 Police officers
5163 Prison guards
5169 Protective services workers not elsewhere classified
5200 Models, salespersons and demonstrators
5210 Fashion and other models
5220 Shop salespersons and demonstrators
5230 Stall and market salespersons

Skilled agricultural and fishery workers
6000 Skilled agricultural and fishery worker
6100 Market-oriented skilled agricultural and fishery workers
6110 Market gardeners and crop growers
6111 Field crop and vegetable growers
6112 Tree and shrub crop growers
6113 Gardeners, horticultural and nursery growers
6114 Mixed-crop growers
6120 Market-oriented animal producers and related workers
6121 Dairy and livestock producers
6122 Poultry producers
6123 Apiarists and sericulturists
6124 Mixed animal producers
6129 Market-oriented animal producers and related workers not elsewhere classified
6130 Market-oriented crop animal producers
6140 Forestry and related workers
6141 Forestry workers and loggers
6142 Charcoal burners and related workers
6150 Fishery workers, hunters and trappers
6151 Aquatic-life cultivation workers
6152 Inland and coastal waters fishery workers
6153 Deep-sea fishery workers
6154 Hunters and trappers
6200 Subsistence agricultural and fishery workers
6210 Subsistence agricultural and fishery workers

Craft and related trades workers
7000 Craft and trade workers
7006 CY: Supervisors and general foremen (manufacturing and installation of electrical and electronical equipment)
7008 CY: Supervisors and general foremen (production and clothing manufacturing)
7100 Extraction and building trades workers
7110 Miners, shotfirers, stone cutters and carvers
7111 Miners and quarry workers
7112 Shotfirers and blasters
7113 Stone splitters, cutters and carvers
7120 Building frame and related trades workers
7121 Builders, traditional materials
7122 Bricklayers and stonemasons
7123 Concrete placers, concrete finishers and related workers
7124 Carpenters and joiners
7129 Building frame and related trades workers not elsewhere classified
7130 Building finishers and related trades workers
7131 Roofers
7132 Floor layers and tile setters
7133 Plasterers
7134 Insulation workers
7135 Glaziers
7136 Plumbers and pipe fitters
7137 Building and related electricians
7139 Building finishers and related workers

7140 Painters, building structure cleaners and related workers
7141 Painters and related workers
7142 Varnishers and related painters
7143 Building structure cleaners
7200 Metal, machinery and related trades workers
7210 Metal moulders, welders, sheetmetal workers, structural-metal preparers, and related trades workers
7211 Metal moulders vand coremakers
7212 Welders and flamecutters
7213 Sheet-metal workers
7214 Structural-metal preparers and erectors
7215 Riggers and cable splicers
7216 Underwater workers
7220 Blacksmiths, tool-makers and related trades workers
7221 Blacksmiths, hammer-smiths and forging-press workers
7222 Tool-makers and related workers
7223 Machine-tool setters and setter-operators
7224 Metal wheel-grinders, polishers and tool sharpeners
7230 Machinery mechanics and fitters
7231 Motor vehicle mechanics and fitters
7232 Aircraft engine mechanics and fitters
7233 Agricultural- or industrial-machinery mechanics and fitters
7240 Electrical and electronic equipment mechanics and fitters
7241 Electrical mechanics and fitters
7242 Electronics fitters
7243 Electronics mechanics and servicers
7244 Telegraph and telephone installers and servicers
7245 Electrical line installers, repairers and cable jointers
7300 Precision, handicraft, printing and related trades workers
7310 Precision workers in metal and related materials
7311 Precision-instrument makers and repairers
7312 Musical-instrument makers and tuners
7313 Jewellery and precious-metal workers
7320 Potters, glass-makers and related trades workers
7321 Abrasive wheel formers, potters and related workers
7322 Glass-makers, cutters, grinders and finishers
7323 Glass engravers and etchers
7324 Glass, ceramics and related decorative painters
7330 Handicraft workers in wood, textile, leather and related materials
7331 Handicraft workers in wood and related materials
7332 Handicraft workers in textile, leather and related materials
7340 Printing and related trades workers
7341 Compositors, typesetters and related workers
7342 Stereotypers, and electrotypers
7343 Printing engravers and etchers
7344 Photographic and related workers
7345 Bookbinders and related workers
7346 Silk-screen, block and textile printers
7400 Other craft and related trades workers
7410 Food processing and related trades workers
7411 Butchers, fishmongers and related food preparers

7412 Bakers, pastry-cooks and confectionary makers
7413 Dairy-products makers
7414 Fruit, vegetable and related preservers
7415 Food and beverage tasters and graders
7416 Tobacco preparers and tobaco products makers
7420 Wood treaters, cabinet-makers and related trades workers
7421 Wood treaters
7422 Cabinet-makers and related workers
7423 Woodworking-machine setters and setter-operators
7424 Basketry weavers, brush makers and related workers
7430 Textile, garment and related trades workers
7431 Fibre preparers
7432 Weavers, knitters and related workers
7433 Tailors, dressmakers and hatters
7434 Furriers and related workers
7435 Textile, leather and related pattern-makers and cutters
7436 Sewers, embroiderers and related workers
7437 Upholsterers and related workers
7440 Pelt, leather and shoemaking trades workers
7441 Pelt dressers, tanners and fellmongers
7442 Shoe-makers and related workers
7500 Metal worker general
CZ: Generic skilled manual worker
7510 Metal worker not elsewhere classified
7520 Electronics engineers not elsewhere classified
7900 Master craftsman, supervisor

Plant and machine operators and assemblers
8000 Stationary-plant and related operators
8100 Stationary-plant and related operators
8110 Mining- and mineral-processing-plant operators
8111 Mining-plant operators
8112 Mineral-ore and stone-processing-plant operators
8113 Well drillers and borers and related workers
8120 Metal-processing-plant operators
8121 Ore and metal furnace operators
8122 Metal melters, casters and rolling-mill operators
8123 Metal-heat-treating-plant operators
8124 Metal drawers and extruders
8130 Glass, ceramics and related plant operators
8131 Glass and ceramics kiln and related machine operators
8139 Glass, ceramics and related plant operators not elsewhere classified
8140 Wood-processing- and papermaking-plant operators
8141 Wood-processing-plant operators
8142 Paper-pulp plant operators
8143 Papermaking-plant operators
8150 Chemical-processing-plant operators
8151 Crushing-, grinding- and chemical-mixing-machinery operators
8152 Chemical-heat-treating-plant operators
8153 Chemical-filtering- and separating-equipment operators
8154 Chemical-still and reactor operators (except petroleum and natural gas)

8155 Petroleum- and natural-gas-refining-plant operators
8159 Chemical-processing-plant operators not elsewhere classified
8160 Power-production and related plant operators
8161 Power-production plant operators
8162 Steam-engine and boiler operators
8163 Icinerator, water-treatment and related plant operators
8170 Automated-assembly-line and industrial-robot operators
8171 Automated-assembly-line operators
8172 Industrial-robot operators
8200 Machine operators and assemblers
8210 Metal- and mineral-products machine operators
8211 Machine-tool operators
8212 Cement and other mineral products machine operators
8220 Chemical-products machine operators
8221 Pharmaceutical- and toiletry products machine operators
8222 Ammunition- and explosive-products machine operators
8223 Metal finishing-, plating- and coating-machine operators
8224 Photographic-products machine operators
8229 Chemical-products machine operators not elsewhere classified
8230 Rubber- and plastic-products machine operators
8231 Rubber-products machine operators
8232 Plastic-products machine operators
8240 Wood-products machine operators
8250 Printing-, binding- and paper-products machine operators
8251 Printing-machine operators
8252 Bookbinding-machine operators
8253 Paper-products machine operators
8260 Textile-, fur- and leather-products machine operators
8261 Fibre-preparing-, spinning- and winding-machine operators
8262 Weaving- and knitting-machine operators
8263 Sewing-machine operators
8264 Bleaching-, dyeing- and cleaning-machine operators
8265 Fur- and leather-preparing-machine operators
8266 Shoemaking- and related machine operators
8269 Textile-, fur- and leather-products machine operators not elsewhere classified
8270 Food and related products machine operators
8271 Meat- and fish-processing-machine operators
8272 Dairy-products machine operators
8273 Grain- and spice-milling-machine operators
8274 Baked-goods, cereal and chocolate-products machine operators
8275 Fruit-, vegetable- and nut-processing-machine operators
8276 Sugar production machine operators
8277 Tea-, coffee-, and cocoa-processing-machine operators
8278 Brewers-, wine and other beverage machine operators
8279 Tobacco production machine operators
8280 Assemblers
8281 Mechanical-machinery assemblers
8282 Electrical-equipment assemblers
8283 Electronic-equipment assemblers
8284 Metal-, rubber- and plastic-products assemblers
8285 Wood and related products assemblers

8286 Paperboard, textile and related products assemblers
8287 Composite products assemblers
8290 Other machine operators and Assemblers
8300 Drivers and mobile-plant operators
8310 Locomotive-engine drivers and related workers
8311 Locomotive-engine drivers
8312 Railway brakers, signallers and shunters
8320 Motor-vehicle drivers
8321 Motor-cycle drivers
8322 Car, taxi and van drivers
8323 Bus and tram drivers
8324 Heavy truck and lorry drivers
8330 Agricultural and other mobile-plant operators
8331 Motorised farm and forestry plant operators
8332 Earth-moving- and related plant operators
8333 Crane, hoist and related plant operators
8334 Lifting-truck operators
8340 Ship's deck crews and related workers

Elementary occupations
9000 Elementary occupations, unskilled workers
9100 Sales and services elementary occupations
9110 Street vendors and related workers
9111 Street food vendors
9112 Street vendors, non-food products
9113 Door-to-door and telephone salespersons
9120 Shoe cleaning and other street services elementary occupations
9130 Domestic and related helpers, cleaners and launderers
9131 Domestic helpers and cleaners
9132 Helpers and cleaners in offices, hotels and other establishments
9133 Hand-launderers and pressers
9140 Building caretakers, window and related cleaners
9141 Building caretakers
9142 Vehicle, window and related cleaners
9150 Messengers, porters, doorkeepers and related workers
9151 Messengers, package, and luggage porters and deliverers
9152 Doorkeepers, watchpersons, and related workers
9153 Vending-machine money collectors, meter readers and related workers
9160 Garbage collectors and related labourers
9161 Garbage collectors
9162 Sweepers and related labourers
9200 Agricultural, fishery and related labourers
9210 Agricultural, fishery and related labourers
9211 Farm-hands and labourers
9212 Forestry labourers
9213 Fishery, hunting and trapping labourers
9300 Labourers in mining construction manufacturing and transport
9310 Mining and construction labourers
9311 Mining and quarrying labourers
9312 Construction and maintenance labourers: roads, dams and similar constructions
9313 Building construction labourers

9320 Manufacturing labourers
9321 Assembling labourers
9322 Hand packers and other manufacturing labourers
9330 Transport labourers and freight handlers
9331 Hand or pedal vehicle drivers
9332 Drivers of animal-drawn vehicles and machinery
9333 Freight handlers

Country specific codes

Germany
0001 Soldiers
0002 Officers

Hungary
1250 Military officers
1251 High-grade military officers (captain and above)
1252 Lower grade commissioned officers (incl. Army Lieutenant)
2321 Secondary (high-)school teacher (academic track)
2322 Teacher in vocational training
3452 Armed forces non-commissioned officer
5164 Armed forces, soldiers

Poland
1250 Military officers
1251 High-grade military officers (captain and above)
1252 Lower grade commissioned officers (incl. Army Lieutenant)
3452 Armed forces non-commissioned officer
5164 Armed forces, soldiers

Norway
0111 Soldiers
0112 Officers
1320 Managers/ leaders in non-specified trade-areas
2510 Social scientific, juridical and technical deliberation and planning
2511 Economical and social scientific planning and deliberation
2512 Juridical planning and deliberation
2513 Technical and scientific planning and deliberation
2519 Others within this group
3341 Teachers in technical college
3342 Other educational and pedagogical occupations
3418 Customer consultant in a bank
3445 Public employment service workers
3491 Information workers and journalists
3492 Librarians
4116 Clerical officer
5134 Dental secretaries
5135 Medical secretaries
5136 Childminders
5164 Caretakers/ houseporters

5221 Shop staff/ sales staff and other salesmen (detail)
5222 Door-to-door and telephone salesmen
5223 Wholesale merchants
7125 Joiner, formwork
7126 Carpenters
7127 Foundation workers
7128 Tunnel and mountain workers, blasting operators
7144 Chimney sweepers
7217 Car- and airstructure mechanics
7234 Shipmechanics etc.
7350 Technical drawers
7450 Laboratory assistants
8132 Operators in insulation glass production
8341 Deck crew (ship)
8342 Engine crew (ship)
9134 Kitchen and serving assistants

United States
1240 Miscellaneous office supervisors
6132 Farmers
6133 Farm supervisors

NORWAY

Correspondence list national occupation codes <-> ISCO88

In Norway, the ISCO88(COM)-based "Standard for yrkesklassifisering - STYRK" (Standard Classifications of Occupations) has been used for classifying occupations. STYRK codes are subsequently recoded into ISCO88(ILO) in the variables ISCO88 and SPISCO88.

The table below includes STYRK codes which deviate from ISCO88(ILO), and their bridging to ISCO88(ILO) codes.

STYRK	ISCO88(ILO)
0	Not classifiable, inadeqately described
0 < STYRK < 1000	100
1225	1226
1226	1227
1227	1229
